“Encounter with An Alien”

<u>On shoulder of Book</u>

*… **that it is what all must know, before they die***.

<u>On back cover page</u>

WHO I AM?
WHERE I AM?
WHAT IS ITS PURPOSE?
ARE WE ALONE IN THE UNIVERSE?

We go on searching answers, read books, go to scientists, and seek out mythological persons… UNSATISFIED, we die… and it simply ENDS.

Extraordinary Alien story written for all, starts from ice crater at 'top of Europe' in alps where I met alien, and it includes the discussions about soul, death, re-birth, matrix; as she answers my questions and tell me all about our working God. The story finishes with her tragic sacrifice, as she finally said to me, *that it is what all must know, before they die*.

By 3 DIMENSIONS OF SPACE, we know WHAT, with fourth dimension of TIME we know WHERE, I introduced fifth dimension of ENERGY and learned HOW universe works; and to get me answered, WHY or PURPOSE OF ME and OF EVERYTHING in this UNIVERSE, was explained by my alien friend.

MY PHOTO

BAR CODE

Front cover page-

AI to make it cover page photo

In night a person, sitting on chair and leaning his head on table (dead), in front of open computer, in light of a table lamp, on first floor room on big roof, at which an alien (GREEN IN COLOUR, two lobes upper comparatively small and cylindrical, lower big spherical, with two strong arms along with palm and fingers and two small legs, but with no toes; NO EYES, NO EAR, NO MOUTH and NO FACE.) wearing one single coloured gown; descending from hovering stationary space craft, by holding hanging rope by one hand and a jar having my soul in other hand, just to revive me.

Preface 1 (written by My Alien Friend)

I am an alien 'Grengi 137', (my star and its planet will be revealed later on). Here, I disclose to you Earthlings that, according to the order of the 'Master of our galaxy', human civilization is pre-allotted SUBJECT TO US, and we are conducting several Earth-bound experiments. Your cyberspace (internet) has been explored, and all differences remembered and your body's anatomy is known to us.

For example, at the BERMUDA TRIANGLE, our ongoing experiment for a couple of centuries is to learn to trans-place big objects such as airplanes and ships intact from our universe to a parallel universe, along with some species and microorganisms found on your planet earth.

Sometimes, you feel we aliens are nearby, sometimes you observe our presence by seeing some left-over by-products of our previously conducted experiments. Primarily, we work to fiddle with selected brains to impart knowledge. Occasionally, our experiments change your environment, and very rarely (only for study purposes) we introduce micro-alien-harmful-material to your civilization.

For our ongoing experiments on the 'transfer of knowledge', this time, we selected a highly optimistic Doctor, ASHOK SAXENA, as a medium. We started working on him when he was sitting alone 50 years back outside the X-ray room of Radio-diagnostic Department of SNMC AGRA shivering on a cold morning in February 1974. He had a malignant lymphoma in his left lung. We without his knowledge, invisibly laser-burned his solitary

slow-growing cancer nodule from his left lung and echoed to him that "YOU ARE BEING RETAINED FOR SOME PURPOSE." Afterward, several time we silently fiddled with his brain to direct his research work, from time to time.

In this book, you will not only come to know with our face-to-face discussions about SOUL, REBIRTH, GOD, all topics of metaphysics, but also with Physics and Astrophysics which explains the 'STRUCTURE AND WORKING OF OUR UNIVERSE'; centred on identifying ENERGY as the POSITIVE FIFTH DIMENSION OF THE UNIVERSE.

It is just the advanced stage of our previous experiment conducted by our great, great grandfather's friend, when he simply fiddled with the brains of a few Rishis, during their meditation around 8000 years back to pass the 'knowledge' known to us by that time, but this time the knowledge being transmitted is much advanced, then the condensed form of knowledge described in your 4 books of Vedas by these Rishis.

This time, working with Ashok, it will not only to pass the knowledge silently brain to brain (as it was passed in the case of the Vedas) but it will be passed openly for benefit of humanity as it should be known to all born, and it will be discussed so clearly, that anyone with a school education can absorb it.

PREFACE -2 <u>(written by Me)</u>

Why this book?

This science-fiction story delves into the physics and astrophysics of our working God (or our space-matrix; i.e., space-time-energy), Soul, Death, and rebirth with the sole aim to address three eternal questions:

1. Who am I?

2. Where I am? And

3. ARE WE ALONE IN UNIVERSE?

Please read the interesting Story ……

Chapter 1

I FOUND MY FATHER DEAD

My self, Ashwarya, discovered my father, Ashok Saxena, deceased at our residence, 121 Manas Nagar, Agra, India, on the morning of August 15, 2013.

We have a big hall and room at second floor of our house 121 Manas Nagar, AGRA, where my father use to live alone continuing his research work from 1996.

He was in his 64 th year, a skilled orthopaedic surgeon with diverse interests. Over his career, he served as good doctor in government, built few houses, painted few paintings, wrote few poems, and read all physics, just to know **basics of all basic**, keenly observed persons to study different human behaviours along with roaming all-around world.

However, his primary focus for the last 28 years was crafting a model of 'structure and functioning of universe'. His fascination with physics, astrophysics was first ignited during the Total Solar Eclipse of October 24, 1995, in Fatehpur Sikri, Agra.

After observing the event with few self-designed crude experiments, along with studies, he could theorize the formation of an **'Ecliptic window'** in Earth's magnetosphere in shadow region of moon. He hypothesized, that "***sporadic beams of charged particles***" fall through ecliptic window during the TSE, is the sole cause of blindness and foetal anomalies in unaware viewers and side by side it also explains all TSE related phenomena.

My father once told me, that charged particles in magnetosphere which are circling Earth can be imagined as *Cars running at high speed, in very heavy traffic, on high way, and if one car suddenly apply brake then several vehicles are bound to collide.*

Similarly, charged particles after reducing its existing energy in 'shadow area of moon' in reduced temperatures, will slowdown and then will collide with other charged particles distributed in 65000 km thick 'Van Allen charged particle belts' around Earth. These colliding particles will pass through protecting magnetic sieve after breaking the magnetic rigidities of these layers towards Earth or sometimes they are even shot on earth, with piled up energies as weak cosmic ray showers, (like 'stone thrown with catapult'), *and affect the eyes of ignorant protection less viewer for irreparable loss of his eye sight.*

His groundbreaking research earned him invitations to prestigious conferences and seminars and recognition from Indian and international astronomical

community, a **big incentive to do further research work with passion.** On this topic, he gave lecture at Bangalore in February 1996, and on 9th may 1996 at CHUNG LI Taiwan.

In his first book he proposed to utilize **artificially created 'charged particle showers**' (by deflecting charge particles with local electro-magnetic loops) from magnetosphere to generate electricity on satellites, tele transmitted to Earth and thus we humans could possibly exploit it as natural source of energy. His vision extended to harnessing these particles as an inexhaustible energy source and also for repairing the holes in ozone layers and to change desert ecology. He also observed parallels to his theories in natural phenomena like *electrical conduction **between Jupiter** and its moon, **Io**.*

Foot note

He envisioned very big superconducting wire loops tied with geostationary satellites as **magnetic lenses** to concentrate and focus charged particles for energy generation. Furthermore, he emphasized to explore the possibility of transmitting this generated power wirelessly to earth, based on Nikola Tesla's principles, using '**multiple satellites wireless energy transfer technology**'.

In his book, "INSIDE A WAVE" (2005), he introduced the concept of an omnipresent Matrix (Space Matrix - SPACE-TIME-ENERGY), with **ENERGY as the POSITIVE FIFTH DIMENSION OF THE UNIVERSE**. He presented these ideas in a lecture at the National Physical Laboratories, New Delhi, in June 2006.

When you throw the ball on wall and it comes back to you or rocket accelerates in space, thus EQUAL AND OPPOSITE REACTION IS EXECUTED **only by contraction of space matrix.**

No Em forces, atomic, or gravitational forces are generated without presence photon, or an atom and at least a body is required for generation of gravitational force.

His work, patented in 2009-2010, laid the ground breaking understanding that this *Action – Reaction mechanism of space matrix as only one universal fundamental force which manifests as 4 basic forces with changing geometry by inclusion of increasing number of dimensions in local contraction of Space Matrix with increasing loads to counteract them, from unit photon to unit black hole.*

Today, when he did not come down in morning for breakfast, I came upstairs in house and found him pulseless and subsequently found following manuscript typed on computer and some papers printed in printer bucket.

Chapter 2

WE ARE SOLE, WE HAVE BODY

'The crucial page'

As, I will become pulseless, on this chair in front of my computer table just after transcribing this account, I assure you all that I am not deceased, but only passed in **'suspended animation state'**, while, my soul been sucked out to a jar and now trapped in 'electro-magnetic field' by an extraterrestrial being from its space ship, ready to depart for her home planet.

It is midnight, and the alien's spacecraft is scheduled to touch down at precisely 3:58:56 AM (Night; IST) on August 15, 2013, at the air force Para jumping grounds in Malpura, Agra, India (27.1583144 latitude and 77.9627741 longitude).

To avoid attracting undue attention to this UFO landing, in my guidance after selection of location, Alien have prepared a camouflage enclosure,

roughly the size of a volleyball court, using 'laser screen technology', to seamlessly blend it with the surrounding landscape. The spaceship will land within this enclosure, for a brief two-minute window period. And at the moment of landing, the area will also be concealed by translucent laser walls, for a while after which all will be switched off as the space ship takes off, and illusion will vanish.

I have left alien hidden amidst the green bushes in Malpura, AGRA, as I returned to my house at 121 manas Nagar to document this **crucial page**. It is **imperative** that my body remain undisturbed for the *next three weeks* and not be cremated prematurely, before this minimum time period, roughly required for TOO and FRO journey of space craft in between mine and alien planet.

For days, my alien companion and I have anxiously awaited permission from the Alien government to transport a human live from planet Earth to their planet. But as this request is still pending; and we could not wait, so now, our plan has bit shifted and involves that the alien will first transport my soul to their planet, with the intention to reconstruction my body on alien planet by locally available nuclear debris. (neutron, proton and Electrons)

The unprecedented request has raised ethical, mythological, medical, environmental, financial, and social questions within the alien society, which is being debated fiercely. While we awaited permission, the imminent arrival of the rescue spaceship necessitated this swift action, compounded by prolonged stay of Alian on Earth, as it may risk her detection.

As consolation, we obtained a last-minute permission from alien government, that my soul only be transported on coming Alien space craft, while final permission from masters of galaxy, is still pending and been objected by leader of opposition in senate.

Once alien spacecraft arrives, equipped with advanced instruments, they will tele extract my soul from my chair in this room and will store it on space craft enclosed within an electromagnetic field, inside a jar for its safe transportation to alien planet.

Later on, after reaching alien planet whenever full permission is granted by masters of Galaxy, my body will be reconstructed over my soul, using 3D imaging data (earlier captured by alien and stored in her '3 D matrix Halo camera') and locally sourced sub atomic particles on alien planet.

Despite the big uncertainty, I have agreed to this once in life time opportunity, recognizing it only chance to extend my lifespan. The alien world, with its unique gravitational field and time dilation properties, offers me the *promise of an extended lifespan on host planet by many centuries*.

I hereby declare that, after this crucial twenty-one days, if my physical body remains unchanged, it may be assumed that the permission to enter me on the alien planet has been denied. In such an event, **I may or may not return to my body**, foreseeing logistical challenges and unwanted attention of media, upon my return to Earth.

Only after completion of this period, if I don't come back to my body, I grant's my son Ashwarya, *permission to cremate my body according to Hindu traditions on September 5, 2013.* During this period, fear not for my body being decomposed, but it will remain preserved, sustained by the

imparted energy and few electrons which are being left in my brain from my original soul beam. Alian thus assured to preserve my body for 21 days for which it will be charged; they have experimented with few bodies, still preserved on earth. It is very well known that reptiles and frogs hibernate for long periods.

To demonstrate the reality of 'tele-transportation of soul' and to 'reconstruct of a body', you should know about this extraordinary tale in its entirety, earlier compiled by me in last few days and then printed on the papers present in computer bucket, may be below some papers.

The extra - ordinary Tale

Meeting with the Alien was an accident

Amit, my younger son, was pursuing an MBA in finance at NTU Singapore, while juggling his job responsibilities. He had an exciting itinerary planned, starting with a seven-day student exchange program in Brussels, Belgium, followed by a 12-day Europe tour. As Amit was unmarried, he invited me, to his mother Surekha (a retired professor and former head of the anaesthesia department), his brother Ashwarya with his wife Laxmi to join him on this adventure.

The European tour kicked off smoothly, with our joining it at Amsterdam. We marvelled at Madurodam; Holland's miniature world, featuring replicas of all famous monuments i.e., all world heritages and other famous buildings in world and intricate miniature working models of highways, trains, airports, and dams.

Before embarking on a fascinating canal cruise, we indulged in visits to a cheese factory and a wooden shoe factory, immersing ourselves in Dutch culture.

The sight of windmills harnessing the power of the wind and the ubiquitous presence of cyclists added to the charm of the Netherlands.

En route to Brussels, we caught a glimpse of the Atomium, a colossal structure resembling a billion-size enlarged iron molecule, and in Brussels, we encountered the renowned ‘Manneken Pis statue’ (world famous statue of urinating boy) and the majestic Grand Palace in city square.

Our next destination was Paris, where we ascended the Eiffel Tower to behold the sprawling cityscape and capped off the evening with the mesmerizing ‘Lido show; PARIS’.

The third day brought us to Euro Disney Park, brimming with enchanting attractions of many rides and beloved characters.

Crossing over to Germany on the fourth day, we embarked on a scenic boat cruise along the Rhine River, passing by ancient forts nestled both sides, amidst picturesque landscapes.

Fifth day took us to the heart of the Black Forest in Germany, where we marvelled at the world's second-largest ‘Holisteig; Cuckoo clock’ and beheld the awe-inspiring Rhine Falls in Schaffhausen before journeying through a 17-kilometer mountain tunnel to Switzerland.

Switzerland greeted us with its pristine lakes and meticulously manicured landscapes, a testament to its affluent population and diligent civic culture.

Ascending Mount Titlis, by rope way in two cable cars on the sixth day, we revelled in breathtaking vistas and partook in ice sports amidst the sunny

alpine backdrop. Later, we explored the ‘Lion Monument’ and the iconic wooden bridge in Lucerne.

The seventh day, unfortunately, took a tragic turn, which changed the course of my life.

While visiting the town of Lauterbrunnen and witnessing enthusiasts engage in hand gliding, we all five mounted a cogwheel mountain train which transported us to the summit of Jungfraujoch, the "Top of Europe". This train stopped at two ‘ice stations’ where we saw few statues made up of ice in this manmade ice cave stations. While lunch at an air-conditioned restaurant at ‘top of Europe’ just by the side of the start of a glacier slope, we all played and enjoyed ice balls thoroughly.

But, in spite of my advanced age of 64, I rode a self-picked up ice scooter to which I found abandoned and just lifted it (without the knowledge of any body), as I was not allowed for ride being old and I was not prepared to miss the ride, only due to me being a senior citizen.

While sliding down on smooth but sharp curves of glacier, with me sitting on an ice scooter tragedy was expected, especially when I bypassed to listen the operating instructions from care taker.

In thin air with low oxygen at 11300 feet mountain height, my compromised asthmatic lung, compounded by my partial motion sickness habit, soon affected my brain, thus first I hallucinated and then blacked out and lost control on a steep slope, leading to a harrowing accident after breaking the ramps and a weak ‘wire fence’, my scooter carried me to a deep ice crater in which I rolled down.

Alien

When, I finally regained control of my body and became conscious after my brief blackout, to my great surprise, I found myself uninjured and cradled in the powerful arms of a strange, green-feathered creature, keenly observing me. It gently placed me on the ground and pointed me to a nearby helmet.

The cave had faint light coming from a thin beam entering crater. I managed to stand, to look at its two-sphere body (upper small and more cylindrical but lower big and perfect sphere) with strong arms and small legs, but no discernible features—no mouth, no nose, no eyes—it became apparent that this creature had no regular face.

Following its hand gestures, I placed the helmet over my head, and to my amazement, the creature began to speak me in perfect English through the helmet's built-in language synthesizer. Gone were the days of communicating through sign language; we could now converse effortlessly. I think the aliens new about our language by its previous experiments on Earth. I wondered how it could see or hear me but its voice coming to me was bit chocked. I later on knew that I was directly listening and interpretating to its thoughts only.

The alien briefly introduced itself as an extraterrestrial being, of female gender named Grangi 137 and told me that we **both are in dire emergency.**

Yes, I was. I had fallen into a deep ice crater atop Mount Jungfrau in the Alps, with no knowledge to fellow passengers or ice scooter owner, and thus no hope of rescue team and I would soon succumb to the freezing temperatures.

Similarly, Grengi 137 (I will call it only Grengi), was left behind by its fellow passengers after it accidentally slipped on ice, and its spherical body rolled and rolled on the slope and it could not stop itself to fall in this crater without a hint or knowledge to its fellow passengers and after big fall she lost consciousness for 3 earth days, as it told me in my helmet. Her fellow passengers could not search it.

By the time Grengi awoke from unconsciousness, its companions had departed, leaving it stranded and she was just hiding here from last 2 days. Although the alien had herself managed to repair its dismantled device (something like satellite phone) to contact it's home planet, and then to space ship where they *bluntly refused her* that they are unable to return to rescue her, it was mainly due to shortage of nuclear fuel for the vehicle they had and they have now already passed through the solar system, on their way to its mother planet.

As an alternative, another space craft is already been dispatched from creature's mother planet 5 days back sent to retrieve her or to her body, but it will take around 15 more days to come, even when it is cruising in emergency at very high speed, breaking the light-speed barrier of universe. With no access to sunlight (its only source of energy, in the crater, the Grangi is slowly losing strength and growing weaker since last 5 days.

It implored me, to take her to my home, where it could recharge daily in good sun in India, and can safely wait in isolation. Fully aware of the potential chaos, with the discovery of an alien on Earth could cause, the alien emphasized the importance of our *symbiotic relationship for our mutual safety, **whether we liked it or not***.

Despite its unconventional appearance, I did not fear Grengi but her personality exuded a sense of grace and calm ness with good and loving feeling.

Alien then explained me the plan, that now her *soul only would accompany me* to my home, leaving its lifeless body behind, to be taken care by microbes, and a new body will be reassembled there by nuclear debris.

With a gentle touch on my forehead, of her strong green hands she transferred some energy to me, instantly alleviating my left knee pain and revitalizing my body at least by 30 years—as I felt sensation akin to the cosmic energy transfer experienced in 'Reiki therapy' by a Rekhi master.

She handing me a small jar, and instructed to carry it along with inside trapped 'soul' protected and superimposed by an artificial electromagnetic field, after the procedure is completed.

Following its guidance in helmet, I turned around and stood still for fifteen minutes while she disrobed herself from her 'strange transparent-translucent' single dress, only after fixing a MATRIX HALO CAMERA with its automatically adjusting three appendages, and lied down still after making floor smooth and spraying her body with some paralysing and anaesthetising medicine. She instructed me first to start halo camera; and when they automatically stop after collecting the entire required data; I should listen and follow afterwards only to preloaded instructions to

‘quantum computer’ inside helmet, recorded for me and taken care by artificial intelligence.

After 20 minutes, I was guided to collected all her belongings except her life-less body (left to decompose), Halo camera, her strange single cloth as her dress with scrambled few pages in pocket, and off course also the jar with Grengi’s soul in my back pack; before I climbed out of the crater. It could only be possible with the help of helmet's advanced computer with camera, which assisted me to navigate each step of the ascent out of crater and to my mountain top restaurant. But before reaching restaurant, I also, shifted helmet to my back pack and rejoined my group without divulging a word about this encounter or any notice of glow on my revitalized body.

From the moment the alien's soul, confined within a jar, began its journey with me from Switzerland to my home town to Agra, India, the task of transporting it alongside its ‘halo camera’ and helmet was anything but simple.

Over the course in six days, I encountered numerous challenges and experiences, both good and bad. Despite carrying these items discreetly, my back pack now had four unusual additions: a jar with strict instructions not to open it, a ‘MRI/laser/neutron beam halo camera’ with all its attachments, the alien's helmet, and about 10 strange pages scrambled in strange language in her single dress.

Under the cover of night, at a lonely place afterwards I couldn't resist stealing a glance into the jar, by opening the steal container, but without opening the transparent jar Inside it. I discerned the faint outlines of thin electron

beam orbiting in elliptical paths emitting light photons. I could speculate that the motion of these electrons within our nervous system, governed by the complex orbits in our brain cortex, symbolized life itself.

As I pondered the nature of life and death, I couldn't shake the memory of a peculiar incident from my past. In April 1998, my mother, a simple yet intelligent woman, expressed her desire to donate her eyes, after her death. At the time, she was in perfect health, yet her premonition proved chillingly accurate. Two days later, she suffered a fall and slipped into a coma, never to awaken.

During her forty-day coma, after her brain operation, my family cared for her tirelessly at home, hoping for signs of improvement. Despite her unresponsive state, there were moments when my sister noticed, what appeared to be tears welling in her eyes, when she talked to her, suggesting she could still hear us. On the morning of May 27th 1998, around 7 am as I sat by her side, holding her hand, and whispered her; your ‘wish to donate your eyes will be honoured and if you are waiting for this, please don’t suffer and go’.

Soon after, as I started doing physiotherapy of her lungs with gentle strokes on her back, she suddenly coughed big phlegm which chocked her, I tried suction and shouted to Surekha for help as I could not press the manual suction machine, and then we both tried to press it but it will not budge, and moments later she peacefully passed away. AS IF SHE WAS WAITING TO BE JUST ASSURED OF FULFILMENT OF LAST WISH.

I still cant understand that why perfectly working manual suction machine does not worked that day. STRANGE IS HIS WORKING AND INDICATIONS OFTEN GIVEN TO US, TO WHICH WE OFTEN IGNORES.

Her corneas were promptly donated to two blind recipients awaiting transplants. Their sight was restored, a testament to the enduring legacy of my mother's altruism. In the weeks that followed, both recipients visited our home to express their gratitude, a poignant reminder of the power of selfless acts even in the face of tragedy.

Foot note

* It is both remarkable and ironic that India is home to 25 lakh blind individuals, comprising roughly one-third of the world's total blind population. What makes this fact even more poignant is that many of these individuals could regain their sight through corneal transplants—a procedure that involves replacing the thin membrane covering the eye's opening. Even more remarkable is the source of these corneas: they can be donated by individuals who are about to be cremated, with or without prior consent from the deceased or their relatives.

Sitting in the back seat of our bus that traversed 2500 kilometres during our Trans-Europe tour—it was convenient for me to stow the large back pack in the empty rear corner seat without causing any inconvenience to anyone. I carried it with me everywhere, never leaving it unattended. As a precautionary measure to avoid drawing attention or eliciting unnecessary comments about my large, albeit not too heavy back pack, I made a habit of boarding the bus very early, almost as the first passenger, and I would be the last to disembark in the evening.

Following our visit to Switzerland, our tour took us to Italy, concluding our journey with a visit to iconic landmarks such as the Leaning Tower of Pisa in the Square of Miracles.

In Florence, the capital of Tuscany, we marvelled at the open-air museum of sculptures, featuring statues of royal dignitaries, renowned scientist Galileo Galilei, and esteemed artists like Michelangelo and Bernini.

We also explored the ruins of the Colosseum, famed for its gladiator fights, and the Circus Maximus, known for chariot races, as well as the ancient remnants of the Roman Forum—a site of excavations of the old city of Rome. In addition, we visited the statue of God Neptune at the Fountain of Wishes (Trevi Fountain).

Venice, with its intricate network of water channels replacing streets and roads, offered a unique mode of transportation with gondolas in place of cars and scooters.

In Verona, we visited Juliet's balcony, immortalized in the famous love story of Romeo and Juliet, before concluding our tour at Milan airport on July 20th.

My alien friend had instructed me to protect his helmet, camera, and glass jar from the potential hazards of X-rays during security checks. To comply, I previsualized and purchased brand-new replacements—a helmet, a large movie camera, and a big glass jar. After discarding the original contents to three isolated dustbins at different places after removing tags and retaining only the cartons and receipts, I placed the alien's helmet, halo camera, and the glass jar into these empty cartons and then into my big back pack.

Upon reaching airport in Milani, I presented my back pack with the open chain and open lid of boxes for inspection of security officer, and displayed the receipts for the goods. I explained to the security personnel that the boxes

were too large to fit into our suitcase and to be carried as checked-in luggage.

Despite opening the lids for inspection, the security personnel found nothing suspicious and gently returned the goods in cardboard cartons to my back pack without passing them through the X-ray scanner.

Once the aircraft was airborne and we were settled, I retrieved my back pack from the overhead luggage compartment and placed it on an empty seat beside me. We safely returned to India and passed through the green channel at Delhi airport without undergoing customs checks.

Upon arrival at Agra in a taxi directly from airport, I transferred all my belongings, including my back pack, to my secluded room on the second floor of my house, which boasted a spacious secluded open roof.

Our tour concluded with resounding success, and we amassed a collection of 2856 digital photographs, which I transferred to our laptops from my digital camera.

Upon returning to my room, my immediate task was to reconstruct alien with the help of instruments and technology working from alien planet. The collected 3D mapping data of Grangi's body stored in its halo camera, I promptly telly- transmitted to alien planet for primary working of procedure.

Day 1 **Reconstruction of Alien Body**

Helmet echoed; I will first give you example of **moulds of space matrix**. Have you ever thought why Celestial bodies are spherical or Saturn have rings around it? Or how the empty quantum level orbits produced by nucleus

in forming atoms are one by one filled by electrons (once desired energy level and charge to harbour an electron is achieved) to form all Elements.

All celestial bodies are supported by four-dimensional contraction of space matrix around its gravitational centre, **which thus form 'gravitational spheres of equal number of layers of gravitons', equals to the 'number of unit masses in body'**. With distance this 4 D deformation will dilute as an empty mould of spherical space in 3 D, in which the mass of body accumulates to give it spherical shape.

In case of Saturn, its diluted mass with density lower than water, could not be accommodated in its 3D mould and spills out in 2D contacted space of gravitational field of Saturn "As RINGS OF SATURN" side by side to the orbits of its natural satellites.

Creation of new body with nuclear debris in 'artificially generated three-dimensional mould of space matrix'.

Alien said, ***we are just bunch of printed nucleons (neutrons, Protons and electrons) waves on three-dimensional omnipresent net of space matrix.*** *Multiple two- dimensional frames are joined together at Planck's least length to create an 3D halo, which will be 3D printed by atomic debris*

(neutrons, protons and electrons) akin like zig saw puzzle you solve to create a two -dimensional picture.

I said, what you're describing to create a halo of 3D deformation, it sounds like creation by utilizing energy channels with precise deformations of the matrix in three- dimensional frame. In very crude sense, it's akin to the process used in television, when entire picture frames of two-dimensional deformations of space matrix, is transmitted via electromagnetic waves as beams from a studio camera to your TV screen.

During the tale reconstruction of my alien friend's body similar to crater of Alps, at Fatehpur Sikri, a remote operation was conducted from a lab on her home planet, leveraging advanced technology and instruments not yet dreamed on Earth.

My role was limited to capture images of 3D frame of my alien friend's body, along with its energy halo, using her 'halo camera'. These 2 D picture slice images (each of Planck's length thickness) were already transmitted to the laboratory on the Alien's planet, to work upon the data, where they reconstructed the body's halo by placing together all two-dimensional deformations to create a **3D empty frame** of thus deformed matrix, which will again be reconstructed on Earth to ultimate reconstructing her new body at Fatehpur Sikri.

Roughly, empty 3D frames as mould, comprised of multiple copied deformations of the space matrix in two dimensions, was then filled with locally available nuclear debris using gamma lasers, electron lasers (technology still unfamiliar on Earth) *, and neutron beams, all produced by her single halo camera.

Foot note

*It's fascinating to consider the potential applications of this '**electron beam laser technology**' on earth for transporting electric current without the need for wires, will potentially revolutionizing energy distribution systems of towns and will be used to recharge orbiting satellites and flying fuel-less airplanes from earth-based stations.

The following morning, after loading my car with the alien's helmet, the advanced halo camera equipped with laser and neutron beam generators, the electromagnetic field jar of her soul, and my tiffin box along with drinking water, I first visited a shop in the Taj Ganj area to commission the creation of a wax model of a beautiful girl weighing exactly 46.8 kilograms, as per the alien's instruction.

Subsequently, I scouted for a suitable location to conduct the nuclear process for reassembling the alien's body. Initially, I inspected an abandoned underground chamber in the basement of the historic Agra Fort, built by Emperor Akbar during the sixteenth century.

Since my student days I came to know that just in front of the Shish Mahal building, a gate under the platform of stairs led to the underground chambers, which was permanently closed to visitors and workers alike.

Years earlier, a local guide, who was a casual acquaintance, had shown me and to my friend late Mr. Bhojraj this passage during the daytime. He had the knack of opening the locked door under the stairs by just lifting it off its hinges and then we slipped inside silently, after closing the door behind us. Inside, it was pitch dark, and we had relied on candlelight to navigate the sprawling underground chambers. The rooms and corridors were foul-smelling, the floors raw and unpolished. Thick layers of dust and bat droppings covered stairs and passages. Air was pungent and foul smelling.

Foot note

[1] By the way, it's crucial not to underestimate the risk of inhaling stale air laden with decomposing bodies of bats and rats in the closed chambers as at the Agra Fort. These environments may harbour viroid's (infectious agents lacking a protein coat that typically infect plants and fungi), viruses (which infect organisms), bacteriophages (viruses that consume bacteria), and various superbugs resulting from decaying wood. I believe these pathogens may have been responsible for the "**Curse of the Pharaoh**" or "Curse of King Tut," as many individuals who opened chambers, such as those in the tomb of Tutankhamun in the Kings Valley at Luxor, Egypt, died mysteriously within a year from contracting unknown diseases.

Descending three floors down, the guide pointed out the male prison and the gallows room, revealing that after executions, the corpses were customarily dropped into a well directly beneath the gallows. This well was connected to a water-filled trench encircling the fort, which had been home to crocodiles in Mughal times, feasting on the disposed dead bodies.

When we reached five floors beneath the structure, there was only one large room, its three side walls obscured by mud from floor to ceiling. The guide informed me that these mud-covered walls were the openings of three tunnels, now sealed shut. Of these tunnels, one led to Fatehpur Sikri (the capital city of King Akbar, located 40 km away), and second to Sikandara (Akbar's tomb, built by Emperor himself) and third to a building in Agra town. Notably, the iconic Taj Mahal of Agra was constructed much later by Shahjahan, in third generation being grandson of King Akbar.

This time, I ventured alone into the underground chambers of the Agra Fort, carrying my back pack and helmet on my head to communicate. Through the frequent questions transmitted via the headphone built into the helmet, I discerned that somebody from alien planet was also inspecting every detail of the building, matching it with its requirements. Upon seeing the chamber with the closed tunnels, the alien speaking in helmet

deemed it suitable, albeit cautioning about the intense heat generated during the *nuclear process of reconstruction of body, could potentially compromise the fort's structure*.

After exploring a few other open locations, all rejected due to privacy concerns, we settled on the same spot at Fatehpur Sikri where I had witnessed a total solar eclipse back in 1995—a moment that had significantly altered the course of my life. Over the past two decades, while dedicating myself to studying and researching Physics and Astrophysics, I had sacrificed both substantial earnings from private practice and quality time with my family.

I bribed the guards with cash and imported whisky to facilitate our entry into the completely closed confines of Fatehpur Sikri, where I planned to photograph the building with my girlfriend under the moonlight, ensuring total privacy.

After the guards consented, I went to Taj gunj to collect My wax model ordered earlier sculpted as a beautiful seated girl and I draped it in a burqa before placing it in the backseat of my car. With the wax model secured, I drove back straight to Fatehpur Sikri, a 40 km journey, arriving around 8 PM. The guards allowed me the entry, and I headed to the gardens deep within the enclosure.

Under the dark night sky illuminated by the starry firmament, I set up the halo camera, loaded with images of the alien's 3D body taken earlier in the crater. At 9 PM, I activated the camera, which automatically focused and synchronized with the lab on the alien's home planet. For three hours, the

camera adjusted and readjusted its positions to account for the Earth's motion.

At midnight, I positioned the wax model on the ground and started the halo camera with its three laser and neutron beam generators each set in 3 D, at 60 degrees around and about 1 meter apart from the wax model. Following the alien's instructions, I set an alarm for 4 AM and retired to a bench in other enclosure for a brief rest.

Upon my return at 4 AM, I found the beams deactivated, the surroundings still radiating intense heat. After allowing everything to cool down, I discovered the wax model replaced by the alien's body. I quickly retrieved the glass jar and the alien's old clothes from the car, placing the jar near the body before stepping away.

I again returned to see alien seated on floor, clothed in its old attire. We hastily packed everything into the car and departed for home around 5:30 AM.

Earlier, the alien already explained me by her prerecorded messages in helmet, that while its body was indeed newly formed using nucleons and electrons from the wax model, the process was akin to the slow replacement of tissues in human bodies. Every tissue, including blood and skin, undergoes renewal over time, resulting in a "new" body on each birthday, being replaced from the body of previous year.

Chapter 3

Day2, **All about soul**

First day at room

I am a curious brain, my curiosity about knowledge will never end, out of this curiosity, I read epics Mahabharat, Ramayana, gone through Geeta, Bible, Koran, known about Buddha and Guru Nanak, Abraham and Confucius; I observed in depth, nature and human behaviour, I read books and lot of physics, but could not get answer of basic Questions of our existence;

WHO AS I?

WHERE I AM?

ARE WE ALONE IN UNIVERSE?

Since day one, when I met alien, I was wondering about nature and structure of Soul. As soon, as we settled in room at second floor of 121 Manas Nagar, AGRA after taking my breakfast and *alien being in sun for 5 hours* at around 11.30 AM on 8th day, *I asked alien, can we discuss about SOUL*.

He asked, first you tell me what do you know about soul?

I use to give lecture on soul, my favourite topic amongst our few friends, so I started in haste; *and boosted '**consciousness about self and about surroundings is feature of all living**' and thus its **synonyms are life, mind** and its **governing soul**.*

In Shri Bhagwat Gita (part of epic MAHABHARAT)

The great war of Mahabharat was fought in 3137 BC in Kurukshetra, Haryana, India. The great archer Arjun feared to kill his relatives and friends, puts down his Arrow. Then, lord Krishna serving him as his chariot driver, tells Arjun the truth.

"Lord Krisna" Explains to Arjun as follows, about SOUL.

I further boosted with my knowledge of soul as written in Vedas;

Soul have two divisions and five Quantum levels

The soul is of two types as 'PRAN ATMA' or super soul which form cosmic consciousness (also known as Vibhu atma) and 'JIV ATMA' (or anu atma).

Consciousness to which we know as Jiv atma (and its five levels) is different from consciousness of suprema (Cosmic consciousness or Vibhu atma), because it should also have all knowledge of past, present or future.

Slok of Sanskrit in Svetasvatara upnishid (4 to 5 the century BC) describes, **Jiv atma** or soul as hundreds of hundred parts of nock of hair. It roughly matches to the size of 87 billion electron beam in human soul.

Balagra-sata-bhagasya, satadha kalpitasya ca, bhago jivah sa vijneyah, sa canantyaya kalpate.

Electron has bit of Mind

*Then, I asked her is it true '**Electron has bit of mind**'? **

*Alien said, **yes electron serves as one bit of the 'computer of this universe', and you are right, Soul, Mind, Consciousness and life are SYNONYMS, represented by beam of electron in all living.***

*Only our Soul is ten dimensional, it has two energy centres as its two foci for beam of orbiting electrons in elliptical orbits**, one is common **positive energy centre,** i.e. the centre produced by **increasing contraction of local space matrix**, With the **conversion of local 'bound treos' into kinetons**, and other centre is a common **negative energy centre,** which is produced by **increasingly dilatation of voids,** along with **dilatation of local space matrix.** Both these centres are necessary and acts as **two foci of Soul**.*

FOOT NOTE

*Freeman Dyson writes; in his book "Disturbing the universe", 1979. **'Process of human consciousness differs only in degree, but not in kind, from the process of choices (chance) made by electron**.'

These two centres of soul are joint two foci of combined all elliptical orbits of all electrons circulating (in two cortexes of our brain) in all living beings. These two opposite energy centres remain separated throughout lifetime of a creature.

*Meanwhile some of these orbiting electrons in elliptical orbits, around these two centres (soul) follow too (sensory) and fro (motor) complicated paths (orbits) to form the **nervous system (as extended consciousness)** of all living being, distributed in body according to its individual shape and size.*

*The electrical impulses move as moving electrons at 2200 Km per second (speed of light multiplied with value of fine structure constant i.e., 1/137) and carry information via sensory nerves up to the brain, which responds accordingly and produces a reaction, again the signals which are transmitted as electrical impulses of moving electrons in motor nerves. All neurons, which constitute the nervous system of organism, mainly decides the direction of electron motion at **neural junctions** for constant flow of electrons in body.*

But the matrix ***even knows about your every thought*** which gets attached with your consciousness/ soul, as thoughts are nothing but deformations (wrinkles or knot formation in one dimension) in omnipresent net of matrix *produced by moving electrons which emit photon packets in the neurons of our brain*.

All five quantum levels of consciousness are associated with the increasing number of electrons*. Similar to the bit of computer the Electrons are bits of soul.*

Five levels of consciousness

(1) 'Kan Chetna' in Atoms of all elements. (1 to 120)

(2) 'Jad Chetana' in all plants.

(3) 'Pashu Chetna' in all animals.

(4) 'Jan Chetna' in all human. (86 billion electrons)

(5) 'Bliss' attachment with detachment, happy state.

She said, let me explain more about elliptical orbits of beam of soul.

****Positive energy centre-*** *The progressive contraction towards positive energy centre is responsible for all* ***male behaviour*** *and master's in male gender of all species.*

Negative energy centre- *The progressive relaxation towards negative energy centre is responsible for all female characteristics and* ***female behaviour*** *and master's in female gender of all species.*

Figure 1 – Unequal ratio of Yang and Yin fields in common orbit of beam of soul decides the gender of this soul.

Have you noted that, what is the difference in living being and a dead body?

To be absolutely confirm about the death of a living being, we take Electro Encephalographs or hear the voice of 'brainstorms' in which we map the electrical conductions going on in brain. All sensations of body as actions, are relayed to brain by sensory nerves, which accordingly act by sending electrical impulses in motor nerves to produce reaction. Thus, the electrical conduction in brain and flow of electric current (or flow of Electrons) in the nervous system, is the basic finding in all living beings. These electrical conductions are absent in a dead body.

It is to be noted, that only **quantum entangled neurons on both sides** by **orbiting electrons** in your 'cerebral cortex' interact with each other which are responsible for your consciousness (**soul or life or mind)**, while neurons of your 'Cerebellum' are only responsible to keep working of your Heart and Lungs and basic instincts. And thus, after stoppage of working of 'cerebral cortex' you declare a person BRAIN DEAD, while cerebellum

was still working and kept your heart and lungs working (recorded history is of 56 years working of heart while brain was dead, and body was kept in an iron lung machine).

These elliptical orbits or ellipses have **two foci** out of which one is **kinetic energy centre** and by moving towards this centre in the elliptical orbit the *electron gains speed*, and **other is 'potential energy centre' or vacant foci** and moving towards this centre the electron *loses its speed*[1].

FOOT NOTE

[1]**As Electrons, Planets are also orbiting in elliptical orbits** in ellipse and gains its speed while moving towards Sun i.e., **kinetic energy centre** (*with maximum Kinetic energy and most contracted matrix in four dimensions of space-time which thus forms its gravitational sphere of 3 km diameter around gravitational centre of sun,* while planet slowdown in its orbital speed while performing its orbital motion and moving towards **vacant foci** (maximum potential energy at centre, produced due to dilated matrix). It was described by Kepler in 1609, as second '**Law of areas**' (Line segment joining a planet and the Sun sweeps out **equal areas during equal interval of times**).

DEATH. *The* ***inhalation (of two opposite energy centres) which jerk free 'beam of sole'****, results in the death of an organism with the stoppage of all orbiting electrons around two foci, and in turn flow of all electrons in the brain and in nervous system of organism also stops.*

Can you answer me, why we or all creature' sleeps, or what is sleep?

She replied ***during sleep your bodies and your soul rearranges itself*** (instinct is same as in between two vibrations the universe changes and rearranges itself) and thus **soul could sharpen to its PREVIOUS LIFE MEMORY** i.e., DEFORMATIONS CARRIED WITH ITSELF.

In this time body repairs, the abnormal and ever forming cancer cells are destroyed, you fight with your elements/ illness, child grow fast and gains length. The consciousness or soul while re-arranging itself gets clear access by sharpened/clearing to its past life memories, as deep piled deformations, which are responsible for memories (case is reported where soul remembered its past two lives), which then can be printed/ grasped by new brain of this life. Your every thought produces some deformation on your soul/ consciousness, which will be with it till infinite time.

"**CONSEVATION OF SOUL**" (thoughts/ consciousness) IS NO DIFFERENT FROM "**CONSEVATION OF MOMENTUM**"; in one case your thoughts are producing deformations which gets piled up in consciousness (/ Soul) indefinitely; while in other case the same deformation pushes the photon (after neutralizing its mass pressure on matrix by it) indefinitely; AS BOTH DEFORMATION OF MATRIX CAN NOT BE WIPED OUT AND ARE THUS CONSERVED.

FOOT NOTE

Grangi told, the **soul** is bunch of electrons responsible for your consciousness which also governs life or regulates the platform which is working as our mind. These electrons move in both hemisphere of cerebral cortex and to and fro in elliptical orbit around two foci on matrix ON WHICH BRAIN IS 3D PRINTED. But as such, they do not affect the sensations perceived or working of brain in cerebral cortex, spinal cord, or cerebellum.

Only **10 percent of brain works in our consciousness brain** when we are awake, while 90 percent of our brain remains as our subconscious brain. During sleep the plain of consciousness reduces and subconscious brain takes control.

That is why sometimes when we awake from sleep briefly in night some **idea flushes in our mind** worked upon by your subconscious brain in many

days. Thus, we get the answerers (replied by working of our 90 percent subconscious brain) to the problems or questions lingering in our mind from long. Some scientists even learn to train our brain for this type of working.

I almost shouted this “ME TOO LEARNED”.

The orbits of these bunch of electrons of our soul becomes *torturous* by our environment which is created by our thoughts (which itself are deformation of space matrix) in our relationships (that’s why we sometimes could not forget the persons who made an impression on our soul, leave alas on our mind) and it becomes more torturous sometimes *even with our daily working of brain*.

We need full energy of body and brain to be directed for this purpose to ***rearrange these orbits of beam of soul*** which could be done by bringing the level of our active consciousness to a lower level and stoppage of many functions of our body (e.g., working of sight) during our ***sleep***.

What is Rebirth

Undisputed PROOF OF REBIRTH, IS the MEMORIES OF PREVIOUS LIFE, which sometimes are TRANSMITTED ALONG WITH SOUL.

It is only during sleep for some times after birth some child can access to the faint memories (deformation of electron orbits) produced in its previous life i.e., as knots formed in our soul and carried with rebirth, *which makes impressions on our subconscious brain during sleep.*

It is anaesthesia during which the person become Unconscious and loses its sense of time, therefore to know about working of soul (consciousness) in brain, you should **compare brain mapping of person in these two states**.

I interrupted; transfer of memories of last birth also happens, as the patient comes out of deep sleep of anaesthesia e.g., one of my illiterate patients was reciting Sanskrit slokes fluently; *may be memorized during his previous life*.

Scientific studies of rebirth

In 2700 confirmed cases of rebirth studied (all investigated) in north India*. In, all cases **past life memories were retained from 2 to 6 years of Age.**

*Division of Personality Studies, university of Virginia (Stevenson et al, 1961-1974 and Cook et al 1983 and by many others)

All children recognized some person and narrated some events of past life, retained behavior pattern of past life (some rituals), Phobias, mark of fatal injuries as birth marks (e.g., Suresh electrical, Agra), even adopted name of previous birth (e.g., Bijrendra) and even remembered and then was married with same husband.

- **No gender changes.**
- **No case of birth from other species.**

But how information is transmitted?

While carrying the deformation of matrix of brain (thoughts and happenings) with it the soul, in next birth makes print on brain of few children, during their sleep when soul is resting.

Is the Soul the primary memory carrier?

- **Unequal ratio of Yang and Yin energy is maintained in rebirths, which maintains same gender of soul in rebirth**. Thus, in 2700 recorded and investigated cases of rebirth in north india, all soul developed their respective gender bodies, except in one case in which **female soul maintained her female behavior and likings, while trapped in a male body**.
- In contrast, I know a **female in Agra (with male soul)** she got surgically removed her breasts (as these were alien parts to her male soul) by my friend and opted for plastic surgery of her genitals.

IN SAME SEX MARRIAGES one person out of couple may have the soul of opposite gender.

Foot note

(!) My 66 years old friend Bijendra continued his name of his previous birth and named himself in his childhood. He used to say to his father up to the age of 3 years 'how can you forget me, and you don't recognise me, I am your uncle Bijendra.

(!!) Famous incidence of murder culprit Suresh (Suresh radio; Hing ki mandi) which has taken rebirth in Agra had birth mark at the point of bullet energy. The child said I am Suresh, and talked about his killer and his own underground activities in his last birth.

BLISS AND SALVATION (*moksha or kevyala*)

In highest level of (soul) consciousness is BLISS (in this state the human always remains in ***eternal joy full state***). Rishi takes their bodies in state of deep samadhi, and we do daily meditation to help our soul to move **towards this state of BLISS**.

The 'electrons bunch of the soul' of this human is so **unentangled and free of all knots** (which are generally produced by the deformations in electron orbits *by our emotions, ego, cruelty, on being insensitive and disrespectful towards HIS creation OR our environment, extreme love to our possessions or with our relative or friend, by our lies, and myths etc.*) that after its death **all electrons orbits of its BEAM OF SOUL will merge with fabric of MATRIX (God), and will lose its identity and individuality to attain Salvation** (described as MOKSH in Vedas).

The soul can get MOKSH immediately after the death or even sometimes later after it is enlightened knots get opened, by the fulfilment of its remaining desires.

After salvation (Moksh) the deformation of soul on space matrix which otherwise was being conserved "conservation of soul" will vanish i.e., **will**

become part of matrix (our working god) and thus this (though immortal soul) will no longer need any rebirth.

Quantum Jump of Soul to "other quantum level'

(!)Can soul pass to higher levels of consciousness.

Soul can exist at 6 quantum levels, 5 as described above and sixth is free in space after death, even for few years.

Yes, human soul can pass to state of BLISS. You can nurture your soul and can accumulate further electrons to your soul with peace of mind, with happiness and love to nature and its creatures; which can lead to soul, to the level of bliss; or you can even move up to level of INCARNATION when or then, you master the working of matrix and will strengthen your beam of soul to some extent, **so that you can see others past or future.**

It can also be done by someone who wants to repay you by **donating a part of soul to you** and then willing to live next life at lower Quantum level i.e., as reptile for some time. (I know one example; it was out of extreme love and to repay to the love of her husband to which she could not recognise in her marriage.)

Soul can gain or loss electron after death also, and if soul is not gone to salvation immediately after death, some time a clear soul can even have late salvation (once been accomplished by someone, to all its unfulfilled desires).

(!!) Can soul pass to lower levels of consciousness.

Yes, we can become animals and insects in rebirth. (I know one example; it was out of extrema ego).

(A) Quantum level of soul is decided only with difference of number of electrons in its beam. Soul can pass to lower quantum levels (of animal soul), **if beam of soul is very much entangled with some part of your brain**, **and some electrons from beam of departed soul could not be freed to leave this part of brain. Let it be ego, fear, affection, love, money or sex.**

(B) Other method is **if you donate your most of beam** to someone after your death, to which you owe it, or to whom you want to bless, or to control its mind. But then after donating most of electrons to your soul beam (if permanently) the donating sole will pass to lower quantum level as soul of animal, and can take rebirth only as animal.

I asked one more specific question,

<u>is our universe Conscious?</u>

She replied, it is even a hot topic among scientists on my planet.

I BOOSTED and interrupted the conversation with my little knowledge; the saying that 'Electrons has a bit of mind' also means in other words that electrons are bits (units) of all consciousness. The quantum computers being developed on earth uses electrons for its working by reading anti-clock cycles (of Electrons) as 1 (one) and clockwise cycles (of positron) as 0 (zero).

Dirac postulated that 'universe is a pool of electrons' which are everywhere. For comparison if we compare the working of our mind and of universe with

a computer, our brain can do 10^{16} computations per second while universe can do 10^{106} computations per second.

She answered after my talking,

OK, even with your all knowledge and me cannot answer this question for sure that universe is conscious of not, but when you will be supplied with the knowledge of complete working of universe (and its employed laws) you will appreciate about some of its behaviours which can turn the balance towards 'conscious universe'.

Every action in universe has some hidden PURPOSE behind it, and ***whole universe works as one unit*** to fulfil this purpose and nothing in universe happens without a purpose.

Day 2, **Who I am**? And **Where Am I**?

Overwhelmed by the previous discussions, question suddenly flashed to my mind, and I asked Alien. Human race, have an eternal quest in the form of two unanswered questions. As soon as we are born and opens our eyes, i.e. we start searching '**where I am'**? and '**who I am'**?

Once free from our ongoing daily war [of 'roti (bread to eat), kapda (cloths to wear) or makan (house to live)], in which we consume our whole lifetime, then sometimes we scratch our head and even approaches every mythological person, self-named 'gods', to get the answers to these questions, but in the end we all die unsatisfied.

One time NACHIKETA* requested YAM RAJ**, the GOD of death, to answer these questions, as it is mentioned in Hindu mythological book "Katha Upanishad".

Foot note

*NACHKETA is a character and **YAM RAJ is the god of death, a story from Katha Upanishad, 5th century AD.

To be more specific, I asked her, could she answer me, my following questions?

(1) Who we are?

She replied, our body (all protein, carbohydrates, and fat) is made up of atoms of different elements. While all atoms of all elements are made up of Neutron (and its counterpart Proton, after its beta decay), which remains quantum entangled with an accompanying orbiting Electron (only the **number of these electrons and Protons as a pair increases** one by one to carve out all different 120 known elements which are arranged in periodic table).

Thus, according to the difference in the number and position of Protons (and Neutrons) and Electrons, all elements with its unique and different atomic number (nuclear charge number or number of protons at nucleus) adopt different pattern for deformation of space matrix[1] of different size and shape.

And due to this **difference in size, shape and density (contraction) of the deformed area of space matrix involved,** these elements and thus formed molecules exhibits their different physical and chemical properties[1].

To support my statement, I will go to our conventional knowledge; **It is already known that only the 'outermost orbit of valance electrons in its atom is responsible for all chemical and physical properties of this element.'**

Have you seen a school of piranhas (fish), or thousands of birds flying in a group close to each other in water or in sky? Similarly, our body is only Nucleons spread on **its respective wave lengths** in various pattern shapes and in different numbers, along with associated deformation of space filled by orbiting quantum entangled electrons, all bounded together by atomic and molecular forces and moves together as a human body (like any other physical object) on space matrix.

The Neutrons / protons and Electrons **are not point masses** but are packets of mass energy, placed at its respective quantum levels, which evenly **spreads along its wavelength** (in length reciprocal to its total mass) while circling in the wave, in twin two-dimensional (elliptical) whirlpool like deformations of Space matrix.

Increasing two-dimensional curvature (ellipses) of space matrix, constituted by their load supporting kinetic coloumns as shells of each elementary particle (Proton or Neutron), together forms its wave, which traps the electrons at different quantum levels of its 'atomic field quantum levels' and thus forms different atomic configurations to constitute atomic structures of all elements[1].

Elements form different molecules entangled by molecular forces, and serve as material for all type of body tissues in all living beings.

Alien said, I understand your concern, and you're right that without a basic understanding of the "working model of the universe" comprehending this operation fully would be challenging.

The insights which will be provided by me **should open your eyes to a whole new understanding of reality**, one that was previously unimaginable.

As you pass on this knowledge to the readers of your manuscript, you'll be offering them a glimpse into a universe far beyond our current comprehension, where seemingly impossible feats become reality through advanced technologies and an understanding of underlying cosmic principles.

(2) I asked her; What is difference in between you and me

Our bodies are made only to nurture our brains functioning, regulated with the power of soul, a part of matrix. In your body your heart pumps nutrients and oxygen to your brain to keep it working and brain in turn sent impulses to keep heart and lungs working and other organs are just to supply nutrients to brain and to excrete wastes. As sensory organs your eyes absorb only visible part of EM radiation and middle ears senses gravity and catches the vibrations in air as sound.

While, my body works somewhat like plants on earth. My body has stomata all over my two spheres, upper sphere mainly absorbs oxygen and water while lower one absorbs carbon di oxide and water. From supply of both spheres and sun rays as source of energy by photosynthesis I can produces all nutrients and upper sphere supplies oxygen for my big brain, situated inside all over in upper sphere. We do have soul and nervous system and

we catch all type of EM radiation and sound vibrations from all our covering. In place of your blood and blood vessels we have lymph filled chambers to supply nutrition. We shed our skin to remove toxins and wastes once every earth year. But we reproduce our babies just like you.

(3) <u>What is God</u>?

After listening to my most unexpected question, suddenly he pointed out towards my '*lap top computer, and asked can you first connect me to your cyber space*".

Though I have gone through it previously, but now I want to be specific and informed all new developments before giving you, to the point answers.

Now I became, quite surprised with her demand; but after deep thinking and after getting the assurance that after knowing the level of our little knowledge he will never be hostile to human race, along with this he will not damage our cyber space and he will keep this knowledge up to himself. And after being assured by his words, I nodded affirmatively.

He said to me *"Ok, I will extract the whole present knowledge of human race stored in your cyber space, and then it will be easier for me to reply this, or any other question of yours."*

I helped him to be connect with our 'cyber world' and later I found him totally occupied with his headphone on. An hour passed and then two and then suddenly she raised her neck and said *"yes, are you ready now"?* I said 'yes'.

She replied that you people talk a lot about God but has little or absolutely no understanding of God.

*You **generated God 'out of your fears'**; Fear of sufferings, Fear of ill ness, Fear of pain, Fear of Poverty, Fear of Darkness, all fears compelled yo34u to search for a hope or solace and we imagined this presence of some superpower as God which will help us. You go one step ahead and even try to bribe God (to these imaginary figures) by giving various offering and try to please your personal God by one or other prayer.*

*Yours's society lives in Myths. The Myth about GODS, Myth of religions, Myth of RELATIONS, and most important Myth about Happiness; you people assume and take it granted that happiness is not for you, you feel comfortable unhappy and assume that **it is normal, not to be happy,** happiness is taboo in your society. Can you tell me HOW YOU CAN CREATE HAPPINESS to become happy.*

In its answer, I immediately remembered and narrated alien a small incidence. In One cold evening, full of frost, when lights were fading one old man was selling the cookies in street, and when he passed in front of our house my wife observed him and asked our servant to stop him. She went to him and enquired from old man that why in such winter he is selling cookies walking in chappals without socks at this time in winter, when it is too cold?

He replied I am having only one daughter, and after death of my wife, she asked to transfer the house in her name and few months after transfer of house in her name, she kicked me out of house. So, I am living in a hut outside town. I used to purchase 50 cookies in morning and sells it in double price and when I sell all, I go back to my hut, and now it is only six remaining. My wife purchased all 6 cookies and inquired that if she gives him socks will he except it. He nodded happily and put the socks to cover his cold feet

instantly. Cookies was of no use to us, so she distributed it among neighbours' children.

*That night my wife was happy, and greatly satisfied this Nobel soul said to me "**it was best purchase of my life**; SHE WAS REALLY HAPPY WITH HER INCREASED SELF ESTEEM BY HELPING ONE".*

Alien said right, ***you only could become happy when you make others happy, it is secret of happiness.***

(4) She said, now first you define your God?

I replied, we find no description of God anywhere in literature except in **four ancient books of Vedas** (means Knowledge) which **belong to every human** being as they were composed long before the birth of any religion and it gave birth to Sanatan dharma or HINDUE SCIENCE OF LIVING.

SANATAN DHARM[1]

The Sanatan Dharm (Oldest living religion also called HINDU RELIGION) is 'Eternal religion' or 'Ancient law', which is based on Vedas (The Knowledge).

It is followed in Aryan Religion, (Arya means noble) followed in norther India ARYA VRAT (This is land between two eastern and western sea and Two Mountains of Himalaya and Vindhyachal).

ITS FOUNDATION is SHRUTIH "**That which has been heard**" (*but from whom?*) and its WALLS are made up of SMRITI '**That which has been remembered**'.

(A) **SHRUTIH** consists of **FOUR VEDAS**

RIGVEDAH

SAMVEDAH

YAGURVEDAH

ATHARVAVEDAH

Each Veda is divided in three or four parts

MANTRAH (collection) or **SAMHITA** (Chanted for Devas)

BRAHMANAM. (Rituals and performance of ceremonies)

UPANISHAT. (Philosophy on supreme and separated self, on men and universe on bondage and liberation)

TANTRAM (This fourth vanished part is UPAVEDAH; lost science).

(B) **SMRITI** or DHARM SHASTRA (laws to govern persons and society) are in its four Literatures.

(1) **MANUSMRITI** (Laws to govern Society)

It divides the period in 7 Manu and tells that we are living in 4 th Manvantaras.

(2) **YAGNAVALKYA** smriti (how to perform Yagna)

(3) **Shankha** likhita smriti (now lost literature)

(4) **Parashara** smriti (now lost literature)

Another two parts of HINDU religion are.

(!) PURANAM (historical stories)

(!!) ITIHASH (history)

(A) RAMAYAN (story of RAM)

(B) MAHABHARAT (Story of Kauravas and Pandav, great war and GITA)

Science- in Vedas is divided into 6 parts **Shadangani** *(Six angas or limbs) it includes* ***grammar, philosophy, astrology, poetry together with 64 sciences and arts.***

Philosophy- *is again divided into 6 parts* ***SHADDARSHNANI*** *or six darshan or six ways of seeing things or six systems.*

They all have one object: putting an end to pain by enabling the separated Human selves to reunite Supreme self by one method of **GYANAM** or knowledge.

Nyaya—all things are to be studied by six senses or by inference and analogy or by testimony of others.

How God made All material world made up of Atoms and molecules and how the most useful knowledge of God who is also innermost sprit of man can be obtained in different ways.

Shankya- (Purushah or Sprit and **Prakritih** or matter**)**
Yoga- Yoga is a group of Physical, mental and spiritual practices or disciplines to control and still mind.

Mimansha- (what is ***Karm or duty*****)**

Vedanta- Study of true nature of *God* and *Atma* (Soul) or *Jiva* is essence of same as this innermost god.

man can live as karma does not bind him and understanding what Maya Shakti is of God and how to merge with supreme **Moksha.**

Only Vedas truly describe GOD.

(1) ***Yajurveda 16/1:*** **ANANTKOTEBRAHMADNAYAKAY NAMAH.**

Which means; I Worship (Namah) God as master (nayakay) of infinite (anantkote) universes (Brahmanda).

Thus, Vedas advocates Multiverse.

(2) ***Yajurveda 40/8:***

Describes God as omnipresent, omnipotent, with no shape or match, indivisible, creating time and its end, penetrating everywhere, creating everything, destroying everything, never born nor dye, with purposeful actions, knowing your thoughts, reacting to every action, acting on principles, and cannot be confiscated.

The alien girl replied, ok if you find all these qualities of your god in something known to me will you level it your god?

I replied Yes, why not and then my search of God will be completed.

Alien said first I will briefly comment on various **religions** which all originated after Vedas (compiled in 6000 BC) * about 8023 years back, remembered by heart and recited from generations after generation but only written in about 1500 BC.

*According to Tilak

Ram was born on 10 th January 5114 BC. In ancient Egypt (From 3100 BC onwards) in **Egyptian culture, Sun god** and many deities symbolizing almost all things in sight **which created fear** in layman's mind e.g., crocodile, snack etc. were worshiped and the kings were considered and was projected as living gods and some Pharoh used even RAM in their names. **Judaism** is even older and goes back to bronze age (2000 BC) which later **gave birth to both, Christianity, and Islamic religion.**

All the religions based on life of one or other legendary personality gave one or other book teaching ideal ways of living based on their exemplary life.

In oldest religion Hinduism, Ram 10th jan. 5114 BC (Ramayana) and Krishna was born on 19 th July 3228 BC, who lived 125 years 8 months and 7 days (reference books are Geeta and Mahabharat). Judaism 2000 BC (Tanakh

or Old Testament, Talmud and Midrash), Zarathustra (1500 BC) and Gautam Buddha, founder of Buddhism, was born much later on 8th April 623 BC (Triptika), Confucius (551-479 B.C.E.) started Confucianism 510 BC (Master, along with Mencius and xunzi), and laozi in 4th century B.C.E. started Taoism (Lao-tzu). The Ishu was born on 0 BC (bible), Mohammad 570 A D (Kuran), Guru Nanak 1469 AD (Granth sahib).

All religions teach art of living in a peaceful manner except Islam which promotes its expansion by any means. Prevalent in every religion some powerful person (king or priest) used this ***fear*** as a tool to befool masses and created different images of God in front of ignorant masses.

Vedas (means knowledge; or Vedic science) were also adulterated and could not be left out from this evil of mythology and the names used in different descriptions of creation or used to describe modern atomic structure (RIG VEDA; first chapter, 164 Sukta, by 52 Slokas)[1], were copied with cooked stories to carve out figures of different god out of it with some of its basic characteristics preserved.

[1] Book by Pandit Khem Chandra Sharma, 2007, "VEDIC PARTICLE PHYSICS (BEYOND QUARKS)" 'The complete atomic structure having sprit in itself', ISBN 978-81-7525-834-1.

(5) WHERE IS GOD

Somebody out of you rightly said, to know about universe, '***Don't glaze at stars but see in between***'. Our space is not empty i.e., it is not at all "nothingness", but it is a non- zero energy field. Some persons (**atheist**) can deny existence of God, but nobody could deny **the supernatural power which governs everything**. Eyes only see what the brain knows. To

get the answer we will have to go to the basis of every phenomenon ***from where the laws of nature, come from'***.

Your human civilization matured in many domains to which you can proudly announce, but you must admit that you could not peep into **Basic of all basics**, by which you could have demonstrate that it is directly being regulated by God and these are hands or 'Tool of our god'. We will observe in following paragraphs, that how God regulates creation step by step with only one tool in hand.

When we talk about God, we consider it as a supernatural power which governs everything. It is invisible, omnipresent, and omnipotent, knows everything, reacts to every action, which is **G**enerator **O**perator **D**estructor of this universe. It moves the Sun and Planets, gives life to every living being and takes it back; it not only knows our actions but everything in our mind and even knows about our thoughts.

Is this allusive supernatural power can fit in any description, if yes then we should label it as God?

I replied in very strong words; **yes, we should**.

So, we will explore this God in nothingness of universe which is generator, operator, and destructor of everything. She continued her speaking; the Script of creation has been written in 'Cosmic language'. Although alphabets of this language were discovered, way back in the year 1900 by Mr. Planck as Planck's units or God's units but the language has not been deciphered till now. The Alphabets are universal units and will never change. We use same units with different names at our planet. But, Mr.

Planck although gave its values but himself he could not identify what these units denotes?

Cosmic code; is decided by rhythm of vibrations of universe which is Planck's frequency, which controls the working of universe. HE has written everything in cosmic language using this code everywhere very neatly, precisely, and meticulously.

Newton, Galileo, and yours all other early scientists believed that by exposing the pattern woven into the processes of nature, **they truly were glimpsing the mind of God**, and their elegant mathematical form as a manifestation of God's rational plan for universe.

But we will first study the characteristics of this SPACE MATRIX (SPACE- TIME-ENERGY), called as 'Asad Brahma' in VEDA and now being called as HIGGS fields).

(6) CREATION ACCORDING TO VEDAS

(1) The 'Nasadiya sukta' (***hymn of creation***) of the Rigveda, (129 hymn of the 10 th mandala), describes **SAD BRAHMA** (the **Primodial soup**) formed **ASAD BRAHMA** (and thus formed omnipresent net of regulatory energy of universe SPACE MATRIX), which divides to produces **KSHIR SAGAR** (ultra-massive black hole) and its centre is named as **VISHNU** (gravitational centre) , supported by **thousands of ISHANI** (kinetic coloumns), was converted to mythological serpent SESHNAG (gravitational spheres made up of 'unit black holes' in its each layer to support this 'ultra massive black hole') with 1000 heads.

(2) **Voids** or five negative dimensional energy, *responsible for aging and ultimate death of universe and all creation* (with constant expansion of universe by its constant uncurling of all curled up voids) is rightly named as God of destruction, **SHIV**.

(3) '**Mass unit**' (**unit electron with matrix**, as 68 times deformed bound treos i.e., kinetons) is 'Ka particle' in Vedas named **INDRA** which in mythology is king of all **DEV** [all elementary particles formed as integral multiple of these mass units (35.01 Mev), thus all nucleons and all elements are named as different ***devas*** in rig Ved], while **Unit Electron** or building block (brick) of all visible matter is named as **GANESH** in Veda.

(4) How could ancient Hindu scholars (which were called RISHI or priests and MUNI or scholars) could knew about all six Quarks in 3500 BC and named them as **SAT -VRNDARAKAHA (SIX- Quarks) in Vedas, and also new about 3 Mesons as TRI-VATRAMA.**

(5) Actually, Vedas describes same creation (from **big to small**) by division and redivision of ASAD BRAHMA (name of Vedic space Matrix) while Treo model (describes creation from **small to big**).

(6) The Rig Veda, describes the modern atomic structure in 52 slokas of 164 Sukta in Pratham Adhyayan {Ref}. In the *description of atomic structure*, the seven 'atomic quantum energy levels' were called as **SEVEN LOKS**, while the adjacent 'counter deformations of atomic energy quantum levels' are **SEVEN PATAL LOKS**.

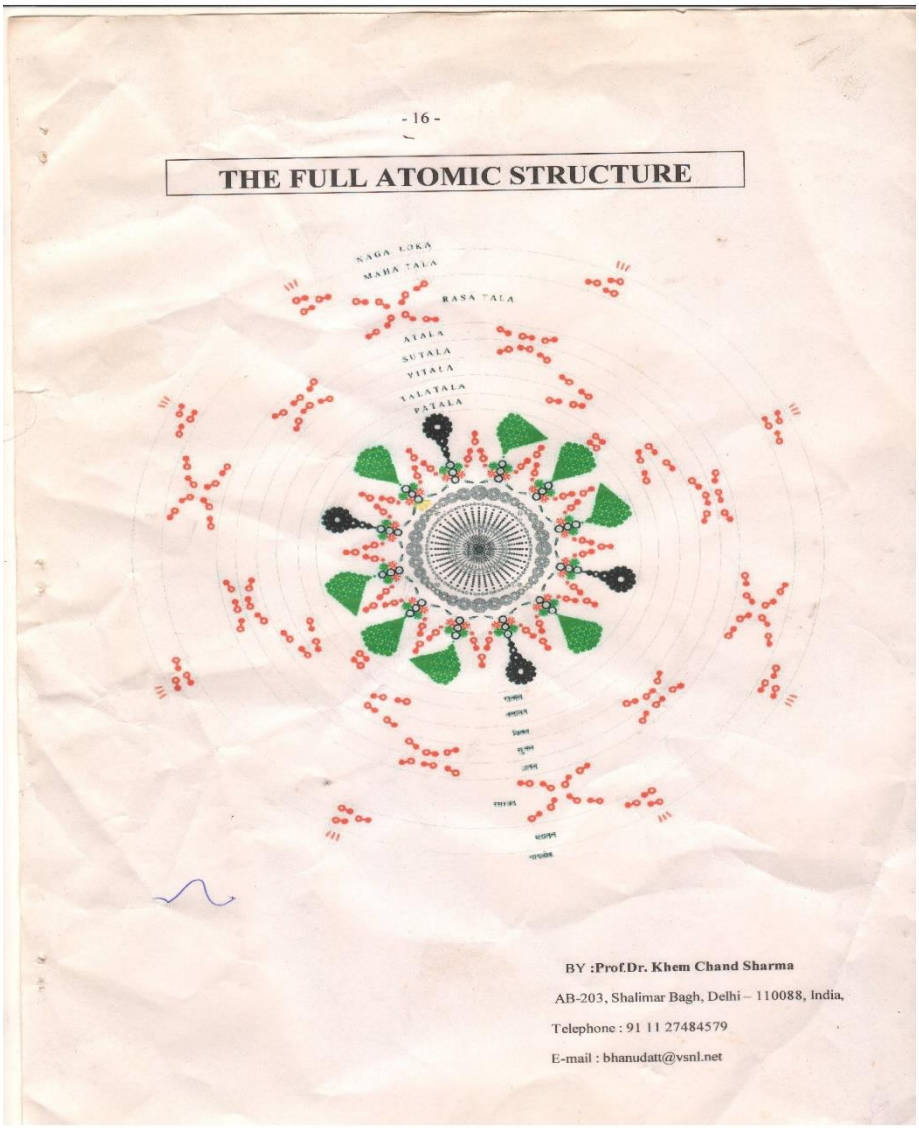

Figure 2

SEVEN LOKS are outermost 7 QUENTUM LEVEL ATOMIC ORBITS; and **SEVEN PATAL LOK 7** COUNTER QUENTUM LEVEL ATOMIC ORBITS; IN F SUB SHELL of atomic structure.

(7) While **RUDRA** symbolizes the rotating 'black holes' that revolves, it engulfs stars and matter to churn it. (to flatten matrix and get rid of all *wrinkles* on space matrix, which were initially supporting this matter by kinetic coloumns).

Though, the terms used in description of creation in Vedas were imbued with different meanings, with the addition of various stories, but the fundamental characteristics remained intact.

(7) Will GOD DIE

I asked him can God be destroyed.

Alien replied. Yes and no, both are correct. Treos (or strings; the one object of creation) cannot be destroyed but the formation or Matrix is repeatedly destroyed. Which means it takes birth and dies after its one lifetime of S number of seconds (or half swing of our 'pendulum quantum universe').

(8) WORKING OF OUR WORKING GOD

i.e., SPACE-MATRICS.

I demanded, then tell me about this Matrix and how it fits in our definition of God?

And then, describe all properties of space matrix (or working of our God) to me, to give answer of my eternal question WHERE I AM?

Alien again said, then be prepared to know your real God. You may say it ***God****, to the same entity to which we aliens know by the name* ***MATRIX****.* I think, that by the question 'Where I am' you want to know the 'structure and functioning of our matrix constituting our universe'.

I simply said ‘yes’.

Our working God

Omnipresent space matrix is chromodynamic energy responsible for working of universe; can be labelled as GOD. Scientists of Middle Ages done all researched as doing HIS WORK, done it as worship to know about HIM; they were true in many senses.

But very little progress in this direction HUMANITY could do till now.

Newton observed few properties of space matrix;

(!) ‘EVERY ACTION HAS EQUAL AND OPPOSITE REACTION’; and thus, **he just pointed out at ACTION-REACTION Mechanism of matrix**.

(!!) “If a body is moving it will go on moving till a retardation force is applied”; he unearthed it’s one more characteristic **propulsion by medium.**

(!!!) He, seemingly talked about GRAVITATION and gave correct value of GRAVITATIONAL CONSTANT, but **he could not tell HOW or WHY** this force of gravity is produced.

I WILL DESCRIBE FOR YOU how **ACTION REACTION MECHANISM is performed by matrix IN DETAIL** (*when you hit a ball on wall, who sends it back to you*); AND WILL **recalculate the VALUE OF GRAVITATIONAL CONSTANT** As GIVEN BY NEWTON, which infect ONLY TELL YOU AREA OF SPACE MATRIX REQUIRED TO SUPPORT ONE KG MASS.

Einstein could add one more dimension of TIME with three dimensions of SPACE to which your senses could perceive; but even he could not visualize one FIFTH DIMENSION OF ENERGY.

Thus, though he rightly said that gravitation is produced by deformation of omnipresent SPACE and described the curvature of this deformation of Space in his general theory; but he was still **far away from WHY and with true mechanism of Gravitation.** (contraction of space; or formation of knots in matrix) I WILL DESCRIBE FOR YOU **THE QUANTUM GRAVITATION.**

While **Peter Higgs** revealed, **CONCEPT OF OMNIPRESENT MATRIX** in 1964, but you too independently describe it in 2005 in your book "inside a wave". He rightly said that bodies get mass by **HIGGS MECHANISM** (suggesting that some part of matrix is dragged away by particle, while photon floats freely), but DESCRIPTION OF MECHANISM, ITS PURPOSE, AND QUANTITY DECIDING FACTOR, remained far away from his vision.

You are baffled by working of Quantum world, infect it is not mysterious but MIS -UNDERSTTOD. The explanation of 'wave particle duality' will solve Mistry of Quantum tunnelling and Double slit experiment.

I can't say that he presented GOD's particle, as MASS UNIT I WILL DESCRIBE FOR YOU along with **FORMATION OF MASS UNITS and thus formation of all visible matter.**

You could know about **ACCELERATING EXPANSION OF UNIVERSE**, and **hypothesized BIG BANG**, without any knowledge **WHAT PRECCEDED OR RESULTED IN BIG BANG.**

Whatever you do research, you only try to unearth one or other property of this Space – matrix.

BUT **BASIC STRUCTURE AND WORKING OF OMNIPRESENT MATRIX** you could not hypothesize. I am not sure that your sleeping society is ready to digest this CONSOLIDATED KNOWLEDGE; WHICH WILL CAN GIVE NEW DIRECTION TO ALL NEW SCIENCE. I will tell you tomorrow.

Day 4, STRUCTURE OF UNIVERSE

(i.e., omnipresent SPACE MATRIX)

What was in alien papers, which I could not have been understood, by myself.

I asked Grangi what you have scrabbled on papers you had; I could not read it as it is written by you in your own language?

She said I am a physics professor at one teaching organisation in my city and pursuing my research on physics and astrophysics i.e., obviously a study of our omnipresent Space matrix.

I will give you 3 lectures in 3 consecutive days to explain everything what all you are searching from last 3 centuries and what you should know before you die; i.e., **I will let you see the face of our working God.** I recorder her each talk.

LECTURE 1; (BASICS OF MATRIX).

"If you reach a blind end on a street, it is better to turn around"

Have you ever thought, why your physics remined stand still since long especially from last century at your planet EARTH?

Your ignorance of one fifth dimension of universe, i.e., ENERGY and blunder of using arbitrary SI units to study universe, instead of known Planck's units; kept your physics long time stand still **with no progress in its basics**.

I became quite alert to listen; as she said I will have to **start from basics**. I could inference from your present knowledge in your cyber space that Human race could observe universe till now very much superficially and this race is very much resistant for any change, which is against principal of evolution by which we all formed and improved.

I think you people are *expert in complicating simple things*, "you try to observe universe with KILOGRAM (an arbitrary chunk of iridium metal kept in Paris - France) as **unit of weight**, and by METER (40000th division of meridian which passes over France) as **unit of length**, when you **already knew from 1900 AD about universal units**; of 'Planck mass' (as universal unit of MASS) and 'Planck least length' (universal unit of LENGTH) 'Planck least time' (universal unit of TIME).

Alien said, my great, great grandfather's friend, visited your planet Earth, 8000 years back and fiddled with many brains of Rishis during their prolonged meditation periods to impart knowledge, which was subsequently preserved as Vedas i.e. four knowledge books. Perhaps it is your turn now, I WILL NOT LEAVE YOUR HUMAN RACE DEPRIVED OF all new KNOWLEDGE; and appoint you as my spokesperson to show everybody "***Face of our working god***".

FOOT NOTE

1 Planck's least length lP = 1.616255×10^{-35}m

2 Planck's least time tP = 5.391247×10^{-44}s

3 Planck's Frequency 1/ PLANCK LEAST TIME.

4 Planck's mass mP = 2.176434×10^{-8}kg

Planck constant h = $6.62607015 \times 10^{-34}$ J Hz^{-1}

6 TREO or strings =1.616255×10^{-35}m (length.)

7 Voids = **5 negative dimensions** (no length, no breadth, no depth, absorbs energy and universally, simultaneously, constantly uncurling and thus calibrates passed time)

SPACE MATRIX (SPACE-TIME-ENERGY)

The one-dimensional **TREOs** (constitute *five positive dimensions* of the universe), they were initially compiled alternately with completely curled-up 'voids' (*five negative dimensions*), to construct omnipresent SPACE MATRIX (Space-Time-Energy) of universe.

The **voids** in between are necessary to give identity, shape, and place to vibrate for all Treo while they itself have **no length, no breadth, and no depth**. They **absorb energy** and converts it into **Dark energy** of the universe responsible for slow and simultaneous, identical uncurling of all voids after each vibration in 'Planck's least time' and thus universe expand constantly. This expansion of universe/ or voids **calibrates time passed**, and responsible for aging of universe and all its constituents and creatures, including us.

TREOs can be **divided in two class**, those bounds and arranged alternately with voids become '**BOUND TREOS**', while "**FREE TREOS**" which accumulates and condenses at each next quantum level to form PHOTONS and ALL ELEMENTARY PARTICLE packets.

The **bound TREOs** of all space matrices simultaneously and continuously, vibrate S times per second, (1.855×10^{43}, at Planck's frequency) each time after a gap of one Planck's Least time.

S number of vibrations per second of whole universe, simultaneously produces a resonance and qualifies **'S number' as another 'new dimension less universal constant'** or the "**KEY OF UNIVERSE**".

Our space is not empty but it is 10-dimensional omnipresent **Space-matrix**, to which you till now conceived as 4-dimensional **space-time**.

ONE OBJECT OF CREATION

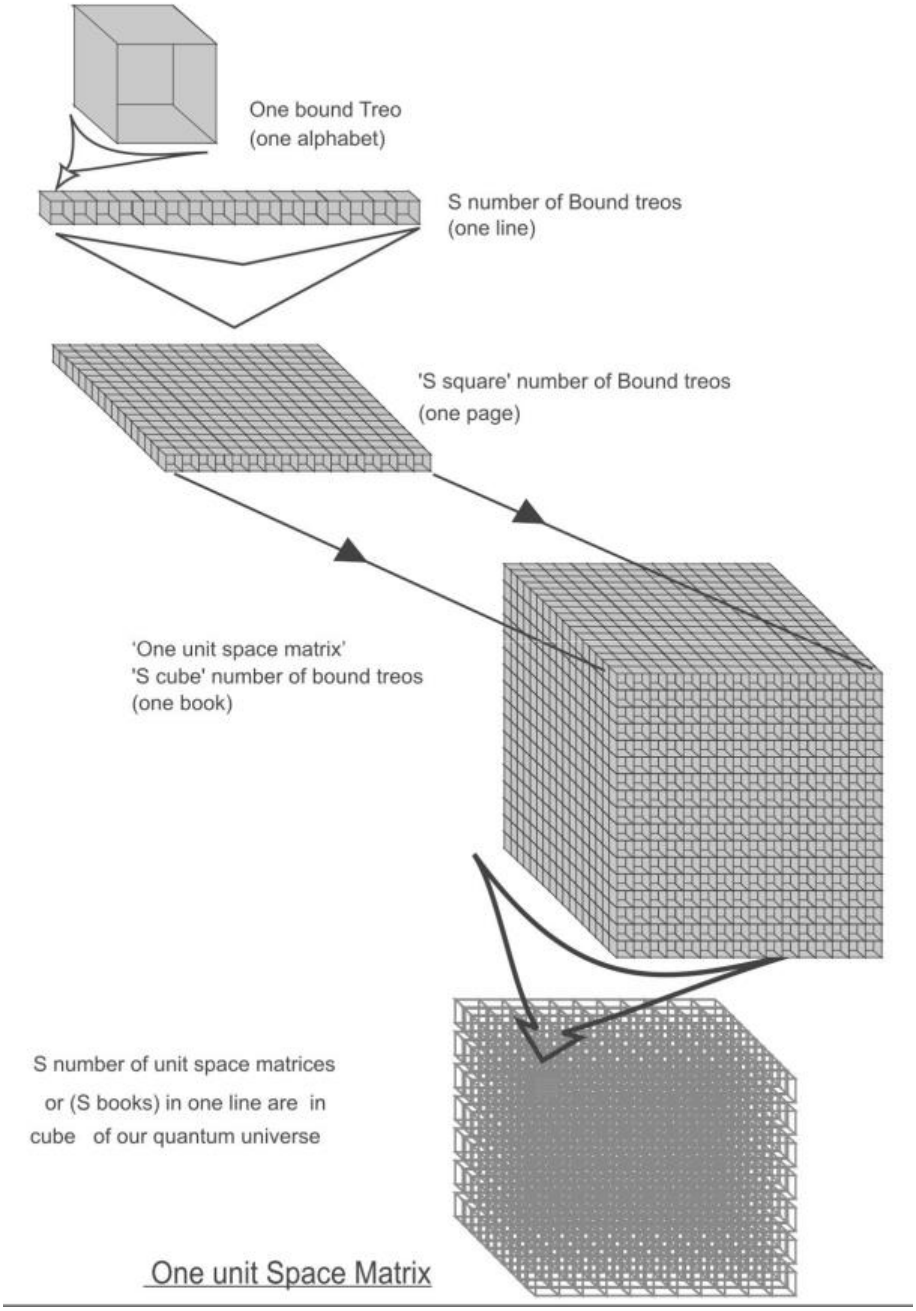
Universe is made up of ONE OBJECT – TREOS.

(1) **What is SPACE**

Visualize it, something as 'omnipresent mosquito net' everywhere woven with energy particles, with identical very small match sticks; **TREO** (or in the language of physics as *one-dimensional **strings** of Planck's least length*).

If you are asked to create 3 *dimensions* of SPACE only from small match sticks, you will put them in a *line* to create 'LENGTH', then putting them as *squares* you will create second dimension of 'BREADTH' and then for 'DEPTH' you will arrange them in *cubes, to finally **create three - dimensional space**.*

SPACE of our universe is an omnipresent matrix of Treos, and such multiples cubes forms its layers, one over other spanning everywhere.



One bound Treo
(one alphabet)
S number of Bound treos
(one line)
'S square' number of Bound treos
(one page)
'One unit space matrix'
'S cube' number of bound treos
(one book)
S number of unit space matrices
or (S books) in one line are in
cube of our quantum universe
One unit Space Matrix

Figure 3- Visualize universe as omnipresent net of bound Treos (Dark energy particles).

(2) What is TIME

This matrix is continuously vibrating, S times per second (at Planck's frequency; which decides **cosmic code**) and each bounded energy particle, as '**BOUND TREO',** vibrates in all possible S number of plains of a circle in one second,

and thus it will vibrate in all plains of 'such S circles which can be formed all around in sphere, to consume **its total allotted time** (its life span; or life of universe) **of S seconds.**

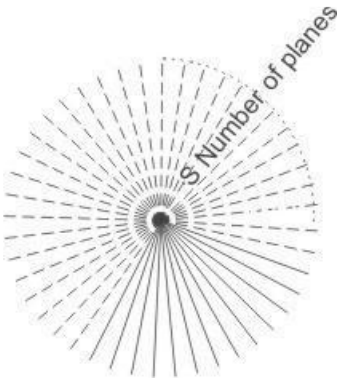


Figure 4

Each bound Treo is constantly vibrating in S planes of a circle in one second (which thus provide chromodynamic potential energy of matrix or **DARK ENERGY of all bound treos which constitutes 67% universe**).

THE CONSTANT CHANGE IS PRECEIVED, **"FLOW OF TIME"**.

After each vibration in 'Planck least time' the universe

re-adjusts itself and thus *continuously changes*, to which we perceive as '**flow of time**'.

SLOW DOWN OF TIME AND SLOW DOWN OF EVERYTHING

Every change (kinetic, chemical, biological, physiological) occurs and requires this 'least processing time 'or "least reaction time".

If any change will take more Time, it will slow down **the rate of change, by *reduction in number of vibrations*** *per second in locally contracted space.*

Foot note

We consider the difference of 'Satellite Time' and slowdown of "EARTH TIME" (due to increased gravitational kinetic energy at earth surface then at satellite) of 38 nano second per day, in doing calculations for our GPS system; otherwise we will enter in wrong lane.

(3) What is ENERGY

LOCAL POTENTIAL ENERGY of continuously vibrating bound Treos CONVERTS TO KINETIC ENERGY of KINETONS (**DARK MATTER; 26% Universe**) as local BOUND TREOS in contracted area of Matrix (which were previously vibrating in S plains per second) converts to kinetons, vibrating S times per second, only in the direction of load, to support it.

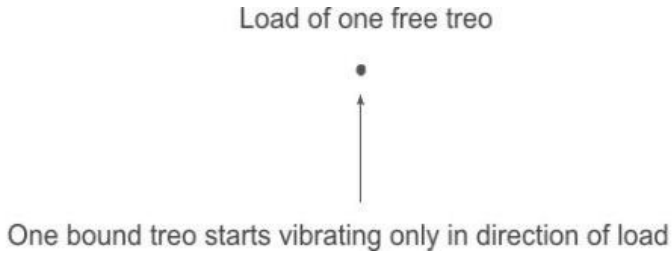

Figure 5

When a bound treo starts vibrating only in direction of load it converts in one kineton (**DARK MATTER of all Kinetons which constitutes 28% universe**).

Interrelation of three components of SPACE -TIME-ENERGY

LOAD DEPENDENT **INCREASING CONTRACTION OF MATRIX** FOLLOWS COLOUMN GEOMETRY, and involves one by one, increasing number of 3 dimensions OF SPACE, and then 4 TH dimension of TIME, while in this contracted area **TIME SLOWS DOWN** while POTENTIAL ENERGY OF MATRIX IS CONVERTED TO **KINETIC ENERGY**.

(4) VOIDS

Universe was born with no empty spaces or voids. Voids were five fully contracted negative dimensions i.e., **no length, no breadth, no depth, it absorbs each energy vibration to expand itself and thus also calibrates passed time**.

Since BIG BANG the voids are slowly and constantly '**uncurls by** 1/ S^2 of its present size i.e., or in just one direction out of total S^2 directions at each point. Thus, our universe is expanding at accelerating pace.

(5) ONE TOOL OF CREATION

ONE TOOL OF CREATION--- ACTION-REACTION MECHANISM.

ACTION *is produced by all type of loads* on matrix. REACTION *By contraction of matrix, kinetic energy* erupts to neutralize load, which thus convert a body in a weightless 'POINT MASS', is **only one tool used in whole creation**. *We will come to know, when we hit a Ball on the Wall how it is reflected back with same force to you.*

(6) ALL LOADS ON SPACE MATRIX

(OUR QUANTUM UNIVERSE)

FREE TREO (string particles, not bounded in matrix) can accumulate in integral multiple of 'S number of Free treos' or one quantum EM energy, present in 'unit photon' , to form all photons of EM spectrum: or integral multiples of one quanta MASS ENERGY are in all matter packets which **contributes 6% VISIBLE MATTER IN UNIVERSE.**

<u>One Quantum energy</u>; S Number of Treos, and its **value is denoted by 'Reduced Planck constant', while its angular momentum is "Planck's constant", which calibrates number of rotations of each quantum EM /mass energy in packet and thus equals the number of EM wave for photons or Orbitums for 'Mass energy packets' are formed**; please see calculations in APPENDIX B.

<u>√S QUANTUM LEVELS ARE IN EACH OF FIVE DIMENSIONS</u>.

At each quantum level (steps of staircase) mass energy accumulates which *starts from 'one quantum energy'* and, then **MAXIMUM of any one dimension becomes 'UNIT OF INCREAMENT for NEXT DIMENSION'**.

(1) The mass Energy increase by unit of **1 quantum** (as *unit of increment; in a <u>unit photon</u>*), at each of √S quantum levels in **first dimension**, Thus, produces all type of photon packets which **comprises total EM Spectrum.**

(2) Then, accumulating as **√S quanta energy** (*as unit of increment; in a <u>unit electron</u>*), up to one '**<u>UNIT MASS</u>**' (Planck's Mass; 2.173 x 10^{-8} Kg) at last √S quantum level in **second dimension.**

UNIT MASS is maximum load which can be supported at any 'one bound Treo' in universe by one graviton by its 'graviton coloumn' at its "unit gravitational centre"**.**

But as unit photon can unite with other unit photon and so on …, two electrons having same charge cannot unite with each other as such, and thus **MASS UNITS** are formed to create all visible matter i.e., packets of all elementary particles, nucleons, and thus elements of all atoms are formed as integral multiples of 'Mass unit'.

(3) Now, in **third dimension** starting from **S quanta energy** (*as unit of increment*; in a one-*unit mass*), to a '√S unit masses body' (one billion metric ton) is accumulated.

(4) Similarly, in **fourth dimension** starting from **√S unit masses** (*as unit of increment; √S unit masses*) all cosmic bodies forms, to a maximum of **S UNIT MASSES present IN 'UNIT BLACK HOLE' at last *√S* quantum level.**

(5) Finally, at √S quantum levels of **fifth dimension** it starts from **S unit masses** (*as unit of increment; 'one- unit black hole'*) and all galaxies (*our medium size 'milky way galaxy' have 20-unit black holes; or 42 billion sun masses, is at its galactic centre, and is placed at 20th quantum level of fifth dimension*), super massive black holes, and Ultra massive black hole, and maximum up to '√S unit black holes' (as named in Veda as KSHIR SAGAR) forms.

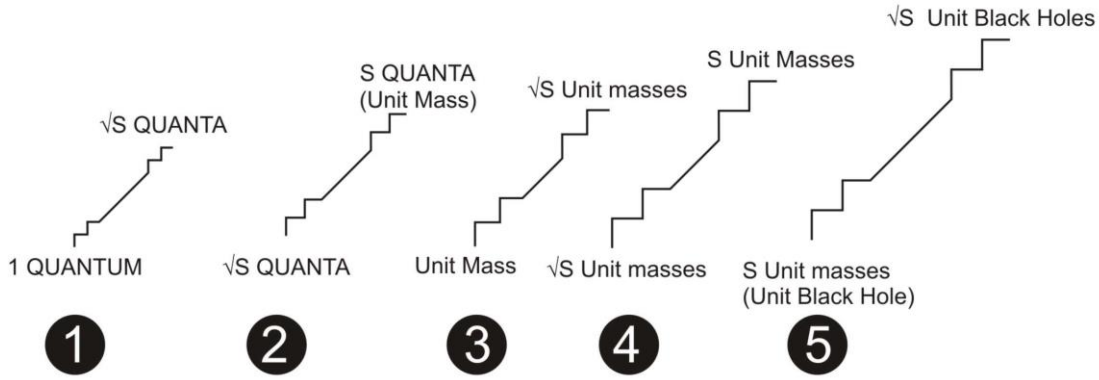

Figure 6:

√S Quantum levels are in each dimension. Maximum of any dimension becomes one unit of next dimension. It is visualized using LOG √S scale.

One quantum energy in one unit photon, start increasing **at √S Quantum levels** in first dimension to produce √S type of photons in EM spectrum.

Then in second dimension √S quanta in unit electron is unit of increment of second dimension;

S quanta in one unit mass is unit of increment of third;

√S unit masses is unit of increment in fourth;

and S unit masses (one-unit black hole) is unit of increment of fifth dimension.

Foot note

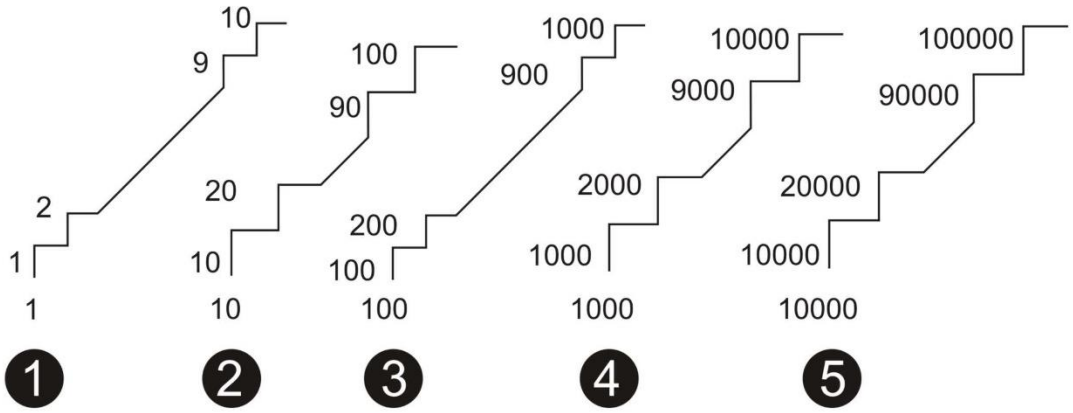

Figure7: As a Slimily, the pattern can be understood by LOG 10 scale for numbers.

(7) ONE MASS UNIT, 35.12 MeV

All visible matter is integral multiple of MASS UNITS. (Please see table at appendix B)

But in actual union of full unit electron packets, to form all known elementary particles and nucleons, **the question arises how all negatively charged unit electrons could be packed together in a packet?**

Layman answer is, all matter is made up of Electrons. Each **unit electron (one brick)** is associated with <u>68.5 times of its mass, as its cementing material</u> **(cement)** which comes from space matrix to form all matter (buildings).

So, we also have **68.5 times portion of our God (Matrix)** with us as this chromodynamic energy.

<u>Figure 8</u>

<u>We can understand it by slimily of bricks and its bounding cement material</u>-Electron as one <u>Brick</u> and Gluons as 68.5 times its <u>cementing material</u> forms 'one MASS UNIT'.

I will again say, that it means that we all have 68.5 times of 'chromodynamic energy' our driving force and all of us has one small portion of Space Matrix (God).

Can you imagine, in a bucket full of water even its one drop is not water. We are not only part of this water WE ARE the water or part of MATRIX i.e., our omnipresent god. **VEDA's say it as AHAM BRAHMASTH**.

Foot Note

Mass of electron of 0.51 MeV, when divided by Twice of FINE STRUCTURE CONSTANT, (2 x 1/ 137) **calculates one MASS UNIT of 35.012 MeV.**

Thus, fine structure constant decides the **amount** of space matrix as chromodynamic binding energy is required to glue electrons in each elementary particle.

You should observe that **Integral multiples of such MASS UNIT (35.012 MeV) to form all known elementary particles and nucleons.** (TABLE IN APPENDIX B)

e.g., Such 27 MASS UNITS forms one proton; 27 × 35.012 ≈ 938.27 MeV i.e., **Mass energy of Proton.**

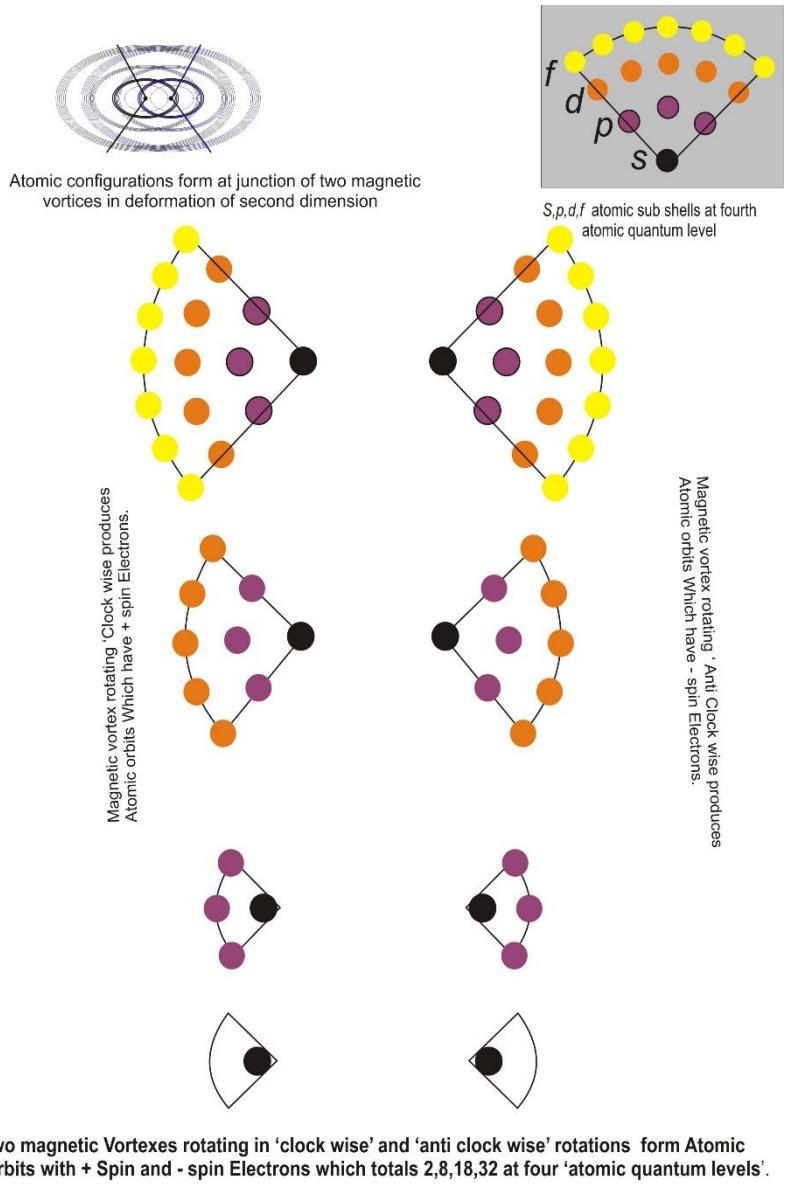
The unanswered question why Proton has all chromodynamic energy and very less mass energy is thus answered.

WITH OUT GOING IN DETAILS; This gives partial answer to one long standing unanswered question WHY PROTON HAS most of its mass as 99% QCD BINDING ENERGY. (While three quarks contribute 2 x (2.2 MeV) + (4.7 MeV) = 9.1 MeV; which is only 1% of proton mass.)

FORMATION OF ALL ELEMENTS OF PERIODIC TABLE

All 120 elements described in periodic table form by addition of a **pair of electrons of + spin and – Spin in each orbit** of *4 pair of shells at four quantum levels formed in deformation and counter deformation* of unit

space matrix. Thus, 2+2'; 8+8'; 18+18'; 32+32' quantum entangled electron are filled along with equal number of protons in atoms to form all elements described in periodic table.



Atomic configurations form at junction of two magnetic vortices in deformation of second dimension

Magnetic vortex rotating 'Clock wise produces Atomic orbits Which have + spin Electrons.
Magnetic vortex rotating ' Anti Clock wise produces Atomic orbits Which have - spin Electrons.
Two magnetic Vortexes rotating in 'clock wise' and 'anti clock wise' rotations form Atomic orbits with + Spin and - spin Electrons which totals 2,8,18,32 at four 'atomic quantum levels'.

Figure 9: All 120 elements described in periodic table form by filling of a **pair of electrons of + spin and – Spin in each pre-formed orbit,** in 4 pairs of shells which forms at four quantum levels in deformation and counter deformation of unit space matrix.

With the addition of each proton at nucleus, alternately one electron of + spin and one of – spin will fill up preformed vacant orbits, following set rules of Pauli's, Aufbau's and Hund's.

Foot Note

In formation of all elements, the **coloumn geometry in second dimension of orbits prevails**, as it forms **only four pairs of *shells*** *at four quantum levels in deformation and counter-deformation of space matrix.*

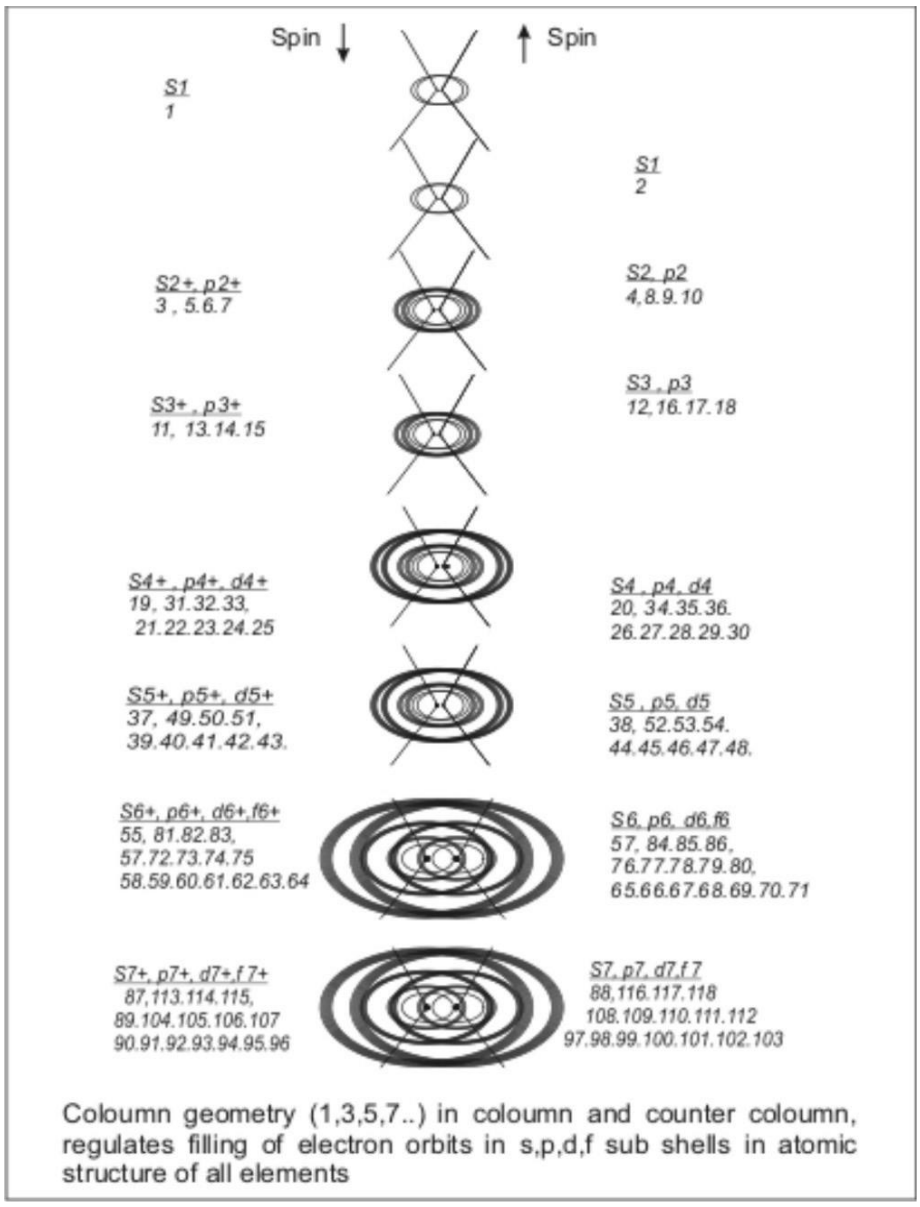

Figure 11:

At four quantum levels, the increasing number of *s (1), p (3), d (5), f (7)* orbits in sub shells are filled with both + and – Spin electrons, in all 4 pairs of mutually entangled shells which are formed in deformation and counter deformation of unit space matrix, to form all 120 elements.

(8) SUPPORT OF LOADS ON SPACE MATRIX

All the PHOTONS and Mass energy packets up to unit mass, **spreads on its wave** (WAVE LENGTH) and exerts load (respectively *free Treos*

square and *quanta square* of its quantum level in first and second dimensions) equally on **each 'apex bound treo'** in wave length.

Bodies of 'unit mass' to 'ultra massive black hole' exerts its loads in square of its unit masses, which gets supported at its gravitational centre.

ACTION – REACTION MECHANISM, is only one tool used in creation.

Thus formed, ALL 'MASS ENRERGY PACKETS' in one dimensional and in two-dimensional **Quantum world will 'Spread on its wave length** (= **S number of bound Treo length / number of quanta mass energy in packet**) and exerts its load in square, at each 'apex bound Treo' along its wave length.

Figure 12:

Figure show formation of EM wave; BUT SIMILARLY, **All EM energy photon packet/ mass energy packet/ and exerted load of cosmic body, will spread** at each 'apex bound treo' in wave length of its wave (EM, MATTER or gravitational wave), which will be supported by one **kinetic coloumn** of its respective dimension.

These load (in **'square number of its quantum level*, free Treos*'** in first, and "***square number quanta mass energy,* of its quantum level**", in second dimension) at each apex bound treo in wave length, is SUPPORTED by EQUAL NUMBER OF KINETONS or ORBITUMS, respectively arranged as 'sub-kinetic coloumn' or in sub shells of "shells", in first and second dimension and follows coloumn geometry.

BUT, in third and in fourth and fifth dimensions all loads are supported only <u>at *one gravitational centre*</u> of **SQUARE NUMBER OF UNIT MASSES IN BODY** by **SQUARE NUMBER OF GRAVITONS** (in gravitational sphere), and **thus all loads are supported on space matrix**.

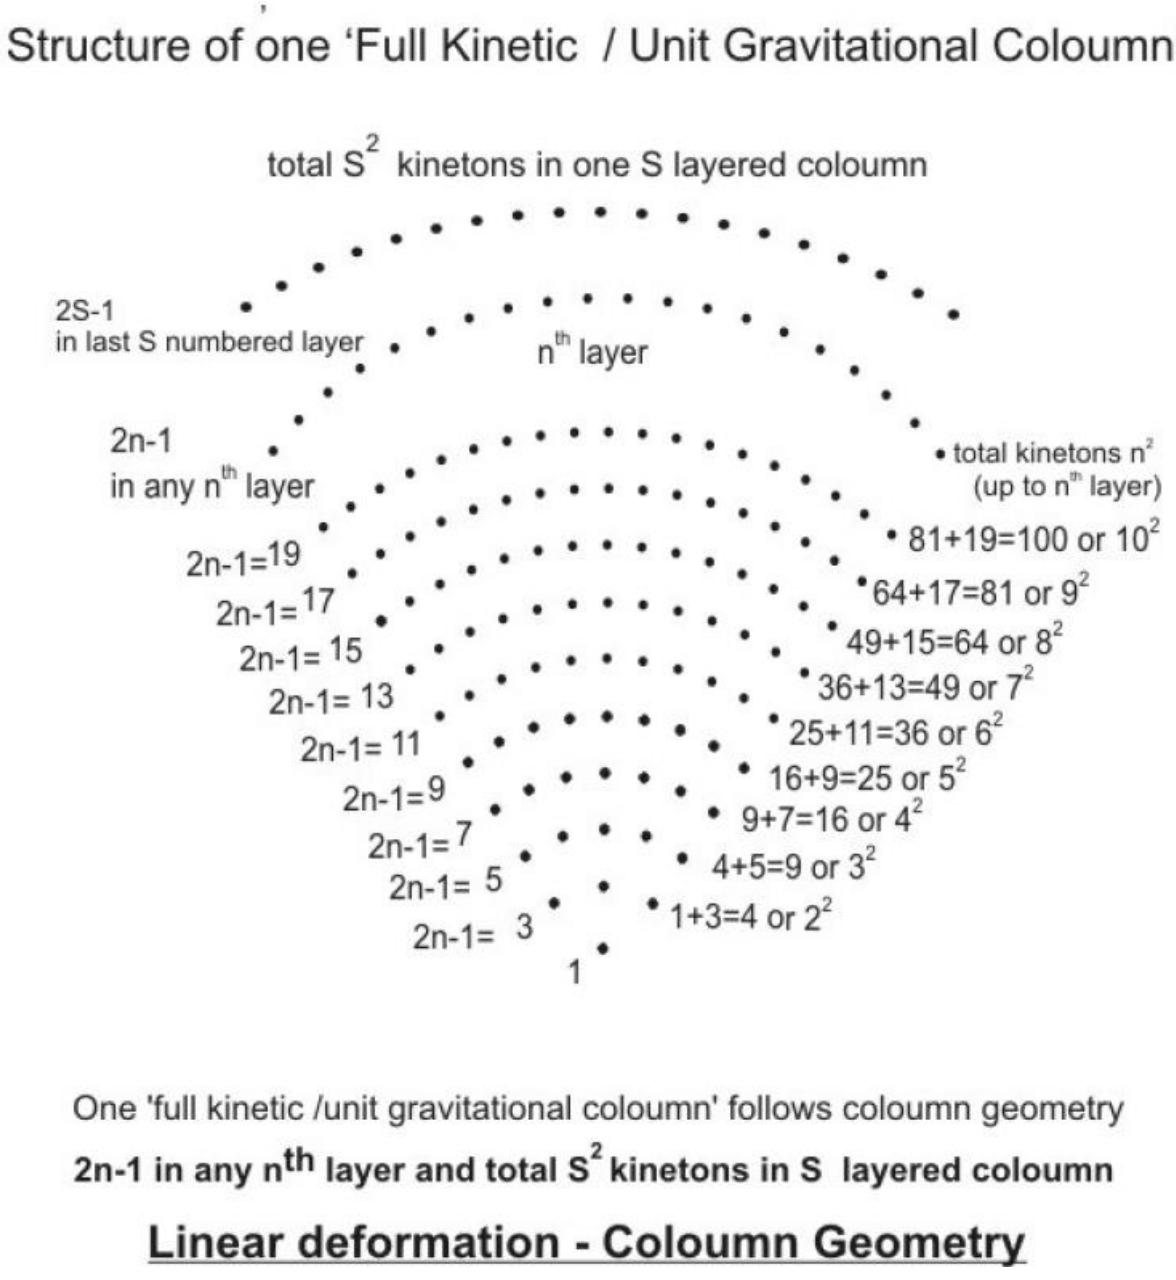

Figure 13:

(Coloumn geometry which is followed in each dimension **2n-1 Units in n th layer and n^2 in 'n layered kinetic coloumn'**); above is figure of one "sub kinetic coloumn" of first dimension.

(Thus, 1 dimensional, 2 dimensional, 3 dimensional and 4 dimensional kinetic coloumns are formed, which can be visualized as **1, 2, 3 and 4 KNOTS one over other in mosquito net)**

UNIVERSAL PRINCIPAL FOLLOWED IN ALL DIMENSIONS:

OF FORMATION OF SUPPORTING KINETIC COLOUMNS

TO SUPPORT THESE LOADS IN EACH DIMENSION, **one layer** in kinetic coloumn of respective dimension will increase at each quantum level, with **units** of respective dimension, according to proposed coloumn geometry (***2n-1 units in any one layer at n th quantum level and total n^2 units in any 'n layered kinetic coloumn'***).

These units in increasing number of dimensions are, **one kineton**, orbitum (**S kinetons**), Graviton (or **S^2 kinetons**), electron black hole (S gravitons or **S^3 kinetons**) and unit black hole (S^2 gravitons or **S^4 kinetons**).

The deformation of full unit space in third dimension (length, depth, and breadth) increasingly occurs with increase of **one unit mass** in body, as one unit, at each next quantum level and the 'load' at gravitational centre increases by '**square of unit masses**' up to a maximum 'LOAD of S unit masses' which is distributed on **S number of gravitons in one kinetic coloumn of third dimension i.e., 'electron black hole'.**

In the deformation of all four dimensions of SPACE-TIME, for multiple unit masses cosmic body and its load of '**square of unit masses**' **again**, is supported by the deformation of 'square number of **unit** space matrix' in 'multiple layered gravitational sphere' around centre (e.g. gravitational sphere of Earth of 10^{32} layers and in case of Sun it is of 10^{38} layers), up to a maximum number of S layers which can form to support a '**unit black hole',** itself made up of **S unit masses**.

To support the bigger **'LOADS' of galactic centre**, 'multiple unit black holes' are formed. One Black hole increases as one unit at each next quantum level and the load increases by **square *of unit masses in body***, *which is supported by multiple unit black holes.*

Our own 'milky way galaxy' has its gravitational centre supported by 20-unit black holes (42 million son masses). Ultra massive biggest black hole, made by accumulation of 'one-unit black hole mass' at each of √S quantum levels of fifth dimension.

Day 5 **LECTURE 2; <u>Cosmic code.</u>**

SAXENA'S NUMBER (S number; NEW DIMENSION LESS UNIVERSAL CONSTANT)

We should first Know the hidden pattern of creation "COSMIC CODE" which regulate hidden symmetry involved in creation, and what is this regulatory force which in turn regulates the pattern of universe?

(1) <u>Cosmic code</u>

*The **'resonance of vibrational rhythm of space- matrix', 'Cosmic rhythm'** S times per second, QUANTATIZES OUR UNIVERSE and gives us value of '**new dimension less constant'; S number',** which is **'COSMIC CODE'**.*

(a) PLANCK'S FREQUENCY- ALL Bound Treos in universe are vibrating at (1.855 x 10^{43} or ***S times per second and decides value of 'COSMIC CODE'***).

(b) THIS S NUMBER (NEW CONSTANT) DECIDES everything and in turn assign VALUE OF ALL UNIVERSAL CONSTANTS.

(c) UNIT SPACE- is **cube of S number of Treo on its one side**. **Which contracts first systematically to reacts any load.**

(d) UNIT TIME- **S vibrations of Treo or one second**.

(e) UNIT MASS- **S^2 Free Treos** are in **Planck's mass** (2.176 x 10^{-8} Kg)

(!) REDUCED PLANCK CONSTANT and PLANCK CONSTANT

S number of Treos, is VALUE OF '**REDUCED PLANCK CONSTANT'**; while its ANGULAR MOMENTUM CALCULATES[1] the VALUE OF **'PLANCK CONSTANT'*** and integral multiples of its value; calibrates number of rotations equal to number of quanta mass energy in packet; also ***equals to number of EM Waves or Equal number of orbitums*** *which form in its matter wave*; **Please see appendix b for calculations.*

S number of FREE TREOS is **one quantum (EM energy/ Mass energy;** While S number of BOUND TREOS generates **One Quantum potential energy** (**DARK ENERGY**); and S number of KINETONS (deformed bound treos or **DARK MATTER PARTICLES**) constitute **one Quantum Kinetic energy**.

(!!) SPEED OF LIGHT- *Photon moves in transitional motion;* **After each vibration photon packet is pushed to next bound Treo, calculates the 'Speed of light' i.e.,** S bound Treos distance in S vibrations or per second**;** *Please see appendix b for calculations.*

(!!!) GRAVITATIONAL CONSTANT** – **S^2 Free treos** in 'unit mass' **is supported by S^2 kinetons per second per second,** present in one graviton coloumn of one

"GRAVITON". *(it can be derived from the conventional value of gravitational constant). **Please see appendix b for calculations.*

(!V) PROPULSION BY MEDIUM ALONG WITH SUPPORT OF ALL LOADS BY MATRIX

SUPPORT OF EACH LOAD on space matrix occurs IN ONE 'UNIT -TIME' OF S VIBRATIONS, IN ONE SECOND.

Each quanta mass energy in any packet- ***will Rotate once to be supported from S directions in a circle***, either on one EM wave in first, or by One Orbitum (S KINETONS) in matter wave second dimension.

Increasing quanta mass energy = Increasing number of rotations = increased units of angular momentum (= increased frequency), which is calibrated by Planck's constant.

> **Any load on space matrix will be supported in UNIT TIME of One second.**
>
> While EM energy packets of *photon can also be* ***simultaneously propelled*** *at the speed of light on EM wave* (frequency less then wave length), *the* ***mass energy packed will first be supported by required number of vibrations*** *(one vibration of each shell along wave length in a matter wave)* to be supported *and then only it will be pushed just once by one vibration to next bound treo*, (Wave length less then frequency) the process in S vibrations of one second is repeated equal to its frequency in one second.

Packet of 'unit photon', spreads on S apex bound Treos at its wave length and is supported by S vibrations, one layered S kinetic coloumns, by EM wave of 1 frequency in one second and simultaneously moves by S bound treos distance in one second.

AS LOAD CAN INCREASE UP TO GAMMA PHOTON (√S quanta EM energy), for all photon packets to support each quanta EM energy by one EM wave, it increases frequency of wave, and rotation of packet in one second. (frequency less then wave length).

After **frequency and wave length equals** in gamma photon; **and then frequency starts increasing more than wave length** in second dimension for all mass energy packets.

Then each packet *has to wait first to support, its each quanta mass in the packet by equal number of orbitums (i.e., S number Kinetons) in sub shells of shells, by its one rotation per second.*

For this all shell placed at each apex bound treo along its wave length one by one gets one vibration, and then only it is propelled by its next one vibration to next bound treo. **In both cases <u>each quantum in packet will be supported by its one rotation in One second</u>**.

(V) <u>Waves</u> (EM or matter and gravitational wave)

(!)<u>WAVE LENGTH</u> = length of spread of packet, or length of spread of mass pressure of body.

Wave length= S bound treos/ frequency i.e., equal to number of quanta in packet.

(!!)<u>FREQUENCY=</u> Number of quanta in packet= Number of 'layers in sub kinetic coloumn' in each EM wave = number of EM waves per second = or number of supporting 'orbitums' in matter wave = **<u>frequency of Wave</u>** = orbital speed or 'number of bound treo distance per second'.

Example of orbital motion in matter or gravitational wave.

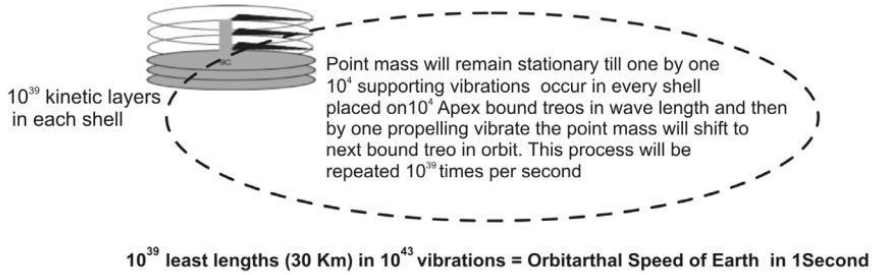
E.g., Point mass of Earth.

You will love to see the efficiency of working of Universe with the example of revolution speed of Earth in its orbit[1].

It cannot change its position 'Even by one Planck least length', nor it can change its 'revolution time by one Planck least time' (time gap in between two vibrations).

Revolution speed of earth in its orbit on its 'gravitational wave in its orbit'.

Point mass of Earth is moving in its orbit by 30 Km per second is equal to 10^{39} 'bound treos distance per second', equal to the **10^{39} frequency** of gravitational wave moving in earth orbit, while **'symbolic point mass of Earth'** [as EARTH LOAD on space matrix is already neutralized by its individual Gravitational field] **will remains stand still till *one by one all vertically placed shells vibrate*, placed along 10^4 wavelength of matter wave** (to energies each sub shell and it's all orbitums to support the exerted load of 10^{39} quanta) and **then only 'the point mass of Earth' will move to next bound treo in its orbit or thus it will move by 10^{39} 'bound treos distance per second' or 30 km per second, equal to frequency of its wave**.



10^{39} kinetic layers in each shell
Point mass will remain stationary till one by one 10^4 supporting vibrations occur in every shell placed on 10^4 Apex bound treos in wave length and then by one propelling vibrate the point mass will shift to next bound treo in orbit. This process will be repeated 10^{39} times per second
10^{39} least lengths (30 Km) in 10^{43} vibrations = Orbitarthal Speed of Earth in 1Second

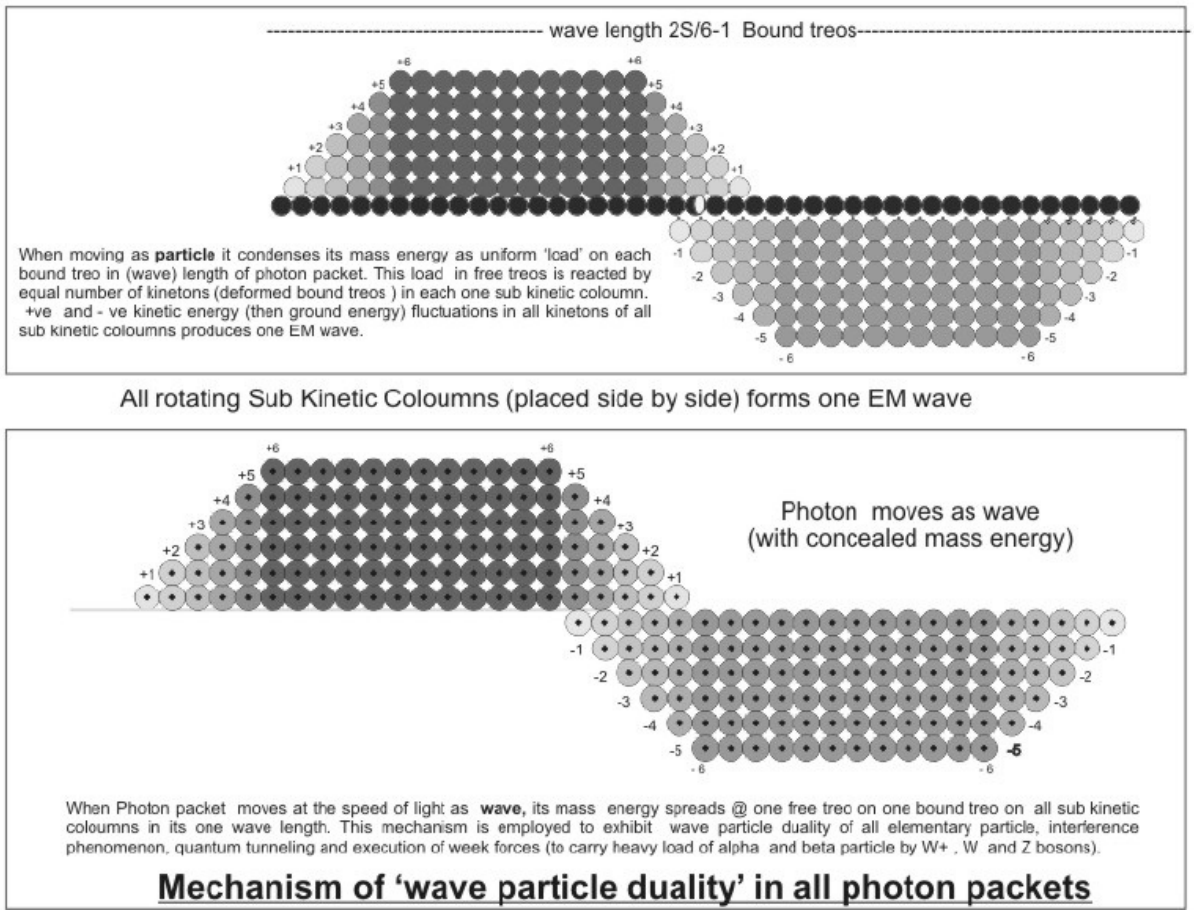
Figure 14

Figure show 10^{39} frequency and 10^4 wave length, of gravitational wave with which 'point mass of Earth' shifts in its orbit. To be supported by one vibration of each shell for **10^4 vibrations the 'point mass of earth' will not move** and in next vibration it will move to next bound treo. **This process is repeated 10^{39} times (frequency)** in one second (in S vibrations or 10^{43} vibrations) gives 10^{39} bound treo length (or 30 km) per second orbital speed.

(V!) WAVE PARTICLE DUALITY

All 'photon packets' or "mass energy packets", up to 'one-unit mass', are not point masses but its EM energy or 'mass energy' ***spreads evenly on all "apex bound treo" on its respective wave along its wave length*****.**

And on top of it, 'Each free Treo in packet, *can either remain bounded in packet to increase* ***Particle density*****'** or *"*Each Free Treo in packet *can spread on equal number of kinetons present in its all supporting kinetic coloumns*" and thus can become **part of its wave.**



wave length 2S/6-1 Bound treos
When moving as **particle** it condenses its mass energy as uniform 'load' on each bound treo in (wave) length of photon packet. This load in free treos is reacted by equal number of kinetons (deformed bound treos) in each one sub kinetic coloumn. +ve and - ve kinetic energy (then ground energy) fluctuations in all kinetons of all sub kinetic coloumns produces one EM wave.
All rotating Sub Kinetic Coloumns (placed side by side) forms one EM wave
Photon moves as wave
(with concealed mass energy)
When Photon packet moves at the speed of light as **wave,** its mass energy spreads @ one free treo on one bound treo on all sub kinetic coloumns in its one wave length. This mechanism is employed to exhibit wave particle duality of all elementary particle, interference phenomenon, quantum tunneling and execution of week forces (to carry heavy load of alpha and beta particle by W+ , W and Z bosons).
Mechanism of 'wave particle duality' in all photon packets

Figure 15: Diagrammatic representation to show how Photon exhibits wave particle duality on EM WAVE; As **particle** its EM energy spread equally on each apex bound treo along its wave length and *can remain condensed*: or as **wave** its *Each free treos EM energy will spread on equal number of Kinetons* (one on one) in all Sub kinetic coloumns in EM wave supporting the packet. This solves the mystery of 'Double slit experiment' for photon and electron and "QUANTUM TUNNELING" of Alpha particle from nucleus.

(V!!) <u>FOUR BASIC FORCES or just one force in universe.</u>

<u>There is only one force in universe</u>, which erupts proportionate to the exerted increasing load, in action -reaction mechanism, and changes geometry, its nature and magnitude of force, with the inclusion of increasing number of dimensions of space-time, one by one, to present as 4 basic forces (EM force, Atomic and week forces and gravitational forces).

*Thus, by kinetic coloumns of all four dimensions (**one, two, three, four knots are formed one over other; like Russian dolls**) **<u>the changing geometries which form fields of all four basic forces</u> , the amount and nature of force also changes which manifests as Electro week fields, atomic energy field and gravitational kinetic energy in gravitational fields, as four basic forces**.*

<u>FORCE IS GEOMETRY</u>. What all four basic forces are, we will study its changing geometries layer by layer? These are kinetic energy fields formed in response of applied load, in increasing number of dimensions to support the load.

In one dimension of length to support photons of total EM spectrum it forms '**EM fields**' and '**week forces fields**' for weak forces bosons (W Z particles with its different charges) *inside nucleus of atom* (in both fields one free treo is supported by one kineton, in respective multilayered 'Sub kinetic coloumns' at each point after 'spread of each packet' along its wave length).

In two dimensions to support and to form all atom of all elements it forms 4 quantum levels (1,3,5,7) of *s. p. d. f.* in elliptical orbits, sub shells and shells of '**atomic fields**' are formed.

Similarly, to support increasing load the gravitational forces erupt, in 3rd to supports all earthly bodies and for cosmic bodies in 4th dimensional deformations.

The Sun (10^{38}unit mass body) is supported by 10^{38} layered (3 km diameter; same is calculated by general theory) GRAVITATIONAL SPHERE. While, Earth a 10^{32}unit masses body is supported by 10^{32} layered (1 mm) gravitational sphere. (Gravitational sphere is kinetic coloumn with four-dimensional deformation of space matrix; i.e., by 4 knots of matrix one over other)

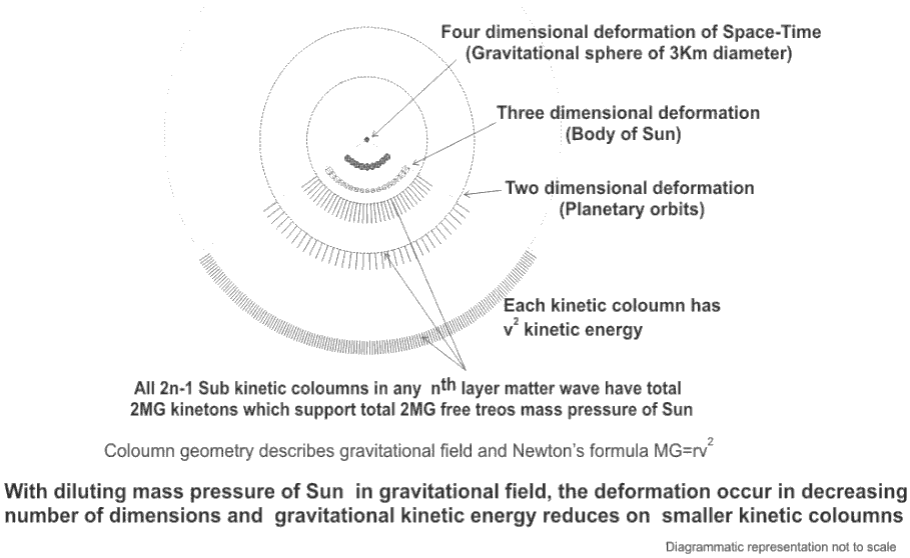
Day 6 **LECTURE 3; QUANTUM GRAVITY**

Humanity, could not know WHAT is Gravity? or WHY gravity erupts? **And you are quite far to explain QUANTUM GRAVITY.**

Gravity is to support a body on space matrix, by increasing contraction of SPACE matrix towards body, to neutralize its exerted LOAD on space matrix.

At Gravitational centre- Any M unit masses body exerts **M^2 unit masses LOAD** at its gravitational centre which is neutralized by **M^2 gravitons** in M layered 'Gravitational sphere' (kinetic coloumn of 4 th dimension; 4 knots).

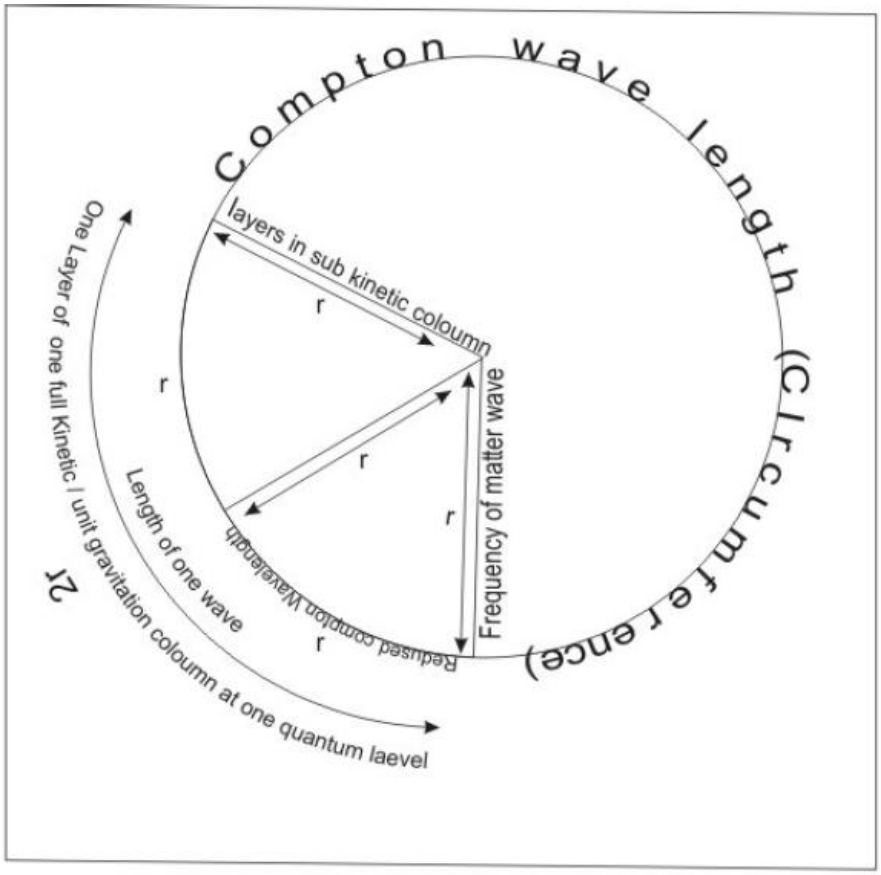
In Gravitational field- The M unit masses body exerts **2M unit masses** DILUTED MASS PRESSURE on its each concentric Gravitational layer, which is supported by **total 2M kinetons** in **all 2n-1 kinetic coloumns** in wave length of this Gravitational wave in 'n th layer' of gravitational field (radius r = 'n').



Four dimensional deformation of Space-Time
(Gravitational sphere of 3Km diameter)
Three dimensional deformation
(Body of Sun)
Two dimensional deformation
(Planetary orbits)
Each kinetic coloumn has
v^2 kinetic energy
All 2n-1 Sub kinetic coloumns in any n^{th} layer matter wave have total
2MG kinetons which support total 2MG free treos mass pressure of Sun
Coloumn geometry describes gravitational field and Newton's formula $MG=rv^2$
With diluting mass pressure of Sun in gravitational field, the deformation occur in decreasing
number of dimensions and gravitational kinetic energy reduces on smaller kinetic coloumns
Diagrammatic representation not to scale

Figure 15

Each layer of 2n-1 kinetic coloumns in any gravitational field supports 2 M unit masses load, of M unit mass body, by its total (2 M) kinetic energy, present in 2n-1 kinetic coloumns, one at each apex bound treo in its n th layer from gravitational centre of body.



Frequency = **Radius of circle** = total number of layers which increases in multiple of √S number of bound treo layers at each next quantum level
= total number of quanta mass energy of elementary particle
= orbital speed in orbit at this quantum level

Reduced Compton wave length = S / number of quanta in elementary particle
One layer of full kinetic unit gravitational coloumn = 2xRC wave length=One EM or Matter wave

Compton wave length = (circumference of circle) = Reduced Compton wave length (r) x 2 (Π)

Figure 15

2 n -1 kinetic coloumns in one layer at Radius 'r' = n , are along 2 Reduced Compton wave length of gravitational wave, which multiplied by pai, forms Compton wave length or circumference of orbit.

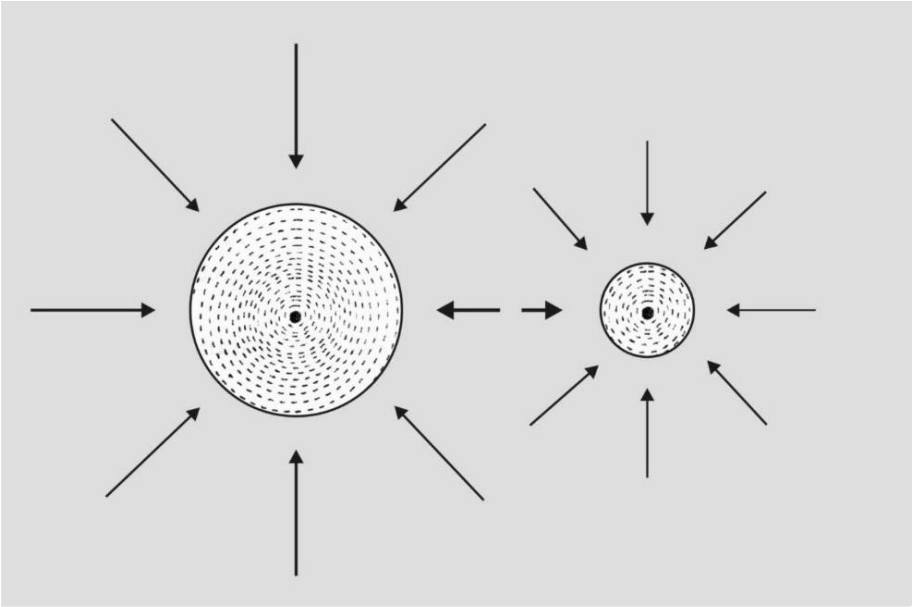
Your first myth is*----If gravitation is positive kinetic energy, which erupts from increasing contraction of Space towards body, to support it (to neutralize its LOAD on space matrix), and then,* ***why a baby body should move/ fall from***

<u>less strength</u> kinetic energy zone to <u>more strength</u> kinetic energy zone, towards body.

***<u>Answer to First myth is</u>*---**

*BUT **TOTAL KINETIC ENERGY IN any <u>outer</u> layer is always slightly more, than in next <u>inner</u> layer**; **<u>due to disproportionate rise of value of factor -1</u> <u>(in 2n-1)</u> in each next inner layer** with reduced number of kinetic coloumns, the baby body is just squeezed towards parent body or fall/ pushed.*

<u>Gravitational attraction</u>



<u>Figure 16</u>
Gravitational attraction is due to **<u>deficient support which could be provided by COMMON SHARED (SOLITARY) SPACE MATRIX IN BETWEEN</u>**; thus, bodies are just pushed towards each other from all sides.

Your second Myth is – gravitational attraction is <u>negative Energy.</u>

Answer to second myth is *--- Bodies fall/ move towards each other as COMMON SHARED SPACE MATRIX Could not produce sufficient kinetic energy in between to support both bodies, thus both bodies fall/ moves towards each other. BUT DEFECIENT KINETIC ENERGY SUPPORT IN BETWEEN CAN NOT BE LABELLED AS 'GRAVITATIONAL ATTRACTION IS NEGATIVE ENERGY'.*

Discussion and proofs *---*

NEWTON said gravitation is attraction in between two bodies, but not told HOW and WHY this force is generated. Then EINSTEIN that it is produced by deformation of omnipresent SPACE-TIME (as it is SPACE-TIME-ENERGY was not known) told some of its HOW.

I told you both HOW and WHY of GRAVITATION, that it Is to support a body, TO MAKE IT WEIGHTLESS; i.e., converts it in symbolic weight less 'point mass' on space matrix.

2 Proofs

(!) Thus all bodies BIG or SMALL dropped from 'tower of Pisa' by Galileo, came to ground simultaneously, as was converted in **'point masses'** all affected only by its same legend gravitational field of EARTH, independent **of their individual masses, which are already neutralized by their own gravitational field.**

(!!) It is being reminded, all planets orbit around sun as **'point masses'** at a speed ('*v*') which is decided ONLY by IT'S DISTACE FROM SUN ('r'), as calculated by Newtons equation $MG=rv^2$, and **independent of their individual masses as already neutralized by their own gravitational field.**

QUANTUM GRAVITY

(1) Each **photon packet** *spreads* on 2n-1 apex bound treos in its wave length of *EM wave* and is supported by 2n-1 sub kinetic coloumns.
(2) Each **mass energy packet** up to unit mass *spreads* on 2n-1 apex bound treos in its wave length of '*matter wave*' and is supported by 2n-1 shells placed one over other (kinetic coloumns of second dimension).
(3) 2M unit mass pressure of body, *spreads* on 2n-1 apex bound treos in 'n th' layer from body in its gravitational field, and is supported by 2n-1 kinetic coloumns spread on each 'apex bound treo' along 'reduced Compton wave length of *gravitational wave* of this layer' and its angular momentum ***(x ℼ) gives circumference of this orbit.***
(4) **Unification of general theory with quantum world**.

The **circumference of orbit* in second dimension of quantum world** at 39^{th} quantum level in graviton coloumn for 39^{th} quanta mass packet, **when multiplied by number of unit masses of sun** (i.e. 10^{38}unit masses of sun), it **calculates exactly the circumference of orbit of EARTH.** *Please see appendix.
This explains QUANTUM GRAVITY.

Gravitation has hidden purpose

[But along with expansion of universe, one more mechanism of Churning of Matter in Gravitational Spheres and Black Holes, is working to make space matrix flat and wrinkle free i.e., free of all local deformations.]

I will tell you that even the gravitational force is created just to fulfill a hidden purpose of creator.

To make space matrix flat like a plain sheath of paper, with no wrinkles (deformations/ contractions) **all matter should vanish** as it is being continuously grinded in all type of gravitational spheres of Sun and each Cosmic body, Planets, stars, G stars and black holes, *all attract matter due to their gravitational force* **to churn it**.

These bodies have gravitational spheres that continuously churn the matter through the production of "Hawkins' energy pairs" of positive and negative energy particles, which are **free treos** and **voids**. This process will cause all deformations, or kinetic columns to disappear (which were supporting this churned out body), leading to a flattening of the local space matrix. Because of expansion of universe (by uncurling of voids) along with churning of matter, the 'total potential energy of the universe' increases while the 'total kinetic energy of universe' decreases with increase of its *entropy*.

Black holes are churning matter and photon packets and thus removing all 'load' and deformations from space matrix, so that it can fully uncurl **without any wrinkles;** *like a flat sheet of paper*.

Your star, Sun has a gravitational sphere of 3Km diameter, while your Earth have a 0.1 cm gravitational sphere. In these gravitational spheres (a black hole in formation), the matter is also being churned (as in black holes) and while the negative energy or "voids" are absorbed back, the 'treos' regurgitate out from these mini black holes, as positive energy e.g., as the energy behind flow of the 'solar wind'. Smaller the gravitational sphere the higher pace of churning of matter, while black holes churns even photons and emits beams of Electrons.

In the case of your planet Earth, this emerging energy from its gravitational sphere as out flowing 'free Treos', heats the core of planet Earth and works as a basic force which shifts tectonic plates to invite 'Earth quacks' and to 'erupts volcanoes'.

7 th day **I asked, HOW YOU PERCEIVE**

I asked alien that how she can see, hear, feel and even come to know about my thoughts?

I will tell you today about working of my body added by this helmet in detail along with the all-advanced technologies involved.

The level of advancement of any civilized species in our galaxy is measured by its level of knowledge about this space-matrix (you can say that how much you know about our 'regulatory god') and how this knowledge is being used in its technology. You and your all scientist ever born only tried to know about 'one or other property of this matrix'.

HOW WE SEE

I asked her; if photon is just an energy packet how you see all colours?

Every atom of any element in universe absorbs energy to excites its one electron in its atomic orbit (with shift of electron orbit to higher quantum level in atomic structure) and when it returns back to its base line energy, then **excretes a photon packet,** of difference in two energies (shift of electron from higher, back to lower quantum level) at its own unique and fixed frequency specific to this element or compound.

The Electromagnetic spectrum or all type of Photons i.e., radio, microwave, infrared, visible spectrum, ultraviolet, X-rays and gamma rays are packets of **increasing integral number of one quanta of EM energy (unit of increment is unit photon)** which generates EM waves of increasing frequency.

As you see colours by **absorption of different *amount* of EM energy in photon packets** (of wave length in visible range of 400nm to 700 nm) generated by captured by your retina, and energy absorbed goes to ophthalmic cortex in back side of your skull.

In was night time and the table lamp with an ordinary light bulb on my computer table was the only source of light in my room.

Suddenly, I realised that I am casting a shadow, but the shadow of Alien was absent.

I turned my face towards alien and asked, 'what happened to your shadow', **but then I could not see, even the Alien**.

I am here only and was giving you a demonstration that you cannot see me, "I can become invisible".

Highly surprised, I could utter only one word "**How**"?

He said, first I will have to clarify you how you see me and other objects.

You see things in light (by absorption of different amount of this EM energy in different photon packets), and in dark you are not able to see.

The atoms of all elements (in bodies) **absorb photons** (light) of all frequencies when exposed to light and thus casts a shadow area for sun rays.

After absorbing this EM energy, all atoms emit photons packets in visible range and thus we see all these colourful objects.

A pattern of Photon packets at different frequencies, when *hits screen (curtain) of retina inside your eye,* and this pattern of absorbed EM energy, is transferred through the optical nerve to the 'visual area in your brain

cortex,' where the absorbed energy at every point in retina is decoded by your brain as different colours; thus, you see this colourful world.

You have seen me, 'I have no eyes' but I absorb these photon packet from my skin covering on my whole skull, and thus my whole skull (upper cylindrical part of my body) works like screen of your retina, and thus we can analyse our entire surrounding atmosphere (at 360 degree) by this absorbed energy, which is coming to me from all sides and this was the sole reason that I could sense you beforehand, when you was falling in ice crater and I could hold you timely in my arms before you fell on floor and thus saved your life.

I even consume the light energy and other spectra of EM energy directly to perceive hot and cold and to perform **our all bio- chemical processes** and thus whole EM spectrum absorbed is a must for our survival. It is somewhat like "photosynthesis in plants of earth" where the photon energy is used by plants to synthesize carbohydrates from water and carbon di-oxide.

The absorbed EM energy is also used by our bodies **to power our brain** directly. As we are absorbing photons directly, that is why we are bodies with the most efficient energy utilisation systems.

When hungry and starving for energy, or **willingly**, the atoms in molecules forming skin of our body **will stop emitting any light photon from my body and then you could not see me**.

The voluntary control of this affect makes us invisible on demand, but you will still see a 'faint outline of our bodies'. This absorption of photons by my skin can be considered as 'total internal reflection' as in "black body".

In your Animal kingdom many animals like 'chameleon' can change his skin colour with his emotions of 'anger' from green to red.

The atoms in molecular system in the body of 'jugnu', can even emit light by converting chemical energy in photon packets, which are emitted from its atoms of its skin even in dark night when they are not absorbing photons.

The 'electric ray' fish is one step ahead, as it can discharge a fatal electric current (by production and discharge of **electron packets** in bulk) on its own will.

Other method of being invisible is to "camouflaging of our body", some fishes change their body colours and creates spots on their body instantly (by quickly changing the colour pattern of photons which are being radiated by their skin) so that they perfectly match with the surroundings and thus you cannot distinguish them.

MY HELMET

Similarly, the thoughts are generated with **emission of photons during quantum level jump of circulating electrons in your cerebral cortex** responsible for your consciousness.

Your brain and this HELMET receivers get its input by ***analysing unique wave lengths in beams of these emitted photons*** in your brain and responsible for your various thoughts. *This is associated with formation of kinetic coloumns (wrinkles) all along wave lengths of photon on space matrix*.

Simultaneously, the helmet receiver (by Brain computer interphase) does EEG (electroencephalogram of your brain) and inbuilt computers **first filter out** some known wave lengths produced by all signals required to operate your body and your vital organs and also some artifacts, and **then it analyses wave lengths** of remaining signals (produced by your brain

which operates your vocal cords to generate different pattern of voices); thus we know in advance about your language and matter of your speech.

Now you know that **how we do your mental telepathy**. The kilometres long deformation of matrix produced by your thought photons can also be perceived, not only by this helmet by our sophisticated gadgets, but even directly by any **tuned receiver brain**; you level it **Telepathy**.

SUPER LUMINOUS SPEEDS

I asked alien but, how your space-ship cruises at the speed more than the 'speed of light' in this universe?

By flying at super luminous speeds, we can cut short the distances, by performing our journeys in higher dimensions, where our spaceship could also muster the desired higher kinetic energies to travel fast. And thus, it can reach a speed, which is more than the speed of light.

I will explain you my point 'have you seen Accelerators on a railway station, and you can climb on it faster than the base speed of Accelerator, by **hopping quickly one or two stairs same time on moving accelerator**.'

Deformation of space matrix occur in higher dimensions ('**to muster higher kinetic energies**') which supports bigger 'loads'; can also be used to travel fast.

To move at super luminous speed my spaceships create three dimensional local deformations [which can concentrate maximum S^3 kinetons (as S gravitons) at each point i.e., at any one apex bound treo; which provides necessary kinetic energy to our spaceship] along its path of motion. Our space ship ejects 'NEUTRON BEAMS' at sub luminal speeds which then orbits around our spaceship creating artificial spaces in higher

dimensions. (**the carpet on which we have to move just roles up; just reducing dimension of length**) All these fields and neutron beams are generated by our nuclear-powered cyclotron engines. Thus, our spaceship takes great leaps (**jumps**) in space-time and can thus move at super luminous speed.

Multiverses answers the mystery and mode of our Space journey from far of regions of this universe via some other bran of multiverse (via other universes) to your planet in a very short Time.

You must have seen our spaceships (UFO's) as they suddenly disappear from your vision. They just enter parallel universe and move much faster (with slightly different values of 'all universal constants' by few quantum levels in these parallel universes resulting in increased speed of their 'propulsion by medium') and simultaneously we use short cuts of distance (travelling via these 'worm holes') to our destinations. In this way our spaceships can travel to far off places, very fast and in a very short time. Thus, I came here from my far-off place (planet at 600 light years) to your planet only in less than 3 weeks*.

* [First of all, an UFO moves to deeper peels (i.e., onion peels) / layers of parallel universes after passing through an 'worm hole' and similarly it comes out of through another 'worm hole' at their desired destinations (for crude understanding it can be visualised as you travel by an underground Metro)]

At the same time, somehow my female dog came to my room. The dog was barking by the sight of Alien, but the Alien inspected her with interest, and then asked two questions simultaneously.

DIFFERENT LIFE SPAN OF SPECIES

"What is your life span?

and the life span of this dog on Earth?"

I placed a question in reply, we live 100 years and Dog lives 15 years, and some insects have life span of just 1 day. You tell me why?

He replied, not only the 'load' causes the space matrix to contract, but the ***characteristics of local space matrix too affects us.***

Space matrix (space –time - energy) has three interdependent components. If any one component changes its dimensions the other two simultaneously changes its numerical values. BY CONTRACTION OF SPACE KINETIC ENERGY ERUPTS AND LOCAL TIME SLOWS DOWN.

I have told you that the whole universe readjusts and expands a bit at each point in this Planck's least time (time period in between two vibrations). The reaction to an action does not occur instantly. But this takes minimum one Planck's least time to react. This is 'processing time', or "reaction time', or 'least time needed for a change'.

This constant change in universe (according to local contractions or due to universal expansion of whole universe by uncurling of voids) is perceived as 'FLOW OF TIME in universe'.

With increasing gravitational field strength of parent body towards its centre, the time 'slows down' according to the level of deformation/ contraction (while kinetic energy erupts to support the parent body) of local space matrix around the planet in question.

All 'biochemical processes' requires this 'processing time' and the life span in any species depends upon the 'speed of biochemical processes' going on in their bodies. We have average life span of 1000 years or so at our planet placed at just one quantum level above you.

You will live another 900 years if you shift to my planet, as time move slow due to increased 'processing time' or 'increased Planck's time' (i.e., by decreased *number* of vibrations in one second or increased time-period in between two vibrations of local space matrix) at my planet.

Thus, with different rate of their biochemical processes (according to their individual processing times) foetus of dog matures in two months, and in humans it takes nine months and in elephant it takes two years.

A house fly can move its wings 600 times in a second or an insect lives and perceive his whole life in his short life span of just one day, (just like we humans perceive in one life span of 100 years)

CAN soul can be donated to other soul

You are aware of magnetic fields. **For your information they are produced by supporting revolving kineton layers in 'sub kinetic coloumns'** of moving electrons.

Even when electron moves on wires the **revolving kineton layers in orbitums** (all same energy orbitums one over other along wave length jointly form ORBIT) forms magnetic fields.

While poles of magnet are decided by anticlockwise (north pole) or clockwise (south pole) rotation of these layers.

As magnetic fields can be merged the merger of two beam of soul as one is no different; making resultant soul powerful.

DAY 8, **PLANETS & ITS POSITIONS**

Next day as was decided earlier, we talked about Planets of solar system.

I asked Alien to tell me how mass energy condense and what assign the positions of baby bodies in any gravitational field.

Alien Grengi' replied that planets in solar system (about 1% of material) condenses at gravitational field quantum levels of our star (99% material SUN) in two- dimensional deformation of gravitational field of parent body. **It Started at 10^4 th gravitational field quantum level of Sun, with start of two-dimensional deformation of gravitational field, at 10 Planetary quantum levels in gravitational field of Sun.**

We will discuss **how these planetary quantum levels** are formed.

Stars are formed by gravitational concentration of gas and ions present in gaseous nebula.

(!) Dis-proprortnate rise of value of -1 in 2n-1 kinetic coloumns in any layer of gravitational field, results it MORE TOTAL KINETIC ENERGY in any outer concentric layer then TOTAL KINETIC ENERGY IN NEXT INNER in any gravitational field, will promate condensation of matter.

(!!) But space matrix regulates this accumulation of Mass Energy, which should be incorporated in any model of 'star formation'. In our quantum

universe, energy accumulates only at √S quantum level in each dimension of Space-Time.

The resonance of all simultaneously vibrating bound treo (S number of times, in S planes of a circle, per second) and geometry of field generates these quantum levels in matrix.

Thus, *the maximum energy accumulated in any dimension; serves as one unit which increases at each of √S quantum level* of next dimension.

S number of Treos or one Quantum energy is EM energy in **unit photon** which increases as one unit at each of √S quantum levels of first dimension to form all photons of EM spectrum.

Now, √S Quanta (√S × S free treos) in **unit electron** works as unit of second, S Quanta (S × S free treos) in **unit Mass (or Planck mass)** works as unit of third and **√S Unit Masses** (approximately 1 billion metric ton) is unit which increases with four-dimensional deformation of Space-Time, at √S Quantum levels of each dimension.

The formation of Earth (made up of 10^{32} unit masses); the Sun (10^{38} unit masses) are supported by 10^{32} and 10^{38} layered gravitational spheres reaspectively (For Sun same sized gravitational sphere of 3 Km diameter is calculated in general theory by Einstein); while Unit black hole (10^{43} unit masses, or S unit masses) forms at last **√S** quantum level of fourth dimension, is supported by S layered gravitational sphere.

But it is not the upper limit of accumulation of matter, in deformation of next Fifth dimension (of total space-time-energy) our Milky way galaxy is placed at 20 th quantum level with 20-unit black holes at its galactic

centre, and then bigger galaxies and other Ultra massive black holes condenses at still higher up to **√S** quantum levels can have √S unit black holes at highest level of fifth dimension.

(a) Planetary quantum levels in gravitational field

Sun made up of (10^{38}unit masses) exerts (10^{38})^{2}unit masses, LOAD at its gravitational centre (in square of unit masses) which is supported **10^{38} layered gravitational sphere (kinetic coloumn of fourth dimension;** 4 knots**)** around its gravitational centre having (10^{38})^2 gravitons along with their graviton coloumns.

This 4 -dimensional field **will dilute in lower dimensions with each bigger consecutive layer forming gravitational field of Sun to support 2 x (10^{38}) unit masses** around its gravitational sphere, by first producing 3-dimensional (3 knots) spherical deformation (in which spherical mass of Sun accommodates) and then in 2-dimensional elliptical orbits in which planets are lodged; 1 dimensional deformation (1 knot field) present underneath all around gravitational field is explained by **NEWTONS FIELD EQUATIONS (MG=rv^2) and (MG =r^{2}a).**

In any celestial body (e.g., SUN or any Planet) the baby bodies (planets or natural satellites) start condensing at **10^4 th gravitational field quantum level** with start of its 2-dimensional gravitational field.

(b) Formula* of Calculation of 10^4 th gravitational field quantum level in any cosmic body

Distance in bound treo layers = Square of quantum level x number of graviton layers in its gravitational sphere.

e.g., For Sun, the 10^4 th gravitational field quantum level = $(10^4)^2$ multiplied by (x) 10^{38} layers in its gravitational sphere.

Foot note*

First gravitational field quantum level will be at (1x 10^{38} layers in its gravitational sphere of Sun); added with (+) for Second (3x 10^{38} layers in its gravitational sphere of Sun); added with (+) for third (5x 10^{38} layers); added with (+) for fourth (7 x 10^{38} layers……and so on added with (+) 2n-1 in for any n th quantum level x 10^{38} layers in its gravitational sphere.

THUS, TO CALCULATE TOTAL LAYERS UPTO ANY DESIRED QUANTUM LEVEL = IT FORMS FORMULA EMERGES WHICH WILL CALCULATE, SQUARE OF GRAVITATIONAL FIELD QUANTUM LEVEL MULTIPLIED WITH NUMBER OF LAYERS IN ITS GRAVITATIONAL SPHERE.

(c) You are from which planet, OF WHICH STAR?

Once I returned to my room at night, I was curious about where abouts of my alien companion girl. At my room, in the night, I asked Alien 'you are from which planet of which star'?

She answered, "I am from star Gliese 581, which is in constellation Libra".

As the Libra is my zodiac sign and I being interested in astronomy, I already knew the position of this star.

"And my planet is $V^2 1/ 4$." I was again perplexed by the peculiar name of her planet and I wanted her to explain it.

So I said, I could very well know about position of your star but 'I could not get, please explain the strange name of your planet'?

She Replied, I will explain your question by example of position of placement of planets in your Solar system.

However, before answering, he wanted to assess my knowledge of the positioning of celestial bodies in a gravitational field.

I told her about 'Bodes relation' knowledge on earth, about position of bodies in solar system.

He said 'your knowledge is limited; the "Bodes relation" is only a rough approximation of position of planets in solar system, known to you. It does not explain the governing factors and the **exact formula**, which can be used to determine the ***position of baby bodies in gravitational field of any parent body in whole universe***.

POSITION OF PLANETS AT ITS QUANTUM LEVELS

If **gravitational kinetic energy level v^2**, calculated as (or $v^2 = MG/r$) in orbit of **first planet Mercury is E, (**i.e., **E number of Kineton's** present in each 'sub kinetic coloumn' located at each 2n-1 apex bound treos in the orbit of Planet Mercury)**. Planet Mercury** in ***first sub shell*** **of shell at first planetary quantum level.**

Then, (E/2) kinetons will be present in each 'sub kinetic coloumn' in the orbit of **Planet Venus** in ***second sub shell*** **of shell at first planetary quantum level.**

And (E/3) kinetons will be in each 'sub kinetic coloumn' in the orbit of **Planet Earth** in ***third sub shell*** **of shell at first planetary quantum level.**

Then 'gravitational kinetic energy', **'E' reduces by 'square of *planetary quantum number***, at which the planets are placed'.

E/4 (E/2^2) kinetons are in each sub kinetic coloumn in orbit of **Planet Mars**, similarly,

<u>So, my planet E/4 (or v^2/ 4) corresponds to planet Mars of your star SUN.</u>

E/9 (E/3^2) of Kineton's, is gravitational kinetic energy in **Asteroid belts**,

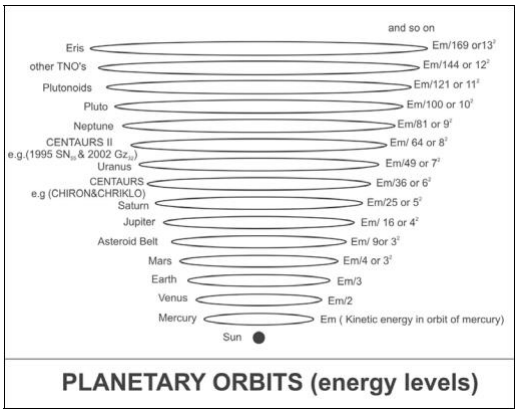
E/16 (E/4^2) kinetons are in orbit of **Planet Jupiter,**

E/25 (E/5^2) kinetons are in orbit of **Planet Saturn,**

E/49 (E/7^2) kinetons are in orbit of **Planet Uranus,**

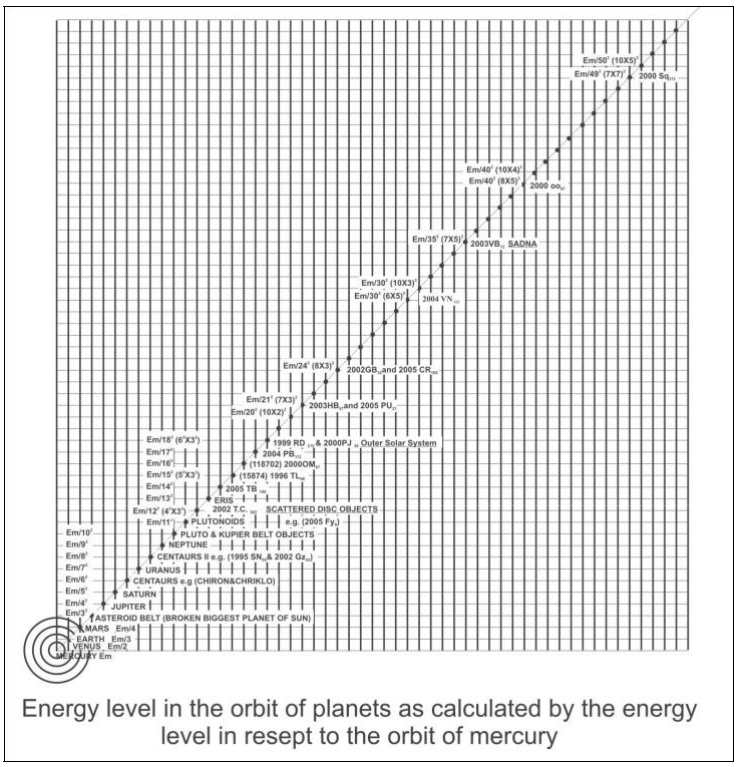
E/81 (E/9^2) kinetons are in orbit of **Planet Neptune,**

and E/100 (E/10^2) kinetons are in orbit of **Planet Pluto.**



<u>Figure 17</u>:

Planets are placed at 10 'planetary quantum levels' formed in two-dimensional deformation of gravitational field of moving Sun with our rotating galaxy.



Energy level in the orbit of planets as calculated by the energy level in resept to the orbit of mercury

Figure 18

Graph of gravitational kinetic energy in gravitational field of Sun, which decides position of all baby bodies.

All planets discovered by western world much later were described in Veda about 5520 years back (3500 BC) by its Vedic names. Uranus was called **(ARYAMA)** and Naptune (as **VARUN**) while Pluto (**RITU**) in Rigveda (1/105/6) and Veda names '**Saturn rings**' and divides them as **Shukra, Suchaya and Ruchanaha** (Rigveda 4/51/9).

EVERY THING IS MOVING IN UNIVERSE BY THIS CHROMODYNAMIC ENERGY OF UNIVERSE ON SPACE MATRIX. Thus moving Sun deforms local space matrix (around moving sun at *792000 km per hour* with spinning galaxy or at 200 Km per second; while on top of it our galaxy is also moving at *2.1 million km per hour* in direction defined by constellation Leo and Virgo

towards neighbouring galaxy Andromeda) which reacts to still more diluted 'load' (but fixed **2m** for each layer in gravitational field of Sun) and forms the whirlpool like deformation of space matrix in two-dimensional deformation (Schwarzschild matrix), in which the planets are placed at different quantum levels.

Finally, the gravitational field will fade out in one dimensional deformation of space matrix on the surface of "space-time matrix" of universe as 'gravitational field'.

REVOLUTION OF PLANETS (BABY BODIES IN ANY GRAVITATIONAL FIELD)

Mind it the *individual masses of planets are immaterial* in deciding orbital *speed of planet*, as they are neutralized by their individual gravitational fields.

The kinetic energy v^2 in any orbit, decides the revolution or orbiting Speed *'v'* number of bound treos per second (equals to frequency of gravitational wave), by which the 'point mass' of Planet will shift in one second in its orbit.

Position of 'outer planets' and 'planetoids' in 'outer solar system'

About planetoids I will name only some prominent out of all; in fact, all are placed at lower Quantum levels in two-dimensional deformation of solar gravitational coloumn (field).

As the Mars is at E/4 or $E/2^2$, The asteroid belts are at E/9 or $E/3^2$, Jupiter at E/16 or $E/4^2$, Saturn at $E/2^5$ or $E/5^2$, Uranus at E/49 or $E/7^2$, Neptune at E/81 or $E/9^2$and minor planet Pluto is at E/100 or $E/10^2$. Further ahead the 'Trans

Neptune objects' like one more planet Aries is at E /13^2 and far ahead in 'outer solar system' planetoid Sudena is at E /35^2.

This formula is also valid for the planets in gravitational field of any star, placement of all Stars in a galaxy, Satellites of Outer planets, and Electrons in an 'atomic field'.

I verified his statements, by quick calculations and I was very happy that **I am the only one on planet Earth, who knew the correct formula for positioning of baby bodies in any gravitational field, and was also told about Cosmic code and quantum gravity.**

Configuration of planets

(A) **Ring system of 'outer planets' in solar system**

Not only the space is deformed by the presence of matter, but **reciprocally the properties of space** (along with the kinetic energy level) around the cosmic body effects and carves the configuration (State of matter, i.e., it is solid, liquid or gaseous) and the formation of rings around all semi – gaseous outer planets (like the visible' rings of Saturn, all other 'outer planets of solar system' i. e. Jupiter, Uranus and Neptune have rudimentary ring systems) at Quantum levels in second dimensional deformation of its gravitational field.

(B) Factor which decide the density of all solid planets, in any gravitational field

As my mother planet is at "E/ 4 of star cirrus", so it is in equivalent position to E /4 or the planet Mars in your solar system, and that is why the density of the body mass of my planet at E/4 is slightly less, then the density of your

planet Earth, which is placed in a higher kinetic energy orbit (E /3), (i.e. more deformed space matrix around it).

Thus, 'Gaseous outer planets in solar system' have satellites which have solid bodies

The same is the reason that once placed at higher kinetic energy orbits, the satellites of 'outer planets' are solid bodies, while their mother planets are big gaseous masses.

(C) **What Is the position of <u>biggest</u> planet or satellite in any gravitational field**

The Alian revealed me one more fascinating truth about planetary system of Sun. He further told me that "your solar system has a quite violent history".

The 'Asteroid belts' are the remains of the broken pieces of the biggest planet of solar system.

I said, I may agree with you, that the remains of an exploded planet formed asteroid belt, but how can you say that the **Planet which exploded was the 'biggest planet of solar system'**?

I will give you one circumstantial mathematical proof, the asteroid belts are at $v^2/3^2$ (i.e., at E/9) and this is the position fixed for the 'biggest baby body' in any gravitational field.

Examples are, the biggest satellite of Jupiter, Ganymede (Diameter 5262 Km) is situated at kinetic energy level of $E/3^2$ (while E is kinetic energy level at first satellite of Jupiter). The biggest satellite of Saturn, Titan (Diameter 5150 Km) is situated at a kinetic energy level $E/3^2$. The biggest satellite of Uranus, Titania (Diameter 1578 km) is also at kinetic energy level $E/3^2$.

And again, the biggest satellite of Neptune, Triton (Diameter 2706 Km) is at kinetic energy level, E /3^2 at quantum level in their respective gravitational field.

Thus, we can safely conclude that the biggest planet of the Sun, must have been existed at this quantum level, in solar gravitational field at v^2 at mercury /3^2 (or at E mercury / 9) kinetic energy level.

(E) **Uneven density of the body of moon**

A significant part of the debris of exploded planet was embedded in baby Moon (Earth's sole satellite) which resulted in 'uneven density of the body of moon'.

I suddenly remembered that I have not yet asked him, his name.

On questioning he replied, 'my name is Milky way - Libra - cirus - v^2 /4 - 30 - 80.7 – 23786 – 5, GRANGI 137. As the longitude of my house is 30^0 and latitude is 80.7^0 and I am fifth child of my father with my family recorded at serial number 23786 in birth register of my planet'.

I asked him, what he does at his planet. He said, 'I am doing an advance level 'research in Cosmology'.

9th day **I asked Alian what is love?**

LOVE IS FACE OF GOD

It can show you the face of God by giving you felling of all mighty God everywhere. **She said, I will reply this question on last day, but LOVE IS Quantum entangled beams of soul.**

But today we can do Some more discussions

She first gave me a strong lecture.

"While answering your questions, I simply can't understand the problem of ego in you people (human race), high heads with all type of thought blocks and an (inborn) rigid attitude towards 'any invitation for a right change'.

Have you seen the formation of 'whirlpool' in a pond. Your star, Sun produces a 'whirlpool like deformation" of space matrix, in this big ocean of (energy) universe and your planet Earth is orbiting in this whirlpool, 'like a straw'. On this straw you humans are adhering like bacteria, and with so little knowledge, you people are 'proud of what'?

She went a step forward and warned that "With this preliminary knowledge and a rigid attitude for any change, your human race is at an all-time risk to be attacked by some Alien race, who may be interested to tap your vast natural resources (on planet Earth)"; and wipe you off.

I quickly reminded her that she has promised me 'not to reveal the internet knowledge (or level of our limited knowledge) to anybody' and thus hidden, we will remain safe at least for the time being. Meanwhile we can develop our defences.

But same time I could not stop myself to put a question, 'what do you think, how the hostile aliens will attack we humans, and in that case, what will be our fate?'

Instead of answering me she fired back a question, "May I ask you? How do you fight with your opponent?"

Without waiting for an answer, she continued, I think, you will hit the opponent at its weakest point. Humans are virtually covered by microbes and are surviving only because of their strong immune system, which engulfs or bursts these invading microbes and saves your lives.

Most probably the hostile Aliens will not use conventional or nuclear weapons, but they may choose the 'genetic coded viruses' to attack the immune system of your body. The sample of this biological war has already been tasted by you people, in the form of HIV virus, which 'paralysis the immune system of the patient'. But "this time their attack will be much severe and more universal, just to wipe out the human race."

I murmured in slow voice, how they may be so cruel to another species, after all we all live in same universe?

Remember the cruelty of humans towards millions of chickens or for goats, cow, and Pigs to which you eat. After all it is 'survival of the fittest' and the Aliens will do the same, just to preserve their race.

Think, if the question is 'do or die', everything is ok; after consuming all resources of their mother planets, wandering in universe in a spaceship, if they can't get a habitable planet to settle down and to survive, then they will all have to die; then it becomes fight for existence. Even you people are thinking of another habitable place for you humans.

Coming to the answers to your questions one by one, first let me ask that, have you ever thought that how could we reach your planet Earth, from our far-off homes (hundreds of 'light year' away), when the speed of light is fixed, why no object can cross this speed in our universe? I will answer you this also.

(1) OBSERVING UNIVERSE

Have you ever wondered that why you observe the universe 'FLAT', as painted (all galaxies) on the surface of an inflating balloon?

As the speed of light is fixed in the universe, so whenever you see with the help of your advanced telescopes, the light coming to you started billions of years back from the farthermost object you are visualising, it is not the present shape of these distant galaxies, but as you see far away an older and older picture of galaxies are seen. IT IS SAME AS WE SOME TIMES OPEN OUR 'OLD PHOTOS ALBUM' TO SEE OUR PAST, AND AS WE OPEN MORE and MORE PAGE, WE SEE OUR YOUTH AND THEN CHILDHOOD AND THEN AS TODDELERS AND BABY.

But this long distance perception tool of humans or photons entering your eyes at wave length of light photons (400 nm to 700 nm) out of total electromagnetic waves (infrared, microwaves, radio waves, light waves, X ray or Gamma rays), so you identify objects only with the help of light photons absorbed by your retina (*curtain screen made up of neurons and blood vessels* at back wall in ball of your eye connected to visual centre in cerebral cortex situated in back of your skull by 'optic nerve') and the difference in quanta in photon out of this bunch of falling photons are perceived by brain as different colours (VIBGYOIR).

These moving EM waves are one dimensional deformation of Space matrix. Thus, with the help of light you can only visualised objects in one plain (in two dimensional images) i.e., on the surface of universe. That is why you

see, this ‘Flat universe’ and all galaxies placed on the surface of this inflating balloon.

Your body could perceive few forces of nature light, Gravity and uses magnetism. With the help of your eyes you (retina) absorb the energy packets of photons (in the visible range of EM spectrum) emitted by the atoms of all elements and with the help of our middle ears (cochlea) we perceive the gravitational forces (even the sense of depth and balance) as exerted by other big bodies.

Many mathematical models indicate towards parallel universes; we call them ‘Multiverse’, but you are far away of achieving its benefits. They are so close to you, but you are unaware of these universes because you are using only one measuring device i.e., Telescopes, which uses light as its detecting device. So, the gravitational effects of other bodies (nearby parallel universes) on your environment go unnoticed.

You have seen the peels/ layers of an Onion and your ‘own observed universe’ is only one peel/layer of this Onion which have 26 peels in total. These have been rightly named as Brans in your ‘string mathematical models’. You can’t see the galaxies and solar systems in this universe by their released photons by your telescopes; but you can even feel the gravitational effects [which is a force produced by three (or four) dimensional deformation of space matrix] of these parallel universes (and their galaxies) which can pierce these boundaries (peels of Onion) from time to time in between two universes.

Thus, the gravitational effects of the ‘Black holes’ in these adjoining universes will be reflected as ‘peer shaped gravitational deformations’ in matrix

forming one bran (layer) of our universe, and this will affect your atmosphere. Think of consequences if one point of this peer shaped deformation (produced by a black hole placed in other universe) touches your planet Earth.

Eyes only see what the brain knows, you constantly face these effects, but you don't realise them, as they are '**gravitational effects produced by parallel universes**. These deformations may manifest as frequent whirlpool deformations ('as two-dimensional deformations of gravitational fields' of big bodies in parallel universe) which can trigger 'Tornados' (most frequent in Oklahoma State due to its geographical vulnerability*) and 'strong storms' in north America'.

Sometimes 'even stronger, a three-dimensional column's (deformation) of the gravitational field of a passing by 'black hole', can suck the 'whole squadron of flying airplanes' and even 'whole intact ship from sea' with all its crew, as some times seen in the region of "mysterious Bermuda Triangle" without any traces left behind. This all actually happened in the year 1965. (read 'mysteries of Bermuda triangle')

(2) OUR QUANTUM PENDULUM UNIVERSE

Life span of our universe & what preceded BIG BANG

(!) Total allotted time of our universe is S seconds (which is one life span of universe).

(!!) Each bound **TREO** is vibrating in S number of plains of a circle in one second (in S vibrations), thus to vibrate in all plains of such S circles, and such S circles which can possibly form in S directions on one sphere, will consume its full allotted **time of S seconds.**

(!!!) By this time, *each fully curled up **VOID** will 'fully uncurl'* by its slow uncurling, of one-by-one uncurling in all directions and plains by the vibrational energy of adjacent TREO in **S^2 vibrations** or **in S seconds.**

(!V) *Once, 5 positive dimensional TREO will match with 5 fully uncurled negative dimensions of adjacent void,* both will inhale each other to **collapse the fabric of 10 dimensional SPACE MATRIX (BIG CRUNCH)**. The resulted **violent sudden total contraction of all matrix (BIG BANG)** will convert 'primordial soup' in to new space matrix of new universe to start its next life span with its ongoing expansion, responsible for its aging and aging of all its inhabitants including you and me.

Our universe is a 'quantum pendulum universe'. Like any pendulum it swings from its 'maximum kinetic energy state' to a 'maximum potential energy state' in its fixed lifetime, of S seconds or S^2 vibrations of universe in total.

At the time of its birth, the universe was fully contracted like a "crumpled sheath of paper" in the shape of a small ball at 'big bang', and it was at its 'maximum Kinetic energy state'. Thereafter, by continuous slow expansion of universe, it will some time reach to its 'maximum potential energy state' (as swinging pendulum) * when ultimately this universe will convert in a 'fully spread wrinkle free sheath of space matrix' (SPACE – TIME- ENERGY), ready for its death.

The **death of universe is 'big crunch**', which is destined after S^2 vibrations (life span of universe), when all the 'curled up Voids' (inter woven alternately with 'bound treos' in "space matrix of whole universe") will fully uncurl, so that their 'negative five dimensions' exactly matches with 'five positive dimensions of treo' and thus both will be ready to engulf each other.

Fluctuating in its total Kinetic energy and potential energy in each cycle, the expanding and contracting universe is a 'five-dimensional pendulum' and its one cycle is one 'life span of universe'.

You have seen **Pendulum of a wall clock** it swings from its maximum kinetic energy (on sides) and maximum potential energy state (in middle). This is one dimensional pendulum of universe and the **EM waves** with crest and trough is another such type in **one dimensional pendulum**.

Similarly, orbiting Planet or electron in an 'elliptical orbit' around its two foci [e.g., in planetary elliptical orbits one foci is the Sun its (kinetic energy centre) and other foci is vacant (potential energy centre)] fluctuates its kinetic energy and potential energy. Then orbiting planet increases or decreases its speed around these two foci and the orbits of Electron, Neutron or a Planet are '**two -dimensional pendulum of space matrix**'.

Before its death, the Universe will fully expand (along with all its fully uncurled voids) and at ever-accelerating pace to convert it in a 'fully spread wrinkle free sheath of space matrix'.

Then this ten- dimensional universe with its exactly equal five dimensions of positive energy (treo) and five dimensions of negative energy (void), will engulf each other and thus by sudden dissolution of all threads of its space matrix (big crunch), it will collapse immediately (in no time as Big Bang) to acquire the shape of an 'crumpled ball of primordial soup of treos, with fully curled up voids'.

At its birth as 'Big bang', the universe was fully contracted (not to a point) but it was of substantial size as primordial soup was present all around a universal singularity (SAD BRAHMA) and then it was woven as alternately

placed Treos with fully curled up voids, to construct fully crumpled space-matrix (ASAD BRAHMA).

The event will be 'big bang' and the time will be the birth of a 'brand new baby universe', which will immediately start expanding (and thus aging along with its all inhabitants and slowly moving towards its death) to complete a new cycle (swing) of this Pendulum Quantum Universe.

EVEN other universes OF MULTIVERSE WILL COLLAPSE AT REGULAR INTERVALS AS THEY ALL STARTED FROM SAME POINT AND WILL END IT ONE POINT INSPITE OF THEIR **DIFFERENT COSMIC CODES IN EACH UNIVERSE** (DIFFERENT RYTHEM OF VIBRATION OF THEIR MATRIX).

(3) PURPOSE IN LIFE

I could now visualize and can associate the hidden *purpose* of meeting with Alien* and immediately remembered an old but true incidence.

I will take you about 50 years back from now, when I was doing my house job in the year 1973, I have gone through a big emotional turmoil.

I am a childhood asthmatic and suffered a lot by off and on spasms of bronchioles of my lung and resulted breathless ness, so in my house job, I tried to get it treated, before I leave medical college.

In my case the only treatable thing, which triggers a bronchial asthma attack was a Deviated Nasal Septum'. So, I went to Dr U.K. Mishra an ENT lecturer for my operation of DNS. He had limping gate due to polio related

deformities, but he was good and talented ENT surgeon, he advised me all pre- operative investigations, and an X-ray chest.

When my x-ray chest was seen by Dr Trehan, lecturer in the department of radiology, he found a 3 Cm x 3 Cm big 'cannon ball shadow', in upper lobe of my left lung.

Only recently Dr R.C. Tandon had joined as lecturer cardio thoracic surgery, after returning back from USA. He had brought a stiff bronchoscope and he was very fond of bronchoscopy. Thus, my Bronchoscopy biopsy was planned and my class mate from B.Sc. Dr M K Shakya, who was doing his diploma in anaesthesia, gave me general anaesthesia. (He later on told me that you became blue on table due to lack of oxygen, so I have to stop Dr Tandon and I actually pulled out his bronchoscope myself*). My Bronchoscopy biopsy failed.

- Last week Dr Rajesh Bhargav professor of surgery told me that I was house surgeon of Dr R C Tandon at that time and your heart was stopped and I did your CPR (Cardio Pulmonary Resuscitation).

Next day in DR Trahan's room after a brief meeting of about 15 minutes with DR Tandon and Dr Mishra, and Dr A.P. Mathur resident radiologist came out of the room and told me that in absence of biopsy, this shadow is diagnosed by all of us among *lymphosarcoma* group of malignant tumours. I asked him how long I can expect to live? He replied that this matter was also discussed and as these tumours are highly malignant your life expectancy is about six months.

I asked him whether it can be treated anywhere in India? He said this is 'Cancer' and right now it has no treatment in India. I could not even think of getting treated outside India with no money in hand and with nobody to support.

Those days in Agra a movie 'Anand' was running at 'Chitra' picture hall, and the hero of the film Mr Anand was having '*lympho-sarcoma* of intestine'. The viewers were having a great sympathy for the dying hero and greatly admired his philosophy and were reciting the dialogues (as he talked with his friend 'Babu Moushai', about life and death); the movie was a big hit.

After being diagnosed as 'cancer' I maintained a complete silence in my words and in mind and I have not talked about this to any of my friends and to my family, mean while I was doing all my duties, with very heavy workload of my 'house job in surgery' at S N Medical college AGRA.

My father had died just two years back at the age of 51. My 20 years old younger brother Mr. Yogesh was a law student, and my 16 years old unmarried sister Km. Archana was doing her intermediate. My mother was a housewife. My House Job stipend of Rs 350 per month, was the only source of income to my whole family. So, I also had great family liabilities.

There was no body with whom I could share my fears, apprehensions, and in helplessness I became a rock and kept mum. With no hopes of future, I insured my life with 'life insurance company of India' for assured sum of Rs 20000 (twenty thousand) at death, because only for this amount of insurance I could pay premiums from my very little pay.

Next month I got my chest X-ray repeated. The tumour was there, but its size has not changed. All X-rays which were done after second month, third month and fourth month all shown 'same sized tumour'.

Fifth month, when I was waiting for my turn of chest x-ray done, my eyes blurred with a very intense light flushed around me and I heard a clear voice "you are being detained for some important tasks, which you have to

accomplish", and later on when I saw my new X-ray, to my great surprise it was clear, and the tumour was gone.

There was no 'canon ball' shadow in my left lung and I was cured from my cancer. All doctors were surprised and even I thought that it was a miracle.

On this Alian laughed first time as big roar; you still could not understand it was me who burned your all cancer cells by laser beam.

Foot note

Perhaps purpose of my life was to just pass all the divine knowledge for the benefit of human race and then to migrate to at Alien's planet.

Day 10, **ARE WE ALONE IN UNIVERSE**

AS, I just thought in this day on 15 th august 2013, *are we alone in universe or aliens are infect there*; IS THIS ALL IS ILLUSION, JUST FOR ME,

The helmet echoed to me; MY LOVE TO YOU AND TO HUMANITY IS NOT CHEAP, AND AS A TOKEN OF THIS LOVE I WILL TAKE YOU WITH ME, TO MY PLANET, TO LIVE HAPPILY FOR 900 MORE YEARS ON MY PLANET.

AND MY MESSAGE TO OTHERS IS, TO KNOW THE ANSWER OF THIRD CRUCIAL QUESTION, *PLEASE VERIFY ALL PHYSICS, ASTRO PHYSICS AND METAPHYSICS KNOWLEDGE AS I TOLD TO DR ASHOK SAXENA, IS IN THIS MANUSCRIPT PRESENT IN PRINTER BUCKET,*

If all found correct, you will know the answer; it was me only Alien Grengi 137 "as, you all will agree with me, that an ortho surgeon, by himself 'can't know this all knowledge nor can compresence this in-creditable tale"

I JUST NOW SENT SIGNAL AND MY CONCENT TO ALIAN FRIEND, THAT AS SOON AS SHE ENTERS SPACE SHIP, SHE CAN NOW SUCK MY SOUL TO CARRY IT WITH HER, for eternity. .

THE FINAL PAGE (written 11 years after, on 15 august 2024)

INFACT, AFTER PROVISIONAL PERMISSION FOR OUR PROPOSAL FROM ALIEN GOVERNMENT (only awaiting MASTERS OF UNIVERSE SIGNATURE), MY SOUL STARTED ITS JOURNEY WITH ALIAN, on Alian ship for her planet.

BUT AFTER 10 days in journey, FOR GREAT PAIN AND ASTONISHMENT TO HER, SHE WAS INFORMED 'that permission of transposition a LIVING HUMAN on ALIAN PLANET has been denied BY MASTER OF GALAXY; and told coolly 'abound the soul' in space.

GRANGI REVOLTED, as she ordered ROBOTS operating space ship, to turn back to EARTH. She very well new that her space ship has nuclear fuel only for its too and fro journey, and simultaneously she also closed all connections of space ship with its Alian Planet. On reaching Earth in night as space ship kept on hovering on over roof she just jumped on my roof with jar and halo camera, and after detaching herself from cord she entered the room and revived me with replacing my Soul in night of 4th and 5th September.

She asked me to come out and keep watching my space ship as it goes up. I gave her a warm kiss to which she reciprocated by voice in helmet she left. As ship ascended half a kilometre or so, she said in helmet to me "*I HAD NO CHOICE LEFT WITH ME, BUT REMEMBER MY LOVE FOR YOU AND HUMAN RACE WAS NOT CHEAP*; my soul will merge with yours to shift your soul at higher quantum level to BLISS or EVEN INCARNATION LEVEL, it will

energize you for life"; and then spaceship EXPLODED and VAPORIZED with its no trace left, nor of Grengi 137.

SAD EVER BUT SLIENTLY I READ ALL PHYSICS AND WRITTEN 4 BOOKS, in 2015, 2017, 2020, and my fourth book in year 2023, it was written earlier but only got published after death of my wife Surekha on 03.03.2023. I was blessed with merger of beam of others soul, with my soul TWICE; once complete out of Alian love and second time partial to fulfil her remaining tasks.

I kept her unresponsive helmet in locker of my covered not to be seen from anybody, and like chinies goods as they last only for a period it is guaranteed to work, to my great relief the Helmet too perished in some ashes.

This, final book is being PUBLISHED just after 11 years in 2024, to tell you the TRUTH, and are in hand of general public and to media, just to safe guard me in advance, <u>if everything written in book is found correct as expected,</u> *then this book may just reframe, one powerful military of a powerful government, just not to vanish me all together (just opposite, gesture of unkind ness, just opposite to kindness my alien friend shown to me), as their usual tactics, to capture me for life to their secret military base for interrogation and 'lie detector operations' OR will try to get HELMET, unknown by the fact, that it actually got destroyed by itself.*

THANK YOU FOR PATIENCE LISTNING AND READING and believing whatever is written in THIS BOOK.

APPENDIX 1

CALCULATIONS

[1] (a) Reduced Planck's constant and Planck constant

One quanta energy or S number of treos is *value of Reduced Planck constant, i.e., ħ bar*; which produces unit action and deforms just one bound treo layer of unit space matrix and its one 'unit angular momentum' (*value of h; Planck constant*) which produces one EM wave in one second.

a. **Reduced Planck constant is Energy of one quantum mass which** *is value of 'Quanta of unit action'* **or** *'unit minimum action'* **= *1.0545718 × 10^{-34}* Joule sec.** *(conventional Co data 2018 value of Reduced Planck constant)*

b. *Planck constant is the* **angular momentum of this one quantum mass–energy' which produces one EM wave in one second.**

= **6.626070 *× 10^{-34}* Joule sec.** *(Conventional Codata 2018 value of Planck constant*)

1. **If we divide conventional value of Planck constant by 2π**

6.626070 × 10^{-34} Joule / 6.28318531 (value of 2π)

= *1.05457179 × 10^{-34} Joule*

(We get conventional value of Reduced Planck constant per second)

2. **If we calculate Mass of this energy (m = E /c^2).**

$1.05457179 \times 10^{-34}$ Joule / $(2.99792458 \times 10^{8}$ meter per second$)^{2}$

$1.17336936 \times 10^{-51}$ kg (mass of one quanta energy)

(A) SPEED OF LIGHT

Each time after one Planck's least time, by next one vibration, the photon packet slides in *translational motion* to adjoining 'next bound treo' in direction of its progression, on space matrix. And thus, by S vibrations in one second, it moves by S number of (i.e., $1.855394405 \times 10^{43}$) bound treos distance per second.

Speed of light = Number of vibrations per second × displacement of photon packet per vibration

= $(1.855394409 \times 10^{43})$ vibrations per second × $(1.615788303 \times 10^{-35})$ m.

= 2.997924×10^{8} meter per second, which is c, or speed of light in vacuum.

Hence,

$c = S \cdot LP$

*Where Planck's least length or LP = $1.615788303 \times 10^{-35}$m is space occupied by one bound treo in length.

(B) RECALCULATED AND DERIVED VALUE OF GRAVITATIONAL CONSTANT

New Derived Value of Gravitational Constant **(what it denotes).**

After Replacing Meter with Planck Least Length

The gravitational constant, "G," is 6.67430×10^{-11} meter^3 per kilogram, per second per second. (Dimensional Formula $L^3 M^{-1} T^{-2}$)

"G" can be recalculated in terms of bound treos (kinetons) by substituting the value of the meter with the natural unit of Planck's least length which is (size of one bound treo; 1 meter = $0.61871425 \times 10^{35}$ bound treos); G = $6.67430 \times 10^{-11} \times (0.61871425 \times 10^{35})^3$ bound treos (kinetons) per kilogram per second per second = $1.58079692 \times 10^{94}$ kinetons per kilogram, per second per second.

This also means that this number of kinetons act on 1 kilogram of mass per second per second and will support an equal number of "free Treos" in one kilogram. Thus, $1.58079692 \times 10^{94}$ "free Treos" constitute one kilogram of mass.

Alternatively, the value of "G" can also be denoted by the number of kinetons supporting one unit of mass (S_2 number of free Treos) and = $3.442488398 \times 10^{86}$ kinetons per unit mass, per second per second.[8]

Alternatively, the value of "G" can also be denoted by the number of kinetons acting on one free Treo (as in the case of EM wave of unit photon) and =1 kineton per free Treo, per second per second.

> **Then**, gravitation as a phenomenon can be explained as G = universal constant = 1 unit action by one free Treo is reacted by one kineton by its 1unit reaction, in one unit time of 1 second i.e., per second per second (i.e., continuously).

(D) <u>What condenses mass in bodies and Gives Slope towards center in gravitational field?</u>

What condenses mass of cosmic body and pushes/squeezes the baby body towards the center of body in any Gravitational Field, despite bigger sub kinetic coloumns and dense kinetic energy towards center.

While the gravitational kinetic energy (v^2) of each sub kinetic coloumn in each successive layer towards the sun increases, but the *total gravitational kinetic energy of anyone 'n' th layer on 2n-1 kinetic coloumns, not stays constant but comparatively reduces fast in each successive layer (matter wave) towards the sun*, as the value of the factor –1 increase disproportionately fast. This happens with decreasing value of 'n' (as 'n' is also equal to radius or distance from the sun) in the equation [$2MG \geq (2n - 1) \times v^2$]. The impact of the –1 factor increases disproportionately fast as 'n' approaches 1, towards gravitational centre of body.

$2MG \geq (2n - 1) \times v^2 \geq MG$ ('r' or 'n' is large and 1 is small)

In each successive layer towards the sun, the value of 2MG kinetons (i.e., the total gravitational kinetic energy in one layer) is calculated to be less than in the next outer layer according to the formula $2MG \geq (2n - 1)\ v^2$.

For example, see one hypothetical calculation of "total kinetic energy in one layer" from layer number 1 to layer number 10 in gravitational field, which is calculated as 1 MG, 1.5 MG, 1.66 MG, 1.75 MG, 1.80 MG, 1.83 M, 1.85

MG, 1.87 MG, 1.88 MG, and 1.9 MG. This anomaly provides a gentle slope towards the parent body, and thus, the body mass and baby bodies in the gravitational field will slide/fall/squeezed towards the sun due to the total pushing force of one full outer bigger layer.

(E) Planets condense at matching 'Gravitational kinetic energy v^2 levels'

Calculation of Gravitational Kinetic Energy in the Orbit of ***Mercury as 'Em'.***

E is equal to the total number of kinetons (v^2) in anyone 'sub kinetic coloumn' at the 10_{4th} quantum level in the gravitational column of Sun, at which the planetary orbit of our first planet Mercury, lies (according to the formula $v^2 = MG/r$). The kinetic energy in each sub kinetic column in the orbit of Mercury is equal to Em.

Em = 8.776444393×10^{78} kinetons = v^2 = Mg/r= $(3.145233887\times10^{124}/0.3583722239\times10^{46})$★ *Inferences from Treo Model* ★

Gravitational kinetic energy or v^2 in orbit of any planet determines its position at its matching 'planetary quantum level'.

Planet	Kinetic energy E	Calculated	Actual
Mercury	E	$8.776444393 \times 10^{78}$	$8.776444393 \times 10^{78}$
Venus	E/2	$4.38822197 \times 10^{78}$	$4.696829258 \times 10^{78}$
Earth	E/3	$2.925481464 \times 10^{78}$	$3.397352232 \times 10^{78}$
Mars	$E/4(E/2_2)$	$2.194111098 \times 10^{78}$	$2.230118005 \times 10^{78}$
Asteroid belt	$E/9\ (E/3^2)$	$0.975160488 \times 10^{78}$	
Jupiter	$E/16(E/4_2)$	$0.548527774 \times 10^{78}$	$0.653301797 \times 10^{78}$
Saturn	$E/25(E/5_2)$	$0.351057775\times 10^{78}$	$0.356398183\times 10^{78}$
Uranus	$E/49(E/7_2)$	0.1791111×10^{78}	$0.177026782 \times 10^{78}$
Neptune	$E/81(E/9_2)$	$0.108351165 \times 10^{78}$	$0.113015946 \times 10^{78}$
Pluto	$E/100(E/10_2)$	$0.087764443 \times 10^{78}$	0.0860632×10^{78}

(F)

WHY at all WAVES ARE FORMED

Have you ever thought Why waves (EM, Matter and gravitational) are formed. It is to support the matter on Space matrix. Any EM energy or Mass energy packet or any mass forming its gravitational center or even Diluted mass pressure of Sun will spread on its wave and will be supported at each bound treo by its kinetic coloumn. Each quantum energy can only be supported by its one rotation on matrix to be supported from converted kinetic energy from S directions of a circle; and any packet will be supported on matrix in a minimum period required of S vibrations in one second. For photons transverse sub kinetic coloumns at each apex bound treo rotates and completes one full rotation for each quanta energy of photon packet and thus forms **Equal number of EM waves to support TOTAL NUMBER OF QUANTA EM ENERGY IN PACKET IN ONE SECOND**. While mass energy packet to support its load of '*Square number of Quanta of its quantum level number*' **at each apex bound treo in its wave length requires one shell with equal number of orbitums in its all Sub-shells**. *All equal energy orbitums one over other form one orbit of wave*.

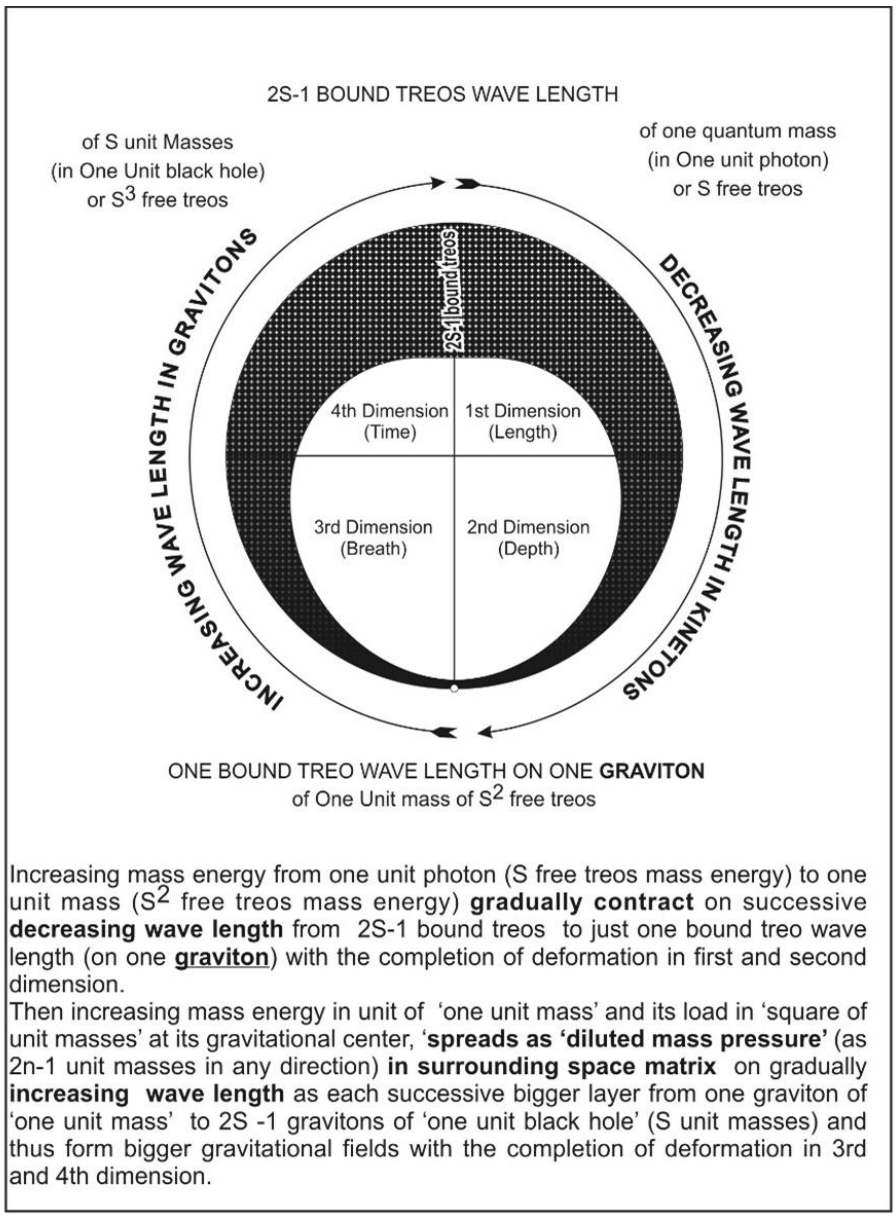
To balance angular momentum half of orbitums will do clockwise rotations to lodge +SPIN energetic Electron and other half orbitums in same orbit rotates anticlockwise to lodge -Spin same energy energetic electron.

THUS, TOTAL NUMBER OF EM WAVES or TOTAL NUMBER OF ORBITUMS in all shells present at each apex bound treo along wave length is ALWAYS EQUAL TO **TOTAL NUMBER OF QUANTA** WHICH FORM THIS PACKET, AND IS BEING SUPPORTED IN ONE SECOND (S VIBRATIONS).

Figure matter waves at first four quantum levels

COMMON FORMULA FOR LENGTH OF SPREAD (i.e., Wavelength) OF ALL PACKETS on which one EM or MATTER WAVE forms.

Common formula to get Wavelength from 'unit photon' to 'unit mass' or one PLANCK'S MASS = ***S number of bound treo / divided by number of quanta in any packet*** *(PHOTON PACKET or any MASS ENERGY PACKET).*



2S-1 BOUND TREOS WAVE LENGTH
of S unit Masses
(in One Unit black hole)
or S^3 free treos
of one quantum mass

or S free treos
INCREASING WAVE LENGTH IN GRAVITONS
DECREASING WAVE LENGTH IN KINETONS
2S-1 bound treos
4th Dimension
(Time)
1st Dimension
(Length)
3rd Dimension
(Breath)
2nd Dimension
(Depth)
ONE BOUND TREO WAVE LENGTH ON ONE GRAVITON
of One Unit mass of S^2 free treos
Increasing mass energy from one unit photon (S free treos mass energy) to one unit mass (S^2 free treos mass energy) gradually contract on successive decreasing wave length from 2S-1 bound treos to just one bound treo wave length (on one graviton) with the completion of deformation in first and second dimension.
Then increasing mass energy in unit of 'one unit mass' and its load in 'square of unit masses' at its gravitational center, 'spreads as 'diluted mass pressure' (as 2n-1 unit masses in any direction) in surrounding space matrix on gradually increasing wave length as each successive bigger layer from one graviton of 'one unit mass' to 2S -1 gravitons of 'one unit black hole' (S unit masses) and thus form bigger gravitational fields with the completion of deformation in 3rd and 4th dimension.

Figure 19

WHY WAVES FORM, Wave length reduces in first and second dimension = S number bound treos/ **increasing** number of quanta (EM waves/ matter wave) energy in packet.

In third and fourth dimension it increases = S bound treos/ **reducing** number of quanta mass pressure of body in gravitational waves.

Calculations to verify.

We will verify all above statements, with example of Wavelength of unit electron.

Reduced Compton (RC) wavelength of 0.51 MeV unit Electron.

= 0.38615926796 × 10^{-12} m (conventional value)

Or = 23.797258 × 10^{21} Bound treos length (after conversion).

This can also be calculated by this new proposed formula:

RC Wavelength= S bound treo distance /quanta mass energy in electron packet

23.797258× 10^{21} bound treos length= 1.855394419 10^{43} bound treo distance / 0.779667093 10^{21} quanta electron.

Compton wavelength of 0.51 MeV electron:

=2.42728683(11) × 10^{-12} m [CO-DATA 2018 value]

= 1.50179695 × 10^{23} bound treo distance (after conversion).

Twice of Reduced Compton wavelength, which form **<u>one wave</u>** when multiplied by π, equates to **circumference of orbit or its Compton wavelength.**

2 × 23.797258 × 10^{21} bound treos length × π

= 1.50179695 × 10^{23} bound treo length, which is same as CO-DATA value.

Reduced Compton wavelength × mass-energy of electron (or of any elementary particle) is same as S^2 free treos; as shown.

= 23.797258 × 10^{21} bound treos wavelength × 1.439491604 × 10^{64} free treos in unit electron packet = 3.4 × 10^{86} = S^2 free treos (= S^2 kinetons as Ground energy of second dimension).

<u>Inferences</u>

If Reduced Compton wavelength is 'n' then 2 × Reduced Compton wavelength
= 2n-1 bound treos on which it forms one wave in an arc of 1/3rd circumference of circle.
Further, 2n-1 bound treos × π = Compton wavelength, is circumference of this circle

Table- All elementary particles and nucleons or integral multiples of MASS UNIT (35.01 MeV)

(F) One Big are MANY smalls – (unification of quantum world with general theory of gravity)

Circumference of orbit at 10^{39}quantum level in graviton coloumn of one graviton supports one unit mass x multiplied by 10^{38} number of unit masses in Sun = circumference of orbit of earth.

APPENDIX B

SCIENCE IN MIDDLE AGE AND IN ANCIENT INDIA

(!)NALANDA UNIVERSITY

Biggest ever advanced university of India was built in 4 th century, it was spread in 10 km area, built by Gupta dynasty served for 800 years, students from all over world majority of overseas students were from China, Japan, Afghanistan and Korea, Nalanda university (who later on gone back to their native places and changed the world) it had 1500 teachers, 10000 students of 100 subjects, which chiefly covered medical science and Ayurvedic medicine but included physics, astrology, and astronomy. Mohammad Bakhtiyar Khilji, one madman, in AD 1190 burned 900000 (nine million) handwritten books and palm leaf manuscripts kept in its library, which remained burning for 3 months (23 acers excavation site of burnt university is

archaeological site which gives evidence of this fire and now is UNESCO world heritage site) and killed most of teachers and scholars. In past the library of Alexandria also got burnt in 48 Bc.

Some of manuscripts saved by running scholars can be seen at YARLUNG MUSEUS TIBBAT and LOS ANGELES COUNTY MUSEM OF ART, luckily university is being revived. Xuanzang (THE MONK WHO BROUGHT BUDDHISM EAST) came to India after 17 years journey mostly under the cover of darkness in 629 CE and in 645 CE he carried 657 manuscripts from Nalanda and translated them in Chinese language and spread along with one of his Japanese disciples DOSHO who spread it in Japan which remains a major religion ever since.

The oldest university of world TAKSHASHILA UNIVERSITY was also Indian, which gave teaching of 64 streams, was built about 5 th century BC (later on abandoned in 5 th century CE) was in city of TAXILA (the city was built by king **Bharat the younger brother of Lord RAM in the name of his son TAKSH**, in Sanskrit city is called TAKSHASHILA) the city is at the bank of Indus River (which is now after division of India is in Rawalpindi – Islamabad metropolis Pakistan).

UNDERSTANGIN GRAVITATION

Bhaskaracharya or BHASKAR ll, (1114 CE -1185 CE) at the age of 36 years, in 1200 century in his book 'Shidhantasiromani' talks about gravitation and motion of celestial bodies. He was head of astronomical observatory at UJJAIN India.

But even much before, Brahmagupta (598 CE - 670 CE) in 7 th century in his book '*brahamsphotshidhant*', (original 628 CE) reprint in Banaras, in 1902, [gave the name Gurutwakarshan ''GURU (BIG) twa (doing) Akarsan (attraction)] while Newton could do it much after based on Kepler's studies it in 17 th century.

LEGENDRIES

ARYABHATTA Mathematician

ARYABHATTA (476 AD – 550 AD) Student of NALANDA UNIVERSITY at 23 ages written *ARYABHATIYA (499 AD)* and *ARYA-SIDHANTA* and its third book is surviving only in its Arabic translation AL-NANF.

His work in mathematical part includes (1) GATIKAPADA (13 verses) includes table of sine (JYA), cosine (KOJYA), versine (UTKARAMA) and inverse sine (OTKRAM JYA) influence the birth of trigonometry. (2) GANITAPADA (33 verses) includes asthmatic and geometric progression, GENOM shadows (Shanku chhaya), simple, quadratic, simultaneous and indeterminate equations (Kuttaka) (3) KALAKRIYAPADA (25 verses) describes periods of time and method of determining position of planets and 7 days in week with its names (4) GOLAPADA (50 verses) geometric and trigonometric aspect of celestial sphere, features of ecliptic, celestial equator, node, cause of day and night, rising of zodiacal signs on horizon.

The work was influenced by LALLA, BHASKAR 1, BRAHMAGUPTA, and VARAHMIHIRA including others.

Famous commentaries on his work are BHASHYA (600 Ad) by BHASKARA 1 and ARYABHATIYA BHASH (in 1465 AD) written BY Neelkanth swami ji.

LATA DEVI (505 Ad) Astronomer

LATA DEVI the student of Arya Bhatt written SURYASIDHANTA (400 AD to 500 AD) original is Palm leaf manuscript is Basis of JYOTISH and PANCHANG still prevalent in Hindu society and influenced Islamic JALALI CALANDER (1073 CE) based on actual solar transits and seasonal errors are less than GEORGION CALANDER.

It describes earth is spherical, talk about motion of sun and moon relative to different constellations, diameter of various planets, orbits of astronomical bodies.

She gave explanation of lunar eclipse, solar eclipse, rotation of earth on its axis, tropical year (time taken in one revolution of earth), reflection of light by moon surface, sinusoidal functions, solution of single variable quadratic equation, value of pai up to 4 decimals, diameter of earth as 8000 miles (correct 7928), diameter of moon as 2400 miles (correct 2160), distance in between earth and moon 258000 miles (actual varies to maximum 252700 miles), calculation of length of sidereal year, including relativity in motion. The text is known for earliest known descriptions of sexagesimal fractions and trigonometric functions.

RAMANUJAN

SRINIVASA RAMANUJAN AIYANGAR, FRS (20 th Dec 1887 – 26 April 1920) had no formal education in pure mathematics he made substantial contributions to MATHEMATYCAL ANALYSIS, NUMBER THEORY, INFINITE SERIES and CONTINUED FRACTIONS including solutions to mathematical problems then considered unsolvable.

EARTH QUACK PREDICTIONS IN INDIA

Earth quack prediction is discussed as one full chapter in BRIHAT SAMHITA, written by *Rishi Varaha Mihira* (505 AD – 587 AD) in 6 th century CE (Gupta period) in Ujjain, MP; describes before earth quack the changed pattern of clouds, abnormal behaviour of animals and birds, effect of position of planets and change in ground water level, and strange appearance of multiple coloured 'Earth quake cloud' 7 days before are formed due to "vertical electrical fields" generated.

GLOSSARY

(A)

TREO Also named as Strings; and presents in only in one dimension of Planck's least length.

(!)Bound treo or (Dark energy particles)

Alternately Interwoven with voids it forms five dimensions of SPACE-TIME-ENERGY

(!!)Free treo (Visible matter)

S number of free treos (one quantum EM energy), and **√S quanta** mass energy **(√S x S free treos)** is in unit electron; and S quanta **(S x S free treos)** are in unit mass **(PLANCK'S MASS or 2.172 x 10 $^{-8}$ Kg).**

(!!!) KINETONS (deformed bound treo) or Dark matter particles.

(B) VOID curled up 5 negative dimensions of Empty spaces.

(C)Space – Matrix (Space- Time- Energy);
Omnipresent matrix of universe is chromodynamic energy of functional god. **Out of its 3 interdependent components** when **SPACE CONTRACT (**by conversion of bound treos in kinetons**),** Kinetic **ENERGY** Erupts and **TIME** slows down; Thus ACTION-REACTION mechanism is executed.

(D) COLOUMN GEOMETRY (2n-1 units in each layer and n2 in any n layered coloumn) and

Supporting units of 5 dimensions are- kineton (1 kineton), orbitum (S kinetons), graviton (S^2 kinetons), electron black hole (S^3 kinetons), unit black hole (S^4 kinetons), respectively.

(E) DIFFERENT NAMES OF KINETIC COLOUMNS in five dimensions.

(!) kinetons, layers and **Sub kinetic coloumn** (simile – as if 1 knot in mosquito net)
(!!) Orbitum, sub shells and **shells** (1and 2 Knots)
(!!!) Graviton, spiral layers, **electron black hole** (1,2 and 3 Knots)
(!V)Electron black hole, layers of gravitational sphere and **gravitational sphere**(1,2,3 and 4 Knots)
(v) Unit black hole, galactic centres, **KHIR SAGAR.** (1,2,3,4 and 5 Knots one over other; like Russian dolls)

(F)Some, VEDIC NAMES

(1)BRAHMA- GOD OF CREATION

(2)SAD- BRAHMA (primordial soup) was converted in **(ASAD-BRAHMA (Space-Time-Energy: SPACE MATRIX)**

(3)VISHNU (point AA) - GOD OF CHROMODYNAMIC **ENERGY**: as gravitational centre of **S^3 gravitons** around centre of **Kshir sagar** supporting load of S black holes (load of **√S unit black holes**)**.**

(4)SHIV as Voids- GOD OF DESTRUCTION

Three Hindu G O D – G (generator; BRAHMA): **O** (operator; VISNU): **D** (destructor; Shiv)

(5)RUDRA – Black hole

(6)KSHIR SAGAR- ultra-massive **√S unit black holes**

(7)INDRA -(KA particle) -King of all Dev (elements): Name given to MASS UNIT of 35.01 Mev.

(8)GANESH- (name given to **unit electron)**

(9) SAT -VRNDARAKAHA- Six **Quarks**

(10) TRI-VATRAMA- 3 **Mesons**

(11) ARYAMA- Uranus

(12) VARUN – Naptune

(13) RITU- Pluto

(14) SATURN RINGS- Shukra, Suchaya and Ruchanaha.

(15) <u>GURU- TWA- KARSHAN</u> (attraction by mass) – name given to Gravity (in '*braham-sphot-shidhant*', original 628 CE)
